MASTER PLAN FOR DELHI

PREPARED BY THE DELHI DEVELOPMENT AUTHORITY AND APROVED BY THE CENTRAL GOVT. UNDER THE DELHI DEVELOPMENT ACT, 1957

DELHI DEVELOPMENT AUTHORITY

Chairman

Bhagwan Sahay, Chief Commissioner, Delhi.

Vice - Chairman

G. Kumharji.

Members:

- 1. Kumari Shanta Vashist, M.P.,
- 2. C.K. Nair, M.P.
- 3. R. R. Bahl.

Commissioner

Municipal corporation of Delhi.

4. A. R. Malhotra.

President,

New Delhi Municipal Committee.

5. B. S. Srikantiah,

Deputy Secretary to the Government of India,

Ministry of Health, New Delhi

6. Shiv Charan Gupta, Councillor

Councillor,

Municipal Corporation of Delhi.

7. Sikandar Lal,

Councillor,

Municipal Corporation of Delhi.

8. Balbir Singh Saigal, Engineer-Member

9. Bishan Chand,

Finance & Accounts Member.

Secretary:

Raj Kumar Vaish.

Officer on Special Duty:

M. L. Gupta.

Administrative Officer:

B. C. Sarkar.

ADVISORY COUNCIL OF THE DELHI DEVELOPMENT

President:

Bhagwan Sahay,

Chief Commissioner, Delhi.

Members:

1. S. K. Joglekar,

Chief Architect,

C.P.W.D., New Delhi.

2. S. G. Pradhan,

Architect.

Municipal Corporation of Delhi.

3. Lt. Col. M.S. Boparai,

Health Officer,

Municipal Corporation of Delhi.

4. Bal Kishan,

Councillor, Municipal corporation of Delhi.

5. Rup Lal Batra,

Councillor, Municpal Corporation of Delhi.

6. Bhagwan Dutt Wadhwa,

Councillor, Municpal Corporation of Delhi.

7. Tilak Raj Chachra,

Councillor, Municipal Corporation of Delhi.

8. Bhiku Ram Jain,

Councillor, Municipal Corporation of Delhi.

9. Prahlad Saran Gupta,

Councillor, Municipal Corporation of Delhi

10. R. K. Bhardwaj,

Councillor, Municipal Corporation of Delhi.

11. Kirpa Narain,

4-Raj Narain Road, Delhi

12. M. L. Mittal,

Kamla Nagar, Delhi.

13. Dr. K. L. Rao,

Member.

Central water & Power Commission, New Delhi

14. H. P. Sinha

Consultin Engineer (Roads),

Ministry of Transport & Communications, New Delhi

15. Kanti Chaudhri,

Director, Military Lands & Cantonments, Ministry of Defence,

New Delhi.

16. C. P. Malik Director,

National of Defence, New Delhi

- 17. Shrimati Subhadra Joshi, M.P.,
- 18. Radha Raman, M.P
- 19. R.P. N. Sinha, M.P.

Bharat Sewak Samaj, New Delhi.

20. Brij Kishan Chandiwala,

Bharat Sewak Samaj, New Delhi.

ACKNOWLEDGMENT

The following consultants of the Fort Foundation and officers of the Town Planning Organisation rendered assistance to the Delhi Development Authority in the preparation of this plan:

Ford Foundation Team:

Albert Mayer

Gerald Breese.

Edward G. Echeverria.

Walter P. Hedden.

Bert F. Hoselitz.

Arch Dotson.

Britton Harris.

George Goetschius.

Town Planning Organisation:

Chairman:

G. Mukharji.

Architect-Town Planner:

Shivnath Prasad

Architect:

C .S. Gupta.

Associate Planners:

B. G. Fernandes.Sayed S. Shafi.B. N. Rahalkar.

P. B. Rai. J. P. Sah.

E.A. George Danial.

Shri Manohar. B. D. Kambo. R. L. Bawa. M. S. Malik.

S. G. Pradhan.

They were assisted by I.S. Maurya, M. P. Sreevastava, O.P. Gupta, A. B. Bose, R.S. Duggal, K. C. Dua, Mohan Kainth Ved Prakash, S. M. Negpal, M. N. Nair, A.K. Srivastava, Suraj Prakash, Narendra Juneja, G.R. Khurana, M.D. Chaudary, V.P. Sanon, P.M. Kolhatkar, N.C. Saxena, T.S. Punn, B.V. Telang, I.G. Sinha, Smt. Satwant B. Singh, T.K. Chatterji, M.D. Mathur, O.P. Mathur, S.C. Sud, R. N. Nigam, R.K. Gupta, K.V. Sundaram, Birender Singh, M.C. Kaushik, J.S. Khurana, Ved Prakash, D.V. Chopra, S.K. Misra, M.B. Bhatia, J.P. Gupta, G.S. Sahota, Ravinder Bhan, Arjun Deo, R.L. Thakar, J.C. Malhotra, Suresh Chand, Satish Chander, Miss Sarla Mathur, Miss K. Indani, O.M. Verghese, C. Sriram, Nafis Ahmed Siddquie, A.K. Chandra, P.S. Laumas, S.K. Chawla, Miss Vijya Sundram, B.S. mallick, K.L. malhota, Prita, Singh Sagoo, K.K. Aneja, N.R. Mistry, Hukam Chand, Pritam Singh Sagoo, K.K. Aneja, N.R. Mistry, Hu7kam Chand, M. S. Sahansara, Rup Sukh, R.K. Nayar, Choudri Ram, Swami Saran, Duggal, Mrs. Dolly Misra, J. S. Rooprai, Miss Pramilla Khana, S.M. Adil, N. L. Sharma, V.P. Dawar, M. B.

Mathur, R.K. Nigam Manohar N. Dass, S. C. Sahni, Kul Bhushan, P. S. Sethi, Mohd, Aslam, S.C. Gupta, Jasbir Singh, S.C. Asthana, T.P. Chandrasekhar, Ashok Kumar, B.D. Chandola, P.C. Gupta, B. B. Tewari, M. Hussain, Miss K. Bahadur, Miss Pushpa Kshetrapal, B.R. Arora, S.S. Sethi, Trilok Kumar, S.K. Jain, Suresh Chandra, B. M. Gupta, M. S. Munet, M. V. V. Perry Shastry, K L. Sethi, B. K. Kala, Miss Sucheta Mirchandani, R. M. Popali, Saired Ahmed Khan, Shyam Sunder Sahney, Jagbir Singh, Ram Rakash Pal Sharma, Mrs. K. K. Gupta, R.K. Singala, R. Ranga Rajan, Kashmir Singh, Suresh Kumar, S.L. Kukreja, K. M. Mathew, S.C. Chopra, K. B. Chaudry, S. K. Kalia, R. Nangia, N. P. Varia, Anil Biswas, M. H. Siddiqui, Miss Maltisud, Harbajan Singh, V.M. Abraham, V.P. Gupta, Gunanand Kothiyal, Virendar Narain.

Some of the officers mentioned above are no longer in the Organization.

MASTER PLAN FOR DELHI

INTRODUCTION

To check the haphazard and unplanned growth of Delhi. Following the partition of the country and the phenomenal growth of the city's population, with its sprawling residential colonies, without proper layouts and without the conveniences of life and to guide the growth of the city, the Central Government in authority, In December, 1955, the Town Planning organization was placed under the administrative control of the Chairman, Delhi Improvement Trust to advise the Authority on all matters relating to planning in the National Capital.

- 2. The Town Planning Organisation, in September, 1956, produced the Interim General Plan, which was intended to provide an outline for planned development during a period of two to three years, i.e. until a comprehensive long range plan was prepared.
- 3. On the 30th. December, 1957, the Delhi Development Authority an 11-member body with the Administrator of the Union Territory of Delhi as the ex-officio chairman, was constituted by an Act of Parliament, called the Delhi Development Act, 1957, to promote and secure the development of Delhi according to plan. The Act required the Authority to carry out a civic survey of, and prepare a Master Plan, for Delhi.

Accordingly, the Authority, with the help of the Town Planning Organisation, and after having had such surveys conducted as were necessary, drew up a draft Master Plan, consisting of numerous maps and plans embodying the studies and proposals and an explanatory text, for an estimated population of about fifty lakhs in 1981, and after seeking the advice of the Advisory Council of the Authority, released it to the public on the 8the July, 1960 for the purpose of inviting objections and suggestions. An outline of the draft plan, in three languages, namely, English Hindi and Urdu, explaining the broad features of the plan, for the benefit of the public, was also prepared. A period of three months was allowed for filing objections etc., and during this period, adequate publicity was given to the draft plan by displaying the maps and charts to the Press, Members of Parliament and to the general public.

4. Nearly 600 objections and suggestions were received from the public. Co-operative house-building societies, associations of industrialists, local bodies, Delhi Administration and various Ministries and Departments of the Government of India. The Authority appointed and ad-hoc Board consisting of Kumari Shanta Vashist, M.P., Shri C. K. Nair, M.P., the Commissioner, Municipal Corporation of Delhi and Sarvashri Sikandar Lal, Councillor, Muncipal Corporation of Delhi and Balbir Singh Saigal, Engineer-Member and this Board co-opted Shri Brij Kishan Chandiwala and Dr. R. K. Bhardwaj, Members of the Advisory council of the Authority, to go into these objections. The Board granted a personal hearing to all objectors etc. and also carried out local inspections and made its report to the Authority on the 17th. March, 1961.

- 5. The Authority obtained the advice of the Advisory Council on this report and examined all the proposals in great detail in the course of several meeting. As a result of this scrutiny some of the proposals have been modified and some new ones incorporated.
- 6. Given below are a few of the important recommendations made in the Master Plan.

It was felt that the redevelopment of the Old City by way of large scale clearance and reconstruction was not immediately practicable, and it has, therefore, been suggested that after assessing the requirements of schools, dispensaries, parks etc., sites of dilapidated houses or of those demolished by the Municipal Corporation of Delhi might be acquired at suitable places for the location of the community facilities. Similarly, as it was not practicable to widen all the roads in the Old City, only the major roads should be widened in the first stage to the minimum extent considered necessary. It has been proposed that the evictees from the Delhi Ajmere Gate Extension Scheme and also to take the overspill of population from the Old City. To meet the problem of settlement of low income group people – about 70,000 in number, who migrate to Delhi from rural areas every year, the Authority has proposed to earmark suitable sites in several zones where these very low income group people may be according to standards. The squatters in bustis are to be relocated in various parts of the urban area so that they are integrated into the neighborhood community. It is of the utmost importance that physical plans should avoid stratification on income or occupation basis. The residential density patterns have been functionally related to the work centers, recreation areas and community facilities. Hence, a more rational distribution of densities is proposed by gradual thinning of the density in Old City and by increasing the density in New Delhi and in Civil Lines. An integral part of the plan in the "Sub-division Regulations" which, by laying down standards for streets and community facilities, will guide new development and the "Zoning regulations" which indicate the land use permissible in the various zones and the density, coverage, floor area ratio and set-backs for Accordingly, the Authority, with the help of the Town Planning Organisation, and after having had such surveys conducted as were necessary, drew up a draft Master Plan, consisting of

numerous various types of development. They also define the period by which incompatible land uses like obnoxious industries are to be relocated.

To meet the increasing need of commercial space in central areas, it is recommended that the Connaught Place commercial area be extended upto Keeling Road and the proposed over bridge over the railway. It is also proposed to have 15 district shopping centers to decentralize commercial activity and to make each Division of the City self-contained. New sites for location of Government offices have also been proposed in the several new areas are proposed for industrial development and the total area of the land earmarked for this purpose is about 5800 acres. This would include flatted factories, which are use of small-scale non-nuisance industries.

In addition to Subzimandi, two wholesale fruit and vegetable markets have been recommended, one near the Okhla Railway Station and the other near the Daya Basti Railway Station near Saria Rohilla. Godowns for the storage of foodgrains will be located in areas marked for the purpose, and only the offices of whole salers and retail foodgrain shops would be allowed in the two congested areas of Naya Bazar and G.B. Road. Similarly, godowns for timber will be located in ware-housing areas and the presently congested areas of Teliwara and Deshbandhu Gupta Road will deal only in retail timber trade. A 15 acre site on the Mehrauli Road near the intersection of this road with the railway line has been proposed for a general market. Additional land for oil storage depots, which are at present located on Rohtak Road, and will continue there, has been earmarked near Nangloi Railway Station and also near Palam Railway Station, and in Shahdara. A university centre in the south near the junction of Kitchener Road and Ring Rod has been proposed. Twenty-two new colleges, each covering an area of about 15 acres and 5 additional university centers of about 30 to 40 acres each to serve a group

of 4 or 5 colleges, have been earmarked in the Plan. Twenty additional 500-bed hospitals each 15 to 25 acres have also been proposed. An area of about 600 acres has been reserved south-west of the new engineering college, for a new university and for social and cultural institutions. A 45 acre site in the neighborhood of Siri village area has been earmarked for an all-India cultural centre. This is in addition to the areas earmarked on the Central Vista east of Janpath, near Sapru House and in the proposed Civic Centre which will serve as social and cultural institutions for Delhi. District parks for recreation, local open spaces for play-grounds and community centers and local shopping areas to serve each neighborhood have been recommended in the plan.

In view of the large scale development proposed for Shahdara, which is expected to have a population of about 7 ½ lakhs in 1981, the plan provides a large commercial area and four road bridges in addition to the existing road-cum-railway bridge. Two more major road links between Old Delhi and New Delhi have been recommended as over passes over the railway line-one connecting Circular Road to Parliament Street and the other connecting Mathura Road to College Road Ferozeshah Road. An Inner Ring Road and a Ring Railway have been recommended to avoid traffic congestion and facilitate quick flow of traffic in the urban core in addition to the Ring Road which has already been constructed. Reservations for new railway stations on the Ring Railway, expansion of the existing railway stations, widening of major arterial roads, improvement of road intersections and separations, arterial cycle tracks separate from the carriageway are some of the recommendations to make a good traffic circulation system. Bus stations are proposed to be located in different parts of the city. The central bus station which is at present located at the Delhi Main Railway Station would be shifted to a 10 acre site near Kashment Gate. An idle parking area of the sanitary drain, for inter-state buses and trucks. Parking and servicing stations are proposed to be located near Id Gah on Id Gah Road and in Shahdara with several idle parking and servicing areas for trucks. The plan recommends an inviolable green belt approximately one mile in depts. Around the 1981 urbanisable limits and has proposed the setting up of "urban villages" to strengthen the rural economy.

The plan has also assessed the needs of the Capital in power, water supply and sewerage and has made provisions for location of water works, power houses and sewage treatment plants.

7. The Authority takes this opportunity of acknowledging the very valuable help rendered by the Town Planning Organisation which conducted comprehensive surveys to collect the factual data and also prepared a draft of the Master Plan for submission to the Authority. They assisted both the Screening submission to the Authority. They assisted both the Screening board and the Delhi Development Authority with their technical advice and have given a final shape to the plan in accordance with the decisions of the Authority.

The Authority also gratefully acknowledges the help and guidance received from the team of consultants made available by the Ford Foundation in conducting the surveys, tabulations of date and in the preparation of the draft Master Plan.

8. The thanks of the Authority are also due to the government of India Press, particularly Shri C. biswas, Manager Photo Litho Wing, for their help and ready co-operation in printing the various maps and the

text of the Draft Plan.

- 9. The Authority also gratefully acknowledges the contribution made by the former chairman of the Authority Shri A. D. Pandit.
- 10. The plan has been prepared finally today by the Delhi Development Authority vide their Resolution No. 387 for submission to the Government of India, and in token thereof we, the members of the Authority do hereby affix our signatures here-under:-

This Master Plan has been approved by the Central Government under section 9(2) of the Delhi Development Act, 1957, and was published on the 1st.

CHAPTER I

THE LAND USE PLAN

1. LAND USE PLANS FOR DELHI METROPOLITAN AREA

The Delhi Metropolitan Area of about 800 sq. miles, which has been defined after careful study, companies the Union Territory of Delhi and the Ring Towns of Loni and Ghaziabad in U.P., Faridabad, Ballabhgarh, bahadurgarh and Gurgaon in Punjab and Narela in Delhi territory. To achieve a rational growth of Delhi which has been expanding in a most haphazard way, it is necessary to plan this whole area as a composite unit and have an integrated and balanced overall programme of development. The metropolitan area has a good deal of homogeneity and physical, socio-economic and cultural unity. This factor makes planning less difficult in spite of political and administrative hurdles. The Ring Towns must be developed not only to deflect some of the population that would otherwise come into Delhi and jeopardize the planned grwoth of Delhi but also to help these towns to grow of urban Delhi, with six Ring Towns, self-contained in matters of work and residential places but with strong economic, social and cultural ties with the central city. This is the only way to prevent the increasing urban sprawl which is threatening to grow into one giant urban mass with its long and senseless commuting to work, substandard services and lack of social cohesion.

The development of the ring towns can be ensured by strengthening their economic base. This has to be done by planning industrial development and locating governmental offices in these towns. Besides hese positive measures of development, there will also have to be the same degree of control of development as there would be in Delhi, so that uniform standards are obtained throughout the area.

The proposals made in the work studies for the Ring Towns are summarised in Table No. 1 and the land requirements have been indicated. In 1951 the total population of these six Ring Towns was 1,25,000. and the projected population for 1981 is 8,42,000. The total requirement of land is 21,300 acres. The projected industrial employment for 1981 is 1,14,000 and the land requirement for industries is estimated at 4,430 acres. Similarly, the employment in government offices for 1981 is 50,000 for which 230 acres are required. However, the precise quantities will be determined by the State Governments concerned when they work out detailed plans for the areas within their jurisdiction.

TABLE 1: Land Requirements in Ring Town 1981

Ring Towns	Population in 1000's`			`Manufacturing l and land		nment Empl nd land - 19		otal land requirements 1981			
		1981	1981	Total workers	Employment density per acre	Land	Total workers	Employment demsotu per acre	Land	Gross	Land acres
1. Ghaziabad	-	44	357	50,000	25	2000	20,000	200	100	50	8,000
2. Faridabad	-	31	285	40,000	30	1330	15,000	250	60	40	7,150
Ballabgarh	-	6	29	3,000	20	150				40	750
3. Gurgaon	-	19	48	5,000	20	250	5,000	250	20	30	1,600
4. Bahadurgarh	-	11	29	4,000	20	200				30	1,000
5. Loni	-	4	23	2,000	20	100				30	800
6. Nerela	-	10	71	10,000	25	400	10,000	200	50	35	2,000
TOTAL		125	842	114,000		4430	50,000		230		21,300

NOTE : Sonepat in the Punjab and Baghpat in U.P. will also require to be developed adequately in relation to the Delhi Metropolitan Area.

Ghaziabad:

The U.P. Government has published a draft plan for Ghaziabad as well as for areas in U.P. contiguous to Delhi-Shahdara. The latter has been incorporated in the Land Use Plan for Delhi Urban Area. The plan for Ghaziabad prepared by the U.P. government is in general agreement with proposals for the Delhi Metropolitan Area indicated here.

Ghaziabad is envisaged as an industrial town with 50,000 workers engaged in manufaturing out of a total population of about 3,57,000 in 1981. It is also proposed to diversify the economic base

with an employment of 20,000 in government offices. The land allocations are 2,000 acres and 200 acres respectively. The total area to be urbanized with adequate land for residential, commercial, parks and other public and semi-public use is about 8,000 acres.

Faridabad - Ballabgarh:

ballabgarh is only 3, miles from the new town of Faridabad Nearby is also the old town of Faridabad. All the three

the Punjab, and the Government of Punjab will have to draw up a master plan for this area. on either side of the Mathura Road which runs through the area. industries are springing up like mushrooms. A master plan to regulate and guide development is long overdue. The Town Planning Organisation had drawn up a tentative plan for the area which can form a guide for the Punjab to follow and prepare a master plan. It is suggested that Faridabad and ballabgarh should have an integrated plan. Like Ghaziabad, Faridabad too will have a strong industrial base with about 43,000 workers engaged in manufacturing, out of a total population of 3,14,000 in 1981. It is also recomended that enough government offices be established here for some 15,000 employees. The total land requirement will be about 7,900 acres while the allocation for manufacturing will be about 1,500 acres and for Government offices about 60 acres. The town can be served by tube wells since it has good underground water potential.

Guraon:

This district town in Punjab is handicapped for want of good water sources and only a modest growth is contemplated. It is proposed to have 5,000 industrial workers out of a total population of 48,000 in 1981. A small industrial estate of 250 acres and another 20 acres to locate Government offices with 5,000 workers would suffice. The total area required for the township is 1,600 acres. No plan has been prepared for this town. The Punjab Government should undertake this work.

Bahadurgarh:

This town also has no source of good water supply. It is expected to have a population of 29,000 in 1981 with a land area of about 1,000 acres. About 200 workers. For this town too, the Punjab Government should prepare a master plan.

Loni:

This small town of just over 4,000 in U.P. is proposed to be developed for a population of 23,000 in 1981. Water can be made available from tube wells. An industrial estate of 100 acres with 2,000 workers will provide the economic base. The U.P. Government has already published a master plan, which is in general agreement with the proposals given here.

Narela:

The proposal to develop Narela as one of the Ringh Towns around Delhi forms a part of the recommendations of the Master Plan for the Delhi Metropolitan Area. It is within the Union Territory of Delhi, near the northern border.

This township is proposed to be developed to absorb 60,000 people by 1981 in addition to its existing 11,000. The development proposals provide for Government offices and industry to make the town a self-contained unit.

The existing settlement of Narela lies about 18 miles north of Delhi and is situated on the Delhi-Ambala Railway, off the Grand Trunk Road, It has good underground water potential.

Important Features:

Narela has the following important featurers:

1. It has an established wholesale mandi dealing in grains, sugar, chilli, jaggery, cotton and oil-seeds.

This mandi requires remodelling to cope with the business activities of the growing town.

2. It has a flourishing manufacturing industry of Persian wheels and agricultural implements which find a market in U.P. and Punjab

- 3. It has large oil crushing mills and the products thereof are sold all over India.
- 4. It has a medium-size vegetable and fruit market.

Area and Population:

The Municipal town of Narela together with the adjacent village of Mamur Pur has an area of 3,372 acres approximately, The settled area of narela town has an area of 83 acres. There is also a refugee colony some four furlongs to the south of the main town which has been planned by the Ministry of Rehabilitation. The Ministry has acquired an area of 40 acres for the colony. The town extends from north to south to about 3/8 mile existing town had a population of 9,597 persons according to the 1951 census. The present population is estimated to be more than 11,000 persons.

Proposals:

The proposed land use plan for Narela takes into consideration the topographical features, existing road pattern, the built-up area and the existing land uses. The natural features of the low lying belt have been used to form a recreational track through the neighborhood pattern. The green space to the east of the exiting settlement will accommodate active community recreation and the social activities of the town. High Schools on the basis of one per 15,000 population have been allocated. Local shopping has been placed within easy access of each sector.

The industrial sector is proposed to be linked by spur connection to the main railway line. The highway pattern has been planned to provide easy ingress and egress for the materials and products from the industrial area. Additional land has been reserved to allow for future expansion of industry. Sectors adjoining industry will house the industrial workers.

The density pattern for the residential areas would meet the varying needs of the immigrant population. The seven sectors provide a gross residential density of 50 to 60 persons per acre.

The sector for Government offices is placed centrally to reduce commutation to the minimum. A peripheral network of roads around this sector will permit free flow of traffic.

Besides the wholesale business in the mandi, Narela will have a central business district where all the commodities could be purchased.

Proposed Land use Plan: NARELA

Broadly the proposed land use plan for Narela includes the fallowing:

			Acres
1. Gross residential area .			1167
(existing residential area)			83
2. Large open areas			263
3. Industrial areas			225
4. Reservation (future industrial).			150
5. Government Offices			50
6. Commercial and Business			35
Population in 1981 .	•	.71,0	00 persons.

When the urbanisation of Delhi reaches its optimum limit in 1981, narela township will be an ideal place for suburban living.

The proposals on pages 3 and 4 in respect of Narala are indicative only and not mandatory.

2. LAND USE PLAN FOR URBAN DELHI.

Characteristics of the Plan:

While the portion of the Master Plan relating to the Metropolitan area will ensure the success of the urban plan by positive development in the Ring Towns and regulatory measures in the intermediate areas, the Land Use Plan for urban Delhi has been conceived to find solutions for the entire complex of inter-related urban problems viz. social, economic and governmental. It may rightly be called a comprehensive plan. Since it aims at balanced and integrated development to take care of present and future growth upto 1981, it is also a long range plan./ It has been kept in scale with the economic needs of its citizens and the financial resources of the nation whose capital it is. By means of public hearings and participation of the people in the making of the plan, it has been drawn up in keeping with community sentiments. It gives an integrated picture of the future city by combining the future land use pattern with a long range programme of community facilities and services, having kept in view the objective of making these functionally related, economically sound and socially desirable.

The Land Use Plan is general. But by the nature of the legislation under which it has been prepared it carries legal sanction and has a certain amount of rigidity, though it can be amended according to law from time to time. There is provision to revise the plan when considered necessary after publication and public hearing. The should be strictly enforced in regard to each kind of development and the proposals in this report are subject to these stipulations. Space standards for community facilities and services stipulated in the Master Plan will govern zonal and sub-division plans. Since the land requirement for the next ten years or so has been notified for acquisition by the Delhi Administration, all future land use can be regulated by the Master Plan and land sub-division controlled by zonal development plans.

Present Reality Basis of Plan:

The Land Use Plan, is in essence, the translation into physical form of the planning policies and principles. The policies have been based on the realities of the present dynamic but rather unregulated and chaotic conditions obtaining in the Metropolis.

To sum up the present situation, haphazard and sub-standard development in the metropolitan area is going on at rapid rate, especially on the highways leading to the capital and to a lesser extent in the Ring Towns. In Delhi, itself, there is great disparity in residential density in the various areas (ranging from 1,000 persons to as low as 15 to the acre) with social, economic and physical barriers between Old and New Delhi. The city has grown rapidly to the south and west making it functionally unbalanced. This has stretched the lines of communication and also made the provision of muicipal services and other facilities, which are so essential for urban living, difficult. There is an acute shortage of housing resulting in extreme overcrowding, congestion and insanitary conditions. This is particularly bad in the Old City where there is almost an absence of community facilities and only sub-standard services are available. There are an estimated 50,000 dwelling units in bustis scattered all over the city. Even the new rehabilitaion colonies are fast deteriorating. There is concentration of government employment centres and shopping areas which has resulted in traffic bottlenecks. At present housing is not related to employment centres and people have to travel long distances to their places of work. The position is aggravated by the absence of an adequate and cheap transportation system. Industry is dotted all over the crowded Old City where it is a source of nuisance. There are also large noxious industries like the slaughter house, and fire hazard trades, like the timber depots, in congested residential areas. There is an undesirable mixing of land uses almost everywhere in the city; residential with shopping and industry; wholesale with retail; business with service industry. Delhi, as a whole, is acutely deficient in parks, schools, other community facilities

and municpal services.

(a) Major Policy Decisions:

One of the major policy decisions, *viz.* of considering urban Delhi as the core of the larger Metropolitan complex has been stated and the necessity of planning and developing the Ring Towns with a sound industrial base and employment in Government offices, with regulatory measures in the intermediate rural areas, has been explained.

The other major policies are stated here. Delhi will continue to be a major government centre. The present central secretariat complex has little room for expansion. Therefore, new sites of adequate size within Urban Delhi must be found to locate the Government offices which have to be essentially in Delhi in order to be in close touch with the ministries. Adequate housing must be made available related to these offices within reasonable distances.

It would be undesirable to increase the proportion of Government employment in the occupational structure of the city. What is required is a balanced economic base for which purpose it would be necessary to encourage the development of permissible industries. it would, however, be unwise to locate large and heavy industries in Delhi, which would, besides posing problems of air pollution, waste disposal, traffic congestion etc., also give an industrial bias to the city which would be undesirable in national capital. Moreover, Delhi does not have enough water supply and power to sustain large scale industries.

Because of its location, Delhi will continue to be a major financial, business, commercial and distribution centre and with the growth of population there would be a proportionate increase in the people employed in trade and commerce which would provide the necessary diversity to the economy. The land requirements for this 6

increasing growth must be provided for in the plan.

There is heavy concentration of population in the Old City which is also closely built up. Since large scale clearance and reconstruction is ruled out as an immediate possibility because of the lack of resources and the low capacity of the people to pay rent, at least the minimum community facilities and services and reasonable means of communication will have to be provided here, which will in a way remove congestion from the area. Employment centres like flatted (multistoreyed) factories will be set up in selected areas to house such small industries as will not cause nuisance to the residential areas, but noxious industries and village like occurpations like dairies, potteries etc. will have to be removed from here. Certaqin areas like the Mata Sundari area which is near the Old City will have to be partly reserved for housing the population from the redevelopment projects to decongest the Old City will have to be partly reserved for housing the population from the redevelopment projects to decongest the Old City. Similarly, the very low density areas of replanned at higher density to make more intensive use of valuable land in the core of the city. Due care must be taken to preserve the most pleasant and unique residential character of these aras.

To meet the large deficit in housing, a programme of development has to be launched in a big way. The present bustidwellers will be provided for in tenements. There will be an increasing number of houses built for government employees and developed land will be made available for both low income and higher income people. To counteract against squatting in bustis, it is proposed to earmark reasonable areas in several zones for the low income group people who migrate to Delhi throughout the year from rural areas. Considering their economic condition, they should be permitted to construct very cheap houses on a proper layout with all the necessary reservations of sites, and the minimum of municipal services provided by public agencies.

Planned growth in the past has been very much hampered by lack of developed land and speculation in land. The stock of land built up by Government when New Delhi was planned proved to be a great stand-by, particularly in settling the large number of displaced people. Very little of that is left now. As a result the prices of developed land have soared up in rencent years and the low and middle income groups have resorted to unauthorized house construction in the absence of developed land within their means. Recognising this and also as matter of major policy, the Government of India has notified for acquisition about 35,000 acres of land all around the present built up area, which will be sufficient for the growth of Delhi according to plan for the next 10 years or so. Steps are also being taken to develop land for industry, commerce, residential uses and community facilities. All this land will remain under public ownership and developed plots or undeveloped land will be leased out to individuals and co-operative societies on an equitable basis, so that the benefit of planned growth accrues to the common man and the Government can also have a share of the future rise in the price of such land. The ownership of land by Government makes planning and the implementation of plans easier and is imperative if slum clearance, redevelopment and subsidised housing and provision of community facilities according to accepted standards have to be undertaken, as, indeed, they must be in Delhi, in a determined way.

These are the planning policies on which the Plan is based. These decisions have been arrived at by the planning authority as a result of the physical and socio-economic studies conducted in preparing the plan. In translating these broad policies into physical form, certain desirable planning principles have been adopted, which would be workable in the Delhi situation. Applying certain space standards for allocation to the various land uses a land pattern was evolved, which is synthesis of the planning principles, to arrive at a comprehensive plan best suited for present needs and the future growth of the capital.

(b) Planning Synthesis:

One of the major principles is that in order to secure balanced development and minimize frictions, decentralization of places of employment and their right relationship with residential areas is necessary.

With this objective, the city has been divided into eight planning divisions which are self-contained in the matter of employment, residential places, recreational areas, shopping and other requirements. These are functional units reflecting their own pattern of development and land use, having certain individual physical characteristics, and social and cultural values. While the Old City is at Present a chaotic mix up of incompatible land uses, New Delhi is lacking in compactness and social cohesion. The plan has allocated land for industry, commerce, living play and other major types of urban land use in the most appropriate location for each use and inter-related to each other so as to produce orderliness and smooth functioning.

A city is a living organism. To create conditions conductive to healthy social living, the heirachy of city structure is built from the bottom upwards. The housing cluster is built round the nursery school and the totlot. The primary school, the high school, the Community centre and the District centre are the order of the functional tiers around which the community structure is built up. The Central Business District, major educational, recreational, cultural and civic centres, will provide the integrating and unifying common interests, will provide the integrating and unifying common interests. Only in a healthy environment life for the common man can become varied, rich and satisfying in the future Metropolis.

While guiding development in new areas along desirable lines those areas that already have a healthy, organic pattern must be conserved

by protecting them from encroachment of undesirable and conflicting land uses. There are certain other areas which must be rehabilitated by improved environmental hygiene and by reconstructing certain deteriorated pockets which will open up areas for providing open spaces and community facilities. Demolition of unusable building and making a new and improved layout may be resorted to in the redevelopment areas. The indentification of the areas as "conservation", "rehabilitation" and "redevelopment", is to be done as a result of physical and socio-economic surveys. These steps are necessary to preserve and enlarge the total capacity of existing housing. Concentrating on new housing without taking these steps to improve the existing ones and protecting new development, is like missing the wood for the trees.

Residential densities in the heart of the city have to be rationalized by eliminating disparities. in developing areas the layout pattern should be efficient to provide for adequate internal circulation and municipal services. Through-traffic should not be permitted to penetrate into residential areas. Adequate areas must be earmarked within close proximity for community facilities like schools, parks, playgrounds, health centres, shopping and other services. The residential uses and should be free from smoke, noise, odour and other nuisances.

The new sites to house Government offices are so located that they have adequate housing nearby, directly accessible from the major traffic arteries, and must be well served by the public transport system.

To secure further decentralization of employment, planned industrial districts are located in right relationship with residential areas. These industries are provided with enough water and power and well served with means of communication like major highways and railroads for efficient movement of goods and workers. Just as residential areas are protected from the harmful effects of industries, they, in their turn, should

be free from non-industrial and other conflicting load uses and should have enough space for future expansion. The industrial areas should have high design and desirable performance standards.

The existing Central Business Districts of connaught Place and Chandni Chowk - Khari Baoli-Sadar bazar must be made more functional with adequate off street parking and loading and ribbon pattern of commercial development and to serve the large increasing population, several district shopping centres have been proposed so as to be within easy reach of each district. These have composite retail and commercial areas with service industries, flatted factories and Government offices to provide employment centres. As already stated, there would be other shopping at lower lavels to cater for the day to day needs of the people.

Self-contained divisions and decentralization of employment centres are necessary if traffic is not to increase to such an extent at the urban core that in the years to come, it would completely paralyse city life necessitating large investment on costly new transportation lines. Thus, the more rational and functional land use pattern proposed, together with a coordinated approach to the traffic problem will result in an improvement of the circulation system. Off-street parking and terminal facilities, grade separation at rail level crossings, improvements of ntersections and enlargement of railway stations, widening some of the existing roads, express cycle tracks and a system of highways linking up Delhi more effectively with the metropolitan area and the region are necessary to handle the increasing traffic.

A system of linked open spaces and district parks has been worked out for the entire urban area of Delhi related to the proposed pattern of residential densities. These district parks are for the higher secondary school age group and for adults. The local parks are for primary school age children and should be within walking distance.

Place of historical interest, natural beauty spots, existing orchard and fruit gardens have to be developed and interconnected by green linkages and smaller local parks penetrating through residential and work areas. Certain natural features like the rive front and the ridge will have to be developed, together with other regional parks to provide active recreation to the people of the whole area.

Similarly, other community facilities like schools, colleges, hospitals etc. should be provided and rationally distributed in the urban area according to the proposed pattern of residential densities.

It is essential to provide an inviolable green belt of agricultural land around the urbanizable land of 1981 to limit the physical growth and to prevent the overspilling of Delhi and its merging with the nearby cities to form one huge consurbation. This will also preserve land under intensive agriculture, unspoilt by undesirable or premature urban growth.

Harmonious growth and orderly functioning are the first steps in evolving an attractive city. But what will stamp it as a beautiful city is its pleasing architecture. This should not be pervade the design of all public and private buildings. Modern industrial buildings in attractively landscaped grounds, pleasing shopping centres, simple and beautifully designed schools and homes and well laid parks can go a long way to raise the city above the humdrum of brick and morrar put together. Well-designed and clean streets and street furniture, with minimum of poles, wires and signs will add to the general sense of attractiveness and spaciousness. if these things are kept in mind, then the appearance of Delhi, as the plan progresses, may well symbolize the life and aspiration of the people who will live there in the coming decades.

PROPOSED WORK CENTRES.

The principle of decentralization of work centrea and its location in functional relationship with housing has been kept in mind in making the Land use Plan. The allocation of land for the employment centres has been made on the basis of the percentage of the working force that would be in the various occupational groups in the projected population of 1981, and the standards for providing working space, parking etc. for the people engaged in industry, commerce, government offices etc.

3. GOVERNMENT OFFICES

It is estimated that there would be 2,62,500 persons working in government offices by 1981 in Urban Delhi, and about 50,000 in the Ring Towns of the Delhi Metropolitan Area. The estimated requirement for land for the latter has been indicated earlier in the chapter. in Urban Delhi at present the Central Secretariat complex and Parliament Street is the main centre of government Offices. indraprastha Estate on mathura Road and Old Secretariat in Civil Lines are subsidiary centres. many other Government offices are located mostly in barracks on Shahjahan Road and other scattered areas. The total area under this use in 1981 will be 912 acres, including 60 acres in District Centres.

Unit Space Standards.

The standard for the development of Government offices has been worked out on a floor area ratio of 150 i.e., for every 100 sq. ft. of land, 150 sq. ft. of floor space will be available. At present most new Government offices are 6 storeys high. The maximum coverage should be 20% including 5% of covered parking. Another 5% of additional coverage may be allowed if the space for covered parking is kept at 10% of the plot

^{*}The F.A.R. is 200 for the Central Secretariat Complex and maximum coverage 30% including 5% covered parking.

area. Out of the remaining 75% of land area, about 50% will be utilized for off-street parking, leaving the rest of the 50% will be devoted to land-scaping, lawns and the necessary the 50% to be devoted to land-scaping, lawns and the necessary set backs from the roads and the adjoining lot lines.

The standard of 50 sq. ft. of carpet area per person followed by the Central Public Works Department has been adopted. Carpet area includes conference room and canteen etc. In most Government office building, the carpet area is half fo. the total floor area since efficiency is only 50 per cent, the other 50 per cent being in corridors, bathrooms stores etc. Hence the gross floor area per person is 100 sq. ft. This means that in one acre of land, with a floor area ratio of 150and at 100 sq. ft. of floor space per person, about 650 persons can be accommodated. But as discussed in the chapter on Government in the work studies there is likelihood of higher standards of space utilization when work becomes more mechanized and productivity of government employees increases. This may be only partially offset by more efficient building design. Considering these factors, it is proposed that the employment density be assumed at 450 to 300 persons per acre depending on central or suburban location.

Parking Standards

Parking standards are based on the present situation and may require modification when the pattern of the modes of travel changes. Now 8% of the total number of employees come by car, 2% by motor cycles and scooters, 60% by cycles and remaining 30% by public vehicles. Space for parking*, is based on this break up, which means that a building with a carpet area of 1,00,000 sq. ft. accommodating 2,000

persons at persons at 50 sq. / person will require 1.25 acres of parking space to hold 160 cars, 40 motor cycles and 1,560 bicyles. Thus the ratio of carpet area to parking area works out to 100:54.

Land Allocation.

The following sites which have Government offices will be developed to their optimum capacity.

Loca	tion		Acres
1. Central Secretariat Complex			201
2. Parliament Street .			36
3. U.P.S.C. on Shahjahan Road			10.
4. Indraprastha Estate .			61

Proposals.

Central Secretariat Complex will ultimately have about 200 acres under Government Offices. After meeting the requirements of an office building for the Ministry of External Affairs, the remaining area in Block 32, south of South Block, should cater for the loading and unloading of passengers and parking of vehicles.

Very little area is now available for new Government offices of Parliament Street.

Indraprastha Estate too has been built up almost to its maximum capacity.

Old Secretariat site must be redeveloped to its optimum capacity. At present it has single storeyed office accommodation.

It is proposed to expand the Delhi Administration Offices in Civil Lines to a total of 10 acres. The New Courts at Tishazari are almost fully developed.

Land has been allocated for a Circuit bench of the High Court near the Supreme Court which is already functioning near Hardinge Bridge.

The headquarters of the Municipal Corporation will be housed in a 15 acre site forming the new Civic Centre. This is opposite the Ram Lila Grounds on Circular road and Minto Road. The zonal offices of the Corporation will be in the District Centres.

A large number of Government offices located in barracks, chiefly on Shahjahan Road have to be relocated in the new sites listed above, which will also have to be relocated in the new sites listed above, which will also have new offices. The areas where they stand at present have to be redeveloped for housing since they are basically good residential areas. These measures will bring more employees to live nearer the Central Secretariat and take other government offices near the place of residence of the employees.

The Union Public Service commission office will continue on Shahjahan Road and some more land has been earmarked for its expansion as shown in plan.

Transit office accommodation will be provided by Government in an area of about 50 acres within the 1,100 acres scheme south of Ring Road in order to replace temporary barrack office accommodation by

permanent office building.

Foreign Missions are located in Chanakyapuri. Some State governments have their officers and guest houses in this area.

4. COMMERCIALAREAS

General Business and commercial*.

Chandni Chowk-Khari Baoli-Sadar bazar will continue to be the Central Business District of Delhi. General business and commercial activity will, in fact extend to the whole Complex which includes, Nai Sarak, Chawri bazar, Kashmeri Gate, Faiz bazar and Asaf Ali Road. Some of these areas will undergo gradual redevelopment in order to be able to rretain their present gradual redevelopment in order to be able to retain their present supreme position in the commercial activity of the Delhi Metropolitan Area. This redevelopment, which will also involve at least temporary displacement of many families living in these areas, should form part of the overall redevelopment proposals of the Old City. The precise location of commercial areas in the Old City will be shown when detailed re-development plans are made.

Connaught Place is the other Centrasl Business District of the Capital. Commmercial development has taken place along Parliament Street in recent years. It has been found that the comme4cial are available is not sufficient to meeet the growing need for central location of offices and retail trade. Hence, it is recommended to extend the commercial area upto Keeling Road and the proposed overbridge over the railway. No piecemeal commercial development should be allowed in this area but it should be part of an overall detailed plan, to ensure adequate traffice circulation, parking requirements, water, drainage, power and other 12.

facilities.

Commercial land is also reserved on Minto Road and Ranjit Singh Road, so as to form a link with the commercial area on Asaf Ali road and the Old City. Due to the unfavourable location of Kamla Market (it is also poorly planned), it is suggested that the commercial establishments be shifted to the proposed commercial area on Minto Road and the site should ultimately be converted into a recreational area. The Ram Lila Grounds will then stretch from Delhi Gate to Ajamerer Gate and will be a major lung for the Old City.

A Sub-Central Business District is already functioning along Ajmal Khan Road and Ghaffar Market in Karol Bagh. it is proposed to extend this commercial area to have altogether 42 acres, as shown in the Plan. East of Ajmal Khan Road the existing retail trade will be retained.

Another Sub-Central Business District that needs developing is in Shahdara which in 1981 will have more than 7,00,000 south of Old Shahdara town be provided. This should have a separate wholesale area, transport terminals and other facilities which should be carefully worked out in a detailed plan.

District Centres.

In Order to decentralize commercial activity, it is proposed to develop 15 District Centres in the outlying Planning Divisions. These will provide within easy travelling distance all the facilities for every 1.5 to 2.5 lakhs of population. They are composite centres and will have retail shopping, general business, commercial and professional offices, forwarding and booking and local Government offices, cinemas, restaurants and other places of entertainment. They will have work - cum

industrial centres (flatted) with small scale and light manufacturing, repair shops and service industries. Some of the District Centres will also have Central Government offices. All of these will have to be part of a phased development according to detailed plans which will also take care of all kinds of transport facilities. Hospitals, colleges and parks are also planned in proximity to these District Centres so that each district is self-contained for most facilities and amenities.

In addition to District Centres, 13 Sub-District Centres are shown. Some of them are existing at present like Gole Market, Khan Market etc., which are mostly retail in character and serve the day to day needs of the people. In outlying areas these are located near railway stations and road crossings which are natural sites for the growth of such activity.

Wholesale Markets.

There is a need to relocate some of the wholesale markets and generally to separate wholesaling from relating activity. The wholesale markets must be well planned to avoid the chaotic traffic conditions now prevailing in these markets.

1. Fruit and Vegetable Markets.

The market for wholesaling of fruits and vegetables may be reconstructed in due course at the present Subzimandi site and the retail trade removed to retail markets all over the city. An-other site for wholesale business in fruits and vegetables should be located near the Daya Basti Railway Station in Saral Rohilla . A third is recommended near Okhla railway station.

					Acres
Subzimandi				•	10
Sarai Rohilla	•				6
Okhla	ě		·		19
		TOTAL			35

2. Food Grain Market.

Offices of wholesale dealers in food grains may continue on the G.B. Road and in Naya Bazar. But some of these may also be located in the Teliwara area when it is properly re-developed. However, storage of food grains should take place only in areas earmarked for the purpose in the Plan. Retail traders in food grains may continue in Naya Bazar and G.B. Road.

3. Foddar Market.

This is retained near Daya Basti on Najafgarh Road.

4. Cloth Market

Wholesaling of this commodity, must be rehoused in a modernized market in about a 10 acre site, west of Church Mission Road. Then, some of the trade now housed in Katras elsewhere in and around Chandni Chowk can also be accommodated here.

5. Bicycle Market.

Wholesaling in this commodity now located in the Jama Masjid area should be relocated in the Jhandewalan commercial area. The present site should be cleared of this trade and the road access between Chandni Chowk and Jama Masjid improved.

6. Dry Fruit Market

This will continue in its present location off Church Mission Road and may be adequately enlarged.

7. Hosiery and General Market

This will continue in Sadar Bazar-Old Bahadurgarh Road. It needs improvement and floor space has to be substantially increased for the expansion of the wholesale trade. Land allocation for wholesale markets is as follows:

Whole sale Markets*							Acres
Fruits and vegetable							35
Food grain .							15
Cloth .							10
Dry fruit .							2
Hosiery and general							61
Foddar Market							6
		TOT	ΆL				129

^{*}The bicycle wholesale market has not been shown separately as a wholesale commercial market in the Plan but forms part of the commercial area in Jhandewalan.

Timber, cement, iron and building material and oil wholesaling and storage.

The timber trade now located on either sides of Desh Bandhu Gupta Road (Original Road) and in Teliwara should be removed as it constitutes a fire hazard and causes traffic bottlenecks. Timber yards and depots should be relocated in West Delhi adjacent to the railway line to Rewari in about a 50 acre site. However, retail trade in bamboos, wooden scantlings for charpoys etc. required for daily use may be allowed in Teliwara and Desh Bandhu Gupta Road subject to limited stocks.

Further, in order to decentralize the trade dealing with iron and steel, suitable sites may be earmarked in each of the large industrial zones. Some of the junk and scrap metal dealers using a large amount of space should be relocated in one of the iron and steel trade areas in the industial zone stated above. Only about 15 acres of land should be allotted in the Motia Khan area for reorganizing some of the small scrap metal and junk dealers now spread out in this area.

Similarly, four sites of about 50 acres each may be allotted for the building material trade and storage in the industrial zones. This is in addition to that reserved for the iron and steel trade.

Some area along Mathura Road has been earmarked for small warehouses.

Oil Storage depots.

There are located on Rohtak Road and will continue there. Additional land has been earmarked near Nangloi railway station. Sites have also been indicated neer Palam railway station and in Shahdara.

Grain Storage.

Storage of grain will take place in the storage areas shown in the Plan

Mineral Siding.

Sites for mineral sidings of the railways have been shown in the storage areas near the Tughlakabad Marshalling Yard, near Azadpur and on the Railway Line to Rewari. One large mineral siding has been proposed in U.P., contiguous to Shahdara to serve the whole of the urban area to the east of the Yamuna. The proposed sites are so located that they will conveniently serve all parts of the urban area.

Local Shopping:

Only District Centres and Sub-District Centres are shown in the Land Use Plan. Shopping facilities would also have to be provided at various tiers of the residential area. These should be shown in the local development plans. The standard of one shop for 150 persons has been adopted for the entire urban population and then distributed at various levels as shown below. In doing so, an estimate has been made of

*This does not include sites required for iron and steel trade and building materials trade, which will take in all 400 acres in industrial zones. Also not included is the 15 acre site in Motia Khan reserved for a Junk market

the amount of money the community will spend in the purchase of commodities in the different classes of business centres. Roughly speaking, about 20% will be spent in the District Centres, 30% in Community Centres, 18% in the Residential Planning Area Centres and about 15% in the "Convenience Shopping" in the Residential Units. The balance, it is estimated, will be spent in the Central and Sub-Central Business Districts. The latter will, naturally, also cater for areas outside Delhi.

Location	Population and Sales	No. of shops
General Business Districts Sub-Central Business. Districts.	Entire urban pop- ulation	Not estimate
1. District Centres .	1.5 to 2.5 lakh population.	One centre of 200 to 350 shops each.
2. Community Centres	400,000 to 50,000 population	80 to 100 shops each
3. Residential Planning Area Centres.	12,000 to 15,000 population.	15 to 20 shops each
4. Residential units (convenience shopping)	3,500 to 5,000 population.	4 to 6 shops each

Land Allocation for commercial Use.

The quantity of land allocated for commercial centres at local level for various densities is given in the Sub-Division Regulations.

On an average 1% of the residential land is required for retail and commercial establishments at the local level, which means less than 0.5% of the total area since residential use is only 40% of the total. The major commercial areas, excluding ware-housing and mineral sidings, occupy

1.4% of the total area, giving a total of 1.9% of the total area, giving a total of 1.9% of the total area under all commercial activities.

5. INDUSTRY AND MANUFACTURING

The component of the working force that will be engaged in industry and manufacturing in 1981 is estimated at 4,40,300 in Urban Delhi and 1,14,700 in the Ring Towns of the Delhi Metropolitan Area. Land allocation for the latter has been made as stated in the first part of this chapter. Here proposals for industry in the urban area are made.*

There are only tow existing planned industrial districts in Delhi. One is along the Najafgarh road developed by the type of manufacturing units like D.C.M. Chemicals and intensive is a small scale industrial estate near Okhla developed by the Government of India. The rest of the existing industries are Use Survey and Analysis in the work studies. Most of these industries require relocation.

A-Flatted Factories:

In order to provide work centres within walking distance of the existing concentration of population in the central areas, it is proposed to have "flatted factories", These are multi-storeyed building with high density employment ratio which can house many of the small industries that at present operate in commercial areas, as in Kamla Market.

Unit Space Standards:

The standard for the development of flatted factories has been worked out on the basis of 200 to 300 workers per acre. The

floor space per worker has been taken on an average of 150 sq. ft. per employee. It is recommended that floor area ratio of 150, building efficiency of 65%, and a maximum coverage of 40% of the plot area should be adopted. The rest of the area is available for parking, unloading and for landscaping the site. The structures should not exceed six storeys. Basements will be permitted for parking, servicing and storage only.

Proposals.

Areas are suggested below for the location of flatted factories in the central area of Delhi, the number depending upon local factories in each area. No site should be less than one acre in area.

A	reas						A	cres
1. * Ajmere Gates .								10
2. Thompson Road								16
3. Motia Khan .								43
4. D.C.M. Site .								27
5. Roshanara Road								13
6. Birla Mill Site on	G.T.R	Road						40
7. *G.B. Road .								10
8. Mori Gate .								2
9. Connaught Place	near S	hank	ar N	I ark	et .			10
10. Sarai Rohilla .								11
11. Near Gulabi Baş	gh .							10
Т	OTAL	٠.					_	192

^{*} These sites have not been shown in the Land Use Plan but they should be carefully selected and located while working out the detailed plans for these areas.

 $[\]ast$ Floor area ratio, coverage, set-back etc. for various types of Industries are given in detail under the Zoning Regulations

Thompson Road Site.

First priority should be given here for the small industries located at present in Kamla Market.

Motia Khan Site.

First priority will have to be given to the industries now located haphazardly in this area.

D.C.M. Site.

The Delh Cloth Mills have to move out of this congested area to the extensive industrial districts according to the time schedules give for non-conforming uses. The present site should be developed for flatted factories in gradual stages to relocate the industries now located in Ahata Kidara and other areas.

Roshnara Road Area.

The area should be developed over a period of years. A beginning can be made with one or two sites.

Birla Mill Site.

Birla Mills will have to move out according to time schedule for non-conforming uses. This site too should be developed for flatted factories in stages.

Mori Gate Site.

This site should be developed to relocate the small industries now near Kashmere Gate and Mori Gate.

Site near Shankar Market

Part of this is now residential. First priority may be given to the industries in Shankar Market and Connaught Place where they are at present causing nuisance.

18

Master Plaln for Delhi :-1-9-62 Source - DDA

Sarai Rohilla.

This may be developed to house the scattered industries in the residential areas.

Site near Gulabi Bagh:

First priority may be given to the industries in Rana Pratap Bagh and Shakti Nagar.

In all sites, first priority must also be given to those small industries which have to be relocated from the Old City where the problem of nuisance and congestion is most acute.

B- Industrial -cum-work Centres: (In District Centres and in outlying areas listed below).

While the flatted factories will be located in central areas, the work centres will be in outlying residential areas. These will be mostly in community centres and district centres. no nuisance industries will be allowed and the intensity of use will be less than in flatted factories. The idea is to provide for house-hold manufacturing units which otherwise would spoin the residential character of the neighbourhood. The concept of flatted factories as well as of work centres is fully discussed in the chapter on "INDUSTRY & MANUFACTURING" in the work Studies.

Unit Spcae Standards:

A standard of 200 workers per acre with about 200 sq. ft. of floor space per worker, maximum number of storys limited to ten, with a floor area ratio of 120 and a maximum coverage of 33-1/3% should be attempted. Suitable areas must be reserved for parking. loading and unloading.

Location	Acres		
* Eleven hundred acre housing scheme District Centre .		10	
* Kalkaji District Centre		15	
*West Delhi District Centre (North of Rajouri Gardens).		10	
* Khyber pass District Centre		5	
*Ranjit Nagar Scheme		10	
* Ring Road - Mathura Road and Railway line triangle.		16	
*Kotla Mabarakpur		4	
* Shahdara Central Business District		15	
* Shahdara between G.T. Road and Railway line		18	
*Okhla		45	
** Jhilmila		5	
North of Tehar Jail		15	
TOTAL		168	

The site comprising the triangle formed by Ring Road-Mathura Road and Railway line is at present occupied by sub-standard rersidences. This is a very good site for an industrial centre and should be developed at a convenient date.

C. Special Industries:

An area of 103 acres has been shown south of the Engineering College for such industries which will assemble precision instruments without causing any nuisance (like smoke, noise, foul odour, etc.). Research and training facilities should also be permitted.

D-Light Industrial and Service industries.

These are generally small scale, non-nuisance industries that can operate near built-up areas with rigid enforcement of factory regulations. Their location is such that if proper performance standards are not enforced, the dust and smoke emitting from the industries are likely to cause nuisance to the residential areas because of the prevailing wind direction. Land is allotted for these industries also in the north and west because of the need of providing work places and service industries in all planning divisions even though the prevailing wind direction is unfavourable. This makes it necessary to have only such industries for which it is possible to enforce a high performance standard. An illustrative list of the industries is given in this report.

While areas have been earmarked for various kinds of industrial uses, it appears necessary that in some of these areas some public authority should develop land itself and construct industrial estates where work space can be rented out to the smaller units who may other wise find it beyond their means to take out on lease even the minimus size plot in the various industrial areas and put uup constructions of their own there. This is the only way in which those small industies which are unsuitable for operation in flatted factories can be suitably re-located in the process of elimination of non-conforming uses in the city and new small industries helped to establish themselves. It is obvious that if assistance to the needy ones has to be effective in this matter, these estates should be built up in comparatively central areas.

The existing Hindustan Housing Factory with the necessary extension together with any new line of manufacture of building materials and the existing hume Pipe Factory may continue in the present industrial area without limitation on the size of the area and the number of workers. These should also be no objection to establishing any other Housing factory under similar conditions in the appropriate industrial zones in other parts of Delhi. Other factories which may be established for the ma-

 $^{{\}rm *These}\ sites\ are\ an\ integral\ part\ of\ the\ District\ Centres\ and\ have\ not\ been\ shown\ separately\ as\ industrial\ centres\ in\ Land\ Use\ Plan.$

^{**} These sites are part of the residential neighbourhood and should be located in community centres while making zonal plans of the area.

The other sites are shown in the Land use Plan.

-nufacture of building components required for development of land or for building construction or for seasoning of timber may also be allowed to be established in Delhi.

Unit Space Standards:

The optimum use of the space will be possible if an employment density of 30 to 50 per gross acre and a building efficency of 80% is achieved and not more than 25 per cent of the area is kept under streets and 10% is kept in common facilities.

The plot area should not be less than 400 sq. yds. with a maximum of 2 acres. In special cased, larger plots upto 7 acres may be allowed. The floor area ratio and coverage is given in the Zoning Regulations.

Proposals:

The following allocation is made for light industry and service industry:

Location				A	cres	
Hindustan Housing Factory .						54
Okhla Industrial area (two sites)						164
Kalkaji (two sites)						8
On Mathura Road (three sites).						169

*Near Tilak Nagr .								5
Najafgarh Road .								65
	TO	TAL						1,583

The area to be developed near Anand Parbat, off New Rohtak Road, should be reserved for the industries to be re-located from the area to be cleared on New Rohtak Road. If this area is insufficient, some of the industries may be accommodated in the industrial areas in Sarai Rohilla and on Lawrence Road.

Industries which have to be re-located, either because they are non-conforming in their present sites or for some other reason, should be allowed to establish themselves in any area meant for 'light" and "extensive" industries, provided they are not obnoxious. The latter will have to be located in areas specifically designated for the purpose.

E-Extensive Industries:

As a matter of general policy, large scale and heavy industries should not be encouraged in urban Delhi. This matter has been fully discussed in the Chapter on Industry and Manufacturing in the work studies. All the noxious industries which are now located in residential areas should be re-located in areas meant for extensive industries.

It has already been recommended that the trades ancillary to the slaughter house now located in the Old City should be sifted to a new site on Rohtak Road beyond the oil store depot, adjacent to Multan Nagar.

The alternatives of either modernising the slaughter house at the present spot or relocating it in an industrial area would have to be studied further.

Unit Space Standards:

The number of workers proposed is 25 to 30 workers per gross acre. An attempt should be made to ensure that twentyfive per cent of the project area is in streets and common facilities, and a building efficiency of 80% is achieved. Development will be mostly in single storey and coverage and floor area ratio are given in the Zoning Regulations.

Industries using less than one acre can by no means be termed extensive. But certain noxious Industries even if they are small scale, will have to go into areas for extensive industries because they should not be located near residential areas.

The following sites should be used for extensive industries: -

Location									
1. South of Okhla near Marshalling Yard					908				
2. Najafgarh Road area					369				
3. Between Rly. line to Rewari and new Industrial road					331				
4. Between Rohtak Road and Rly. line to Rohtak					194				
5. North of Rly. line to Rohtak					469				
6. Azadpur north of Ringh Road					410				
7. Shadara between new Rly. line and new highway.					919				
TOTAL					3,600				

All the major industrial areas have been located keeping in view rail and road facilities. They are mostly separated from residential areas and have scope for some expansion. if required, after the plan period.

F- Extrative and Allied Industries:

Mining and Pottery Area

The area near Mehpalpur is rich in pottery clay and a site of 357 acres has been earmarked for mining. It is also recommented that pottery factories utilizing local raw material may be allowed to be set up i9n special area marked in the Land use Plan. Sanction to layout etc. will have to be taken from the Delhi Muncipal Corporation which in according the sanction may impose such conditions as might be considered necessary in the interest of the conditions as might be condidered necessary in the interest of the proper development of the area. This will be of the extensive type and is about 106 acres.

Lime and brick kilns

It is not desirable to have these within the areas to be urbanised in the future. Hence it is recommended that these be located half a mile away from the urbanisable limits of 1981/ Also the removal of clay should be controlled. There should be no excavation at all for this purpose within half a mile of the greens belt from the urbanisable limit but beyond it, excavations might be allowed upto a depth of 8 feet.

The shifting of lime and brick kilns outside the urbanisable limits of Delhi should be arranged according to a phased programme of utilising the existing kiln sites for progressive urbanisation.

Stone quarries and crushing

These should be beyond a distance of one mile from the urbanisable limits of 1981.

The removal of rock from selected places within the urbanisable area will be permitted under controlled conditions.

Stone quarrying in the Anand Parbat area may continue till may 1964, under controlled conditions as a non-conforming use. This iis to give time for the authorities to provide cheap housing for the labour (that

would be displaced as a result of discontinuing their operation) in residential area not very far removed from the quarrying sites in south and north Delhi. The crushers should be removed from the Anand Parbat area as they cause a great deal of nuisance.

Warehousing and Storage for industry.

The proposal regarding commercial warehousing is given fully under "Commercial". Suffice it to mention here that in every large industrial zone, approximately 50 area of land should be reserved for the storage and fabrication of iron and steel and another 50 acres for the storage of building materials, in order to decentralize these activities.

Case of Industries outside the urbanizable limits of 1981. One is the Hindustan Wagon Factory near Nangloi of about 12.5 acres. The other on Mathura Road on the Delhi-Punjab border is the Hindustan Pipe Corporation of 2.3 acres. These may continue but should not be allowed to extend beyond existing area.

Total Land Allocation for Industries and Manufacturing.

Туре				Acres
1. Flatted factories				192
2. Work-cum-industrial centres				169
3. Special industries				103
4. Light manufacturing & service industries				1,583
5. Extensive industries				3,600
6. Pottery industry				106
TOTAL			. –	5,753

The land under existing industries of all kinds is less than 1,000 acres at present, whereas in the Plan, a total area of about 5,800 acres has been provided. There will, of course, be an additional are of about 2,800 acres under industries in U.P. to the east of Shahdara. In addition to all this, land for industries, altogether about 1,000 acres, has also been provides in Narela and other rural areas of Delhi Territory.

Thus about 5% of the total developed area of urban Delhi in 1981 is allocated for industrial use. This is in recognition of the place of industry in the balanced economy of Delhi. At present only about 1.6% of the total area is under industries and it is scattered all over the city, besides in one or two organized industrial districts. The quantity of industrial land available has been totally inadequate and manner of their location highly objectionable. The new areas must be efficiently developed and the nonconforming units in densely populated areas speedily relocated in these planned industrial zones. In this way working conditions which are hopelessly acute will greatly improve.

*6. RESIDENTIAL AREAS

One of the main objectives of the pln is to relate residential areas to the centres of employment in Government offices, industrial and commercial areas, so that the journey to work and back is kept to the minimum within the bounds of healthy living. With this in view, a rational pattern of residential densities is proposed which will correct the present disparities and imbalances. Higher densities are proposed nearer to the work areas so as to have the maximum number of people living around them. Lower densities are suggested as the city extends towards its outer limits. Development during the last two decades has apparently been on the opposite principle resulting in traffic problems, inconvenience to the low income groups and congestion in presently central areas.

*Refer Para I(i) of Notification No. K-1201 6(1)/76-Part II dated 22.12.1976 and No. K-12016(1)/72 UDI dated 17.8.1977

*Zoning Regulations and Sub-Division Regulations inchapter II will secure these densities in desirable manner.

The old city of Shahjahanabad has at present a gross density of about 350 persons per acre with narrow streets and hardly any community facilities. This has led to unhealthy living conditions and functional obsolescence. While for various reasons, large scale clearance and reconstruction may not be possible in the immediate future, the widening of some of the more crucial roads has been proposed so as to facilitate easier flow of traffic. This will require demolition of buildings and the displaced families will have to be rehoused elsewhere but not too far away from the present location. Vacant plots as well as dilapidated structures will have to be acquired and the minimum of community facilities like schools, parks, health centres, etc., will have to be built for a gross residential density of 250 persons per acre. Persons displaced as a result of this also have to be relocated. Village-like trades and industries (viz. keeping milch cattle, pottery, tannery etc.) will also be moved out of the city to urban villages.

New Darya Ganj which has been developed at a density of 200 persons per acre needs conservation measures to preserve its good residential character. The other parts of the Old City require rehabilitation and redevelopment in order preserve and improve the present housing at a gross residential density of 250 persons per acre. The same measures are in fact required for areas like Malkaganj, Aryapura, Sadar Bazar, Manak Pura, Motia Khan, Qadam Sharif and Pahar Ganj which will have a gross residential density of 200-250 persons per acre as shown in the Plan.

In order to achieve this density in th above mentioned areas. It becomes essential to earmark certain other areas, which are at present ripe for redevelopment, for the relocation of persons displaced from their present homes. One such area is the Mata Sundri area, which is between the congested Old City and the important commercial area of Connaught Place and its proposed future extension. It has at present a density of about

40 persons per acre. This area should be comprehensively redeveloped with the necessary services to serve a density of 200 persons per acre for two purposes, namely, for housing Government servants working in the neighbourhood and for housing persons displaced from neighbouring congested areas. Saral Roilla and Shadipur-Khampur are at present under substandard development. These two areas should also be redeveloped at 200 persons pet acre for similar reasons.

If as a result of actual preparation of composite layout plans consisting of two-storeyed one of two -roomed tenements and double or multi-storeyed larger sized units for areas like Mata Sundari, Sarai Rohilla, etc. It is found that it is not at all possible to achieve the density figure of 200 persons per acre (with the permissible variation of 15 per cent), Government of India Press should ultimatetly be relocated from its present position.

Some of the other low density areas in the core of the city are Curzon Road, Parliament Street, and gole Market Planning Area, where the present density ranges from 50 to 75 persons per acre. This is one of the most valuable residential areas located in proximity to the important and major employment centres of Central Secretariat. Parliament Street, Connaught Place and Indraprastha Estate. Population pressure, traffic and transportation considerations, land value etc. point to the fact that these areas should be put to more intensive use. The Gole Market Area is ripe for redevelopment . Hence it is strongly recommended that these areas be comprehensively redveloped to an optimum desirable residential density of 150 persons per acre.

South of the Central Vista, in the Akbar Road area, the density is at present 20 to 25 persons per acre with large bungalow plots. This is a most pleasant area but uneconomical to maintain. It is recommended that

without in any way spoiling the most desirable features of this area, the density should be raised to 75 persons per acre. This can be done by judicious planning of some high-rise apartment houses and the provision of sites for schools, health centres etc.

In the area bounded by Pandara Road and Shahjahan Road the density proposed is also 75 persons per acre since this is the present pattern of development on Pandara Road. It is recommended that the temporary hutments along Shahjahan Road be demolished, thus making available additional area for residential development near the work centre of the Central Secretariat. Care should be taken to meet the entire requirements of community facilities for the neighbourhood. (All offices in this area except those of the Union Public Service Commission are to be shifted as detailed under the Section on "Government"). In the Ratendone Road, Lodi Estate, Golf Links, Kaka Nagar and Sundar Nagar areas, the existing densities of 50 to 60 persons per acre are retained and so indicated in the Plan.

*Between the Inner Ring Road and the Ring Road the existing densities are about 75 to 100 persons per acre and should be so maintained. South of the Ring road also the same pattern of 75 to 100 persons is recommended; however, north of Badarpur Road which is the southern boundary of the urban limits of 1981, a lower density of 60 persons per acre is suggested. Near Kalkajo, however, higher densities of 100 to 150 persons per acre have been proposed since it si nearest to the Okhla Industrial Area. It is proposed to keep the 25 persons per acre density west of Mathura Road in Friend's Colony, whereas for the areas east of Mathura Road a density of 50 persons per acre is proposed. No residential development should take place south of Okhla Sewage Farm since it is undesirable to have a residential area there.

Another low density residential area is the Teen Murti Area near the Prime Minister's house, where the existing pattern of 25 persons per acre should be maintained. Chanakyapuri, Kitchner Road, Moti Bagh I (north of Ring Road) are already being developed at 50 persons per acre though Moti Bagh II (South of Ring Road) has been developed at 100 persons per acre. The Government is developing the 1,100 Acres Schemes south of Ring Road on densities of 75 to 100 persons per acre. The area south of it, which is at the southern end of the urban limit of 1981, should be developed at a lower density-50 to 75 persons per acre.

In Civil Lines, it is essential to preserve the pleasant character of Rajpur Road and Alipur Road areas. Hence by judicious planning, the densities may be raised from 25 persons to 50-75 persons per acre as shown in the Plan, with adequate areas earmarked for community facilities. There should be an overall plan for this area and piecemeal subdivision should not be allowed. The recently developed areas of Shakti Nagar, Roop Nagar, Kamla Nagar, Jawahar Nagar etc. have an average density of 150 persons per acre and the same may be maintained. Similarly, for Rana Pratap Bagh, Vijay Nagar and Model Town the existing pattern of 100 persons per acre is to be maintained and extended to the nearby new areas. kingsway Camp area has been proposed to be redeveloped at a graded density of 75 to 50 persons per acre as the National Highway Bypass is approached. The northern portion of this is subject to waterlogging and should be developed only after adequate drainage arrangement have been carried out.

*In the north-west, at present almost the entire area is rural in character with some good orchards. It is proposed to have intensive development for areas that are nearest to the city as they are not more than 4 miles from the densely populated Old City and should help in relieving some of the congestion there. The densities proposed are 150 persons near Andha Mughal, and 125 to 100 persons on both sides of the Ring Road. More open development with densities ranging from 75 to 50 persons is proposed in the outer periphery. However, areas nearer the railway lines to

^{*} Refer Paras I (ii), (iii) and (iv) of Notification No. K-12016(1)/76-Pt II dated 22-12-1976 and No. K-12016(1)/72 UDI dated 17-8-1977

Rohtak and Ambala will have higher densities, so that the maximum number of people will travel minimum distances to get to work. Many of the large existing orchards have been retained as District Parks and may be preserved and maintained as orchards by public agencies or leased to cooperatives and individuals. Also in making detailed layout plans care should be taken to include as much as possible of the existing orchards for local parks. Since it takes many years to landscape a park with trees, it is essential to make the best use fo these trees.

In the west, Karol Bagh has reached the limits of its development and has 200 persons per acre. Dev Nagar and Rajinder Nagar have been developed at 150 persons per acre. In East and West Patel Nagar and New Rajinder Nagar the existing densities of 100 to 150 persons per acre are to be maintained.

*The density is between 100 to 150 persons per acre west of Delhi-jaipur railway line and near the industrial areas. It is proposed to have lower densities of 100 to 75 persons per acre along the Najafgarh Road as the development extends further from the major employment centre. This density is 60 on the periphery of the urban limits. Again, along Rohtak Road proportionately higher densities of 100 fo 75 persons per acre are proposed since it is closer to the proposed Rohtak Road Industrial Area. but further out this density is gradually reduced to 50 persons per acre.

*Across the Yamuna, Shahdara is proposed to be developed as a complete new city of over 7,00,000 population. At present Shahdara has very bad drainage and though only 2 or 3 miles from both the crowded Old City and New Delhi, has only the Railway-*cum*-Road bridge as a connecting link. This is a terrific bottleneck. Taking advantage of the

Wazirabad barrage in the north over which a road is being constructed. and the proposed highway bridge opposite Humayum's Tomb and the proposed Railway bridge opposite Purana Qila, it is proposed to have a more or less self contained development in Shahdara with industries. commercial and government office areas and the component of residential areas. The marginal bunds both in the north and south along the Yamuna should be considerably strengthened so that there is no danger of floods from the river. Also it cannot be over emphasized that an overall drainage system should be worked out before any large scale development is attempted, to avoid the danger of water-logging that any piecemeal development will entail. Adequate drainage arrangements must be made while building the proposed railway line and the national highways in Shahdara.

*High densities of 125 to 150 persons are proposed in south Shahdara in proximity to the proposed industrial and commercial areas. in other areas 100 to 75 densities are proposed. North of G.T. Road, 100 persons per acre is recommended for areas adjoining the road. As the development reaches the Delhi-U.P. border and the northern highway bypass, the densities proposed are 75 to 60 persons per acre.

Planning Divisions.

In the Chapter "Land Use Survey and Analysis" of the work studies it has been fully discussed why for Planning purposed Urban Delhi upto its proposed 1981 limits, has been divided into eight Planning Divisions. These are envisaged, more or less, as self-contained areas as regards work places, residential accommodation, recreation, shopping etc. The population and residential areas for each Division by 1981 are

^{*} Refer Paras I (II), (III) and (iv) of Notification No. K-12016(i)/76-Pt II dated 22-12-1976 and No. K-12016(i)/72 UDI dated 17-8-1977

proposed to be as follows:

		Pla	nning	g Divis	ions	Proposed 1981 Population	Residential area (acrea)
A	Old City					3,22,600	1,370
В	City Extension					3,98,200	2,590
C	Civil Lines					3,55,200	3,480

			TC	TAL*	* .	45,85,800	47,360

7. DEVELOPMENT ZONES.

For purposes of collection and analysis of socio-economic and physical data for the built up area, the urban area was further sub-divided into Planning Areas and Planning Units. These were tested to find out the size of a workable unit. As a result of this study, it was found that whereas in the Old City due to the intensive development and the enormous nature of the planning problems, such as conservation, rehabilitation and the planning problems, such as conservation, rehabilitation and redevelopment, it is necessary to take similar workable areas for planning purposes; in other areas like New Delhi, South Delhi etc. large areas could be taken. In virgin land still larger areas, have to be taken. Many considerations have gone into the delimitation of the boundaries of these

*The figures against West Delhi do not include the Cantonment Area, it is estimated that the population of the Cantonment Area would be around 1,00,000 in 1981.

Master Plaln for Delhi :-1-9-62 Source - DDA

26

units. The result has been the drawing up of 136 Development Zones for the Whole of urban Delhi as shown in the map Development Zones. The manner of their development for newly developing areas is laid down in Chapter II under "Sub-Division Regulations" and all new developments shall take place according to Zonal Development Plans.

Zonal Development Plans for the Old City.

While the problem of preparation of Zonal Development Plans for new areas is comparatively easy, much study and data collection will be required in the case of plans for the old and built up areas of the city. Development plans for these areas should form part of a comprehensive urban renewal and redevelopment programme as outlined in a separate chapter in the work studies. This will take some time to prepare. In the meantime, for the Old City it has been decided that community facilities may be provided on an ad hoc basis (which will be incorporated in the Development Plans to be prepared) for a gross residential density of 250 persons per acre. Since most of these areas presently have higher gross densities, it is recommended that vacant plots and plots on which dangerous structures are being demolished each year, must be acquired by the Muncipal Corporation. These together with such other plots that may be acquired, must be utilised for standard than what has been indicated under the Sub-Division Regulations.

Realising that in the immediate future, there cannot be large scale demolition, due to the financial burden involved on public bodies, the low rent paying capacity of the slum dwellers and the need for keeping them nearer the work places, it is recommended that a major effort be made in the immediate future only to improve the slums rather than demolition and redevelopment.

^{**}It is estimated that a population of about 50,000 will be living in commercial areas also.

^{*}Refer Para I (viii) of Notification No. K-12016(i)/76-(Part ii) dated 22-12-1976 and No. K-12016(i)/72 UDI dated 17.8.1977

One of the major recommended is to improve the circulation in the Old City by a system of streets that will involve minimum widening but will at the same time ensure smooth flow of traffic. Through traffic is kept to the periphery of the Old City and the traffic generated inside the city is channelled to flow in and out. Some of the existing alleys will be used for cycle paths and pedestrain ways whereas vehicular traffic will skirt the residential pockets. There will be enough parking areas so that these pockets are accessible to vehicles but these will not go through them. These are shown in the Traffic Circulation Plan for the Old City and Table 4 indicates the proposed right of way of the roads.

Another measure intended to relieve the inhuman conditions in the slum areas is the recommendation that basic amenities like water, drainage and electricity etc. may be immediately made available even though certain areas are earmarked for redevelopment.

Under the zoning regulations it has been recommended that uses which do not conform to the land use shown in the Land Use Plan may be shifted to their respective use zones according to a time schedule. Among the first to be shifted are the noxious and nuisance industries and fire-hazard trades which abound in the Old City at present, causing congestion and injurious health conditions. It is also recommended that village-like trades viz. keeping of milch cattle, be removed to urban villages. This will not only strengthen the rural economy but also cheap milk collected through milk chilling centres will become available to the urban areas. Since the success of the removal of the dairies from the city depends on the speed with which the Delhi Milk Supply Scheme is able to meet the major demand of the city for milk, it is strongly recommended that the capacity of the milk scheme be increased for the purpose and a determined effort made to relocate the dairies as a matter of major health measures.

Zonal Development Plans for New Areas.

The Municipal Corporation has drawn up a schems for the relocation of the busti squatters in suitable areas not too far away from major work centres. It is recommended that while the structures and facilities may be below standard in order to keep down the cost and rents, the space standard in order to keep down the cost and rents, the space standards for schools, parks, streets etc. should be as for any other area given in the Sub-Division Regulations. Moreover, these should be integrated with a larger neighbourhood where there is a mixture of different social and income groups, as well as housing types. In addition, it is also recommeded that reasonable areas should be integrated with a large neighbourhood where there is a mixture of different social and income groups, as well as housing types. In addition, it is also rrecommeded that reasonable areas should be earmarked in several zones for the low income group who migrate to Delhi on account of the relentless "push" from the rural areas. As in the relocation of the busti squatters, sub-standard development and construction may be permitted but the space standards for the facilities should be those given for the density on which the layout is planned. it is recommended that building by-laws should be considerably relaxed in such cases not only to permit sub-standard development but also to enable the construction of low cost cheap houses or huts. This will keep down the cost for development upto standard in the not too distant future. Otherwise these will develop into slums.

It is also recommended that any village or abadi which is overtaken by urban development should not be left as such, as otherwise, the city will be pock marked with the type of slums such as Kotla Mubarakpur but should be redeveloped and integrated into the neighbourhood. New development will follow the Zonal Development Plans and the sanctioning authority should ensure that all development take place with proper lay-out and adequate community facilities and in accordance with the desirable and optimum densities prescribed in the Master Plan. It is equally necessary to set up a firm administrative machinery for effective enforcement of planning standards and

community wide inspection of services and prevention of squatting and encroachment. it is also necessary to adopt a compreshensive system of building, sanitary and other codes which prescribe adequate minimum standards of health, sanitation and safety. These can be enforced only if the maximum amount of citizen participation is secured as fully discussed amount of citizen participation is secured as fully discussed in the chapter on "Urban Renewal and Redevelopment" in the work studies.

8. TRAFFIC AND TRANSPORTATION

The rational and functional land use pattern envisaged in this Plan. which has taken into consideration the physical interrelationship of the various land uses on the principle of relative self-containment of each Planning Division. Will obviate the necessity of costly new transporation lines. But with increasing traffic even at the present time, certain basic requirements for smooth and efficient flow of traffic will have to be implemented and long term mesures planned to keep traffic within the bounds of the proposed transportation system. These are fully discussed studies. The major recommendations are given here and are shown in detail in the Land use Plan.

Railways:

In order to bypass Delhi Main Railway Station for through traffic. the Railways are planning a goods avoiding line which must be made to serve as a Ring Railway for local suburban traffic movement. Hence it will be necessary to have new railway stations at suitable places: and improve and expand the existing railway stations with more platform and passenger facilities, together with the provision for parking vehicles, for which land provision is made.

In order to reduce intracity traffic load. It is also essential to effect substantial improvements to some of the smaller railway stations both for passenger and goods. Improvements to Sahibabad goods station

facilities are in progress. Okhla, Nizamuddin. Subzimandi, Azadpur, Badli, Shahdara, Shakurbasti and Nangloi Railway Stations require substantial improvement and extension.

The Marshalling Yard at the New Delhi Railway Station will be shifted to Tughlakabad on the Agra Line. Also, mineral and goods sidings are proposed near the Marshalling Yard as Tughlakabad. on the Ambala line near Azadpur, and in U.P. contiguous to Shahdara. There is a railway siding already in Shakurbasti for oil etc. Suitable goods sidings should be made available to all the large industrial zones.

the mater gauge railway should be extended upto New Delhi Station which will be connected to the main Lucknow line at Sahibabad by a new bridge over the Yamuna opposite Purana Qila. Because of these and the moving out of the Marshalling Yard, a redesigning of the New Delhi Railway Station will be necessary. Some land reservation is made outside the station for parking etc.

The redesigning and modernization of the Delhi Main Railway Station is in progress. The planning should not only take into consideration the growing railway traffic but also the requirements of parking facilities which are at present wholly inadequate. The railway authorities should acquire more land for this purpose in accordance with the proposals in the Plan.

The jurisdiction of the Northern Railway should be extended upto Mathura junction so that the development of railways in the National Capital Region will get a Co-ordinated approach and will facilitate the growth of the Ring Town of Faridabad which at present is in the Central Railway Line.

There is also the task of Co-ordinatin passenger transport operation within this Region, with but and truck transport system. Joint team work is necessary to eliminate uneconomic duplication and improvement of services. It is recommended that the frequency of railway services in the Region should be increased.

Serious consideration should be given to the future electrification of the Delhi Terminal Area as far as Ghaziabad. Meerut, Faridabad and Sonepat. Until this becomes teasible, quick turning and relatively smokeless diesel rail-cars must be brought into operations.

Roads:

In order to avoid congestion in the urban core, certain by-pass routes aere recommended. The Ring Road which has been constructed in most parts must be quickly completed. The right-of-way should be 210 feet.

The Inner Ring Road requires links at some places and the widening of the right-of-way upto 150 feet. Grade separation should be provided where it crosses main arterial roads. Both the Inner Ring Road and the Main Ring Road should have access at not less than approximately 1/4 to 1/2 mile intervals.

The National Highway Bypass as shown in the Plan from badarpur village in the south along the Yamuna River upto Wazirabad pumping station (except the portion skirting Metcalfe House) and then to meet the Grand Trunk Road has to be completed. The alignment of the National Highway Bypass east of Metcalfe House will have to be restudied. The bypass has already been constructed from the Ring Road in the south upto Metcalfe House. The right-of-way should be 300 feet.

Two more major road links between Old and New Delhi are recommended. These will be overpasses over the railway line. One connects Circular Road to Parliament Street, following the alignment of existing Ranjit Singh Road, School Lane and Keeling Road; the other connects Mathura Road to College road and Ferozeshah Road. In case an over-bridge near the College Road and Ferozeshah Road. In case an over-bridge near the College Road is not possible for engineering reasons, the possibility of constructing an under-pass should be examined.

It is recommended that Rohtak Road should be diverted along the south side of the Western Yamuna Canal (north of the existing alignment) to join the proposed inner Ring Road.

With large scale development proposed for Shahdara, four bridge links are proposed in addition to the improvement that should be made to the existing road-*cum*-railway bridge, north of Red Fort. In the north, the Wazirabad Barrage will have a road, with a cantilever adequate in width for pedestrian movement and cycle tracks. This road proposed over the barrage will connect the National Bypass near Waziarabad Pumping station to Grand Trunk Road near Sahibabad. This will be an arterial road. Another road across the Yamuna near Humayun's Tomb in the south will connect Delhi to Ghaziabad across the River Hindon. Both these roads will have a right-of-way of 300 ft. In between these two major links, are proposed two road bridges across the Yamuna (subject to engineering feasibility) as shown in the Plan. The right-of-way of the Badarpur-Mehrauli road will be 250 feet and that of the Boulevard Road connecting Subzimandi with the National Highway will be 200 feet.

All the five National Highways which converge on Delhi will have a 300 feet right-of-way outside the urban limits and will be designed according to highway standards. The arterial and sub-arterial roads shown in the Plan should have a right-of-way of 200 feet and 150 feet respectively and major roads of 100 feet.

Many of the existing important roads require widening of the right-of-way as shown in the Plan. Notable among them are Lothian Road, Elgin Road, Mathura Road, Patel Road, Shankar Road, Park Street, Talkatora Road, Queen Victoria Road, Chelmsford Road, Qutab Road, Panchkuin Road, Rohtak Road and Church Mission Road in Old Delhi. Asystem of "minimum" streets for the Old City has already been recommended earlier in this Chapter and a detailed list and a map has been provided.

Roads with less than 100 ft. right-of-way will be shown in Zonal Development Plans and other detailed plans.

Arterial Cycle Tracks:

In addition to improvements of the existing road-marginal cycle tracks, the following arterial cycle tracks entirely separate from the carriageway, as shown in the Plan, are essential to avoid traffic bottlenecks.

Two cycle tracks going south from the Central Secretariat with 25 feet right-of-way, one to Vinay Nagar and another through Lodi Colony to Sewa Nagar are recommended.

The route in the westerly direction runs parallel to Patel Road, Shankar Road, thence through an underpass across the Upper Ridge Road to Talkatora Road and the Secretariat. Another runs north along Queen Mary's Avenue, market Road, Ramakrishan Ashram Marg, Chitragupta Road and Mandheqalan Road.

A cantilever pedestrian-cum-cycle track on the existing yamuna Bridge has been proposed, which will link with the proposed cycle track to Chandni Chowk and the other to the Secretariat and to Connaught Place.

Parking for cycles at Government and other offices is assured by the floor area ratio and maximum coverage prescribed in the Zoning Regulations.

Road Grade Separation with Railways:

The hold-up of road traffic at railway level crossings calls for under or overpasses at Rohtak Road, Patel Road, Link Road between New and Old Rohtak Roads and the approach Road to the Okhla Industrial Estate. The proposal for two new link roads between Minto and Hardinge bridges as overpasses has already been stated. So, too, Queen Victoria 30

Road joining the National Bypass requires a grade separation with the railway line. When Safdarjang airport is shifted, Mehrauli Road must have grade separation with the railway line.

Road Intersection Improvements:

At every major intersection at grade, channelisation of traffic by the use of pavement marking, raised islands or other suitable means are necessary. The ones at Minto Road and Connaught Place, Queen's Road and Kauriya Pul Road, Ajmere Gate, and Mathura Road-Wellesley Road corssing are the most pressing. Also many of the round-abouts with insufficient turning radius should be gradually replaced by intersections with traffic lights.

Road Transport Terminals:

Interstate passenger bus terminal and parking.

Three suitable sites of about 10 acres each, depending upon requirements. for loading and discharge of passengers, luggage and parcels, idle parking of buses when not engaged in active operations, are recommended at the following locations.

- 1. South of Idgah near Jhandewalan.
- $2.\,North\,of\,Central\,Road\,Research\,Institute\,on\,Mathura\,Road.$
- 3. Near Shahdara Railway Station between the railway line and G.T. Road

One more terminal of 10 acres is proposed outside Kashmere Gate. This will have in addition a separate site of 21 acres for idle parking east of the sanitary drain between the National Bypass and the Western Bund of the Yamuna River. This idle parking site will also provide for truck parking and servicing of buses and trucks.

A sites of suitable dimension, as a well planned terminal in the Motia khan area, south of Idgah Road, with offices and godowns of the booking and forwarding agencies is recommended. Another truch terminal site of 50 acres is proposed in the Shahdara area, west of the proposed airport road and north of the proposed National Highway. This will also have idle parking for trucks between trips.

Three suitable sites of adequate size of about 10 acres each are proposed for truck idle parking, servicing and all the incidental facilities that may be required with it. These sites are as follows:

- 1. Near Azadpur Police Station on Grand Trunk Road to Ambala.
- 2. Between Ring Road and Lawrence road and North of Rohtak road in the vicinity of Nangal Poser Station.
- 3. Near Okhla Industrial Estate on Mathura Road.

D.T.U. Bus Terminal.

It is proposed to develop two terminals, one in the connaught Place extension and the other near the Minto Bridge area as loading points for passengers and also to serve as places for accumulating, extra rush hour bus requirements. These terminals in order to be self-supporting should be developed for multi-purpose use including shopping and office space etc.

To bandle peak hour loads at Central Secretariat, Old Delhi Main Railway Station, Red Fort and Kashmere Gate, similar off-street laoding stations and bus accumulation areas are recommended. Also, in all the proposed District Centres and in the Central Business District of Shahdara, bus terminals may be developed as an integral part of these schemes. High density residential areas such as Vinay Nagar in the

south and Karol Bagh in the west should be provided with off-street loading points for handling morning peak hour traffic. The bus service should be soeeded up by establishing fewer, but better curb spaces in heavy loading areas and by strict enforcement measures to keep these stations clear of interference. A number of bus depots distributed over the urban area are shown in the Plan.

Future Mass Transit.

The proposal to have an electrified sub-way should be explored for the future when a substantial increased in traffic will justify an expenditure of Rs. 4 crore per mile; put it is obviously not a short range project. For the present, the Ringh Railway recommended, with the local bus service, should furnish the mass transit.

Department of Traffic.

The traffic problems of urban Delhi require continuous attention to a large number of miscellaneous items like intersection, traffic control, law enforcement, traffic education, pedestrain control, traffic signs and signals, street lighting and other matters. There are also capital works like planning of terminals, budgeting and financing of capital improvements. To deal with all these matters in a comprehensive manner it is recomended that a Traffic Department be set up under a trained traffic enginer and the enforcement of traffic may continue to be the responsibility of the police, with proper liaison between the two.

Staggering of Work Hours.

An important measure recommended for improving peak hour traffic conditions, is the staggering of work hours so as to distribute peak hour traffic load over a longer period.

Regional Highway Proposals:

It is recommended that in order to relieve the pressure on the Yamuna Bridge and the congested Delhi area, peripheral all weather communications should be provided by converting the exsting bot bridges into concrete structures. A bridge at Baghpat will give a connection to Sonepat-Methrauli, while the bridge at Jewar will link Palwal to Khurja and Aligarh.

Similarly, in order to encourage perodheral movement of traffic between the towns lying within the Delhi Metropolitan Area, a perimeter road connecting Ghaziabad, Faridabad, Gurgaon, Bahadurgarh and Narela should be development. The proposed bridge opposite humayun's Tomp will connect Ghaziabad with Faridabad and the barrage-cum-road at Wazirabad will connect Ghaziabad to the north.

The Ring Towns of the Delhi Metropolitan Area lie on the national Highways. With their proposed repaid growth, bypass roads are essential For this purpose the right-of-way should be earmarked for the bypass immediately, instead of resorting to costly land acquisition latter when urban development has taken place. Ribbon development along National Highways must be prevented by Zoning Regulations.

Airport.

It is recommended that the International Civil Airport be continued at Palam with suitable runways and terminal facilities for increased jet traffic. For this purpose the existing airport acreage has been doubled. If, however, for security reasons, the Air Force Station cannot be removed from Palam, the International Civil Airport can be located at Pasuanda in U.P. It is a good site and within easy reach of Delhi. The site has, therefore, been marked on the plan. What is of the utmost importance is an early decision on this matter as it may not be possible to keep the Pasaunda site vacant indefinitely. Palam is undoubtedly best suited for a civil airport and should be given up only for over-riding defence reasons.

The airport at Safdarjang is in the midst of heavily built-up residential areas. It canot, therefore, be extended to meet the requirements of modern aircraft in agrad to line of flight and length o runway. The airport continues to b a source of hazard and nuisance to the areas surrounding it. It is, therefore, recommended that it should ultimately be removed-possibly to join the ultimate International Civil Airport for Delhi. The Flying Club which is functioning at the same site there days should also be used for recreational purposes and the Plan has, therefore, shown it for ultimate recreational use.

9. COMMUNITY FACILITIES AND SERVICES.

A-Recreation.

A system of District Parks has been worked out for the entire urban area of Delhi related to the proposed pattern of residential densities. The proposals will enable every one of all age groups to enjoy active and passive recreation. In selecting the locations, due cognizance was given to the existing physical features, special spots of beauty or interest, places of historical or architectural value, existing orchards etc.

(I) Local parks and playgrounds.

These are to be shown in zonal development plans and detailed plans and must cater for all age groups, These range from 2.00 to 0.81 acres per thousand population for residential densities verying from 25 to 200 persons per acre as detailed under Sub-Division Regulations. However, for the Old City where a density of 200 to 250 has been proposed, the standard proposed is 0.30 acres per thousand population for the simple reason that space is just not available. The area proposed will

provide tot-lots, playground space for primary and secondary school age children and local neighbourhood parks within walking distance of the neighbourhood which they cater for.

(ii) District Parks.

These are proposed on an overall basis of about 3 acres per thousand polulation and distributed all over the urban area. Each District Centre has a district park nearby. Most of the parks are inter-connectd by a system of green ways which penetrate through and between residential and work areas to provide an efficient system of direct pedestrian and cycle tracks for circulation between different residential neighbourhoods safe from vehicular traffic. In the first stage financial limitations will limit the development of organised parks to only a small portion of the area allocated in the Plan and the rest would remain in a natural state, so that a disproportionate amount of the municipal budget will not be spent for such amenities. But within 20 to 25 years from now, all the park area should be developed to serve the increased demand. The total area earmarked for District Parks is about 17,940 acres including semi-public recreational areas 890 acres.

The Old city Division

The existing parks are the Parade grounds in front of Red Fort and Jama Masjid, Rajghat and Queens Gardens. The proposed parks are: the river front south of Yamuna Bridge, Qadam Sharif around the graveyard area and the Idgah. it is proposed that all areas receive major improvements in the Third Five Year Plan. It is in this area of the Old City that the greatest population is concentrated and the greatest need for Parks exists.

Karol Bagh Division:

The existing parks are Ajmal Khan Park and in Anand Parbat.

* Refer Para (B) of Notification No. K-12014/6/75-UD dated 11.12.1975

The former is fully developed and the latter partially and should be developed as a district park. The ridge area east of Pusa Road (on which sites for a college and schools have also been earmarked) should be immediately developed as a park, since the entire congested area is without adequate park facilities. The other park proposed is near Naraina Village.

Civil Lines Division:

The University ridge is in a semi-development stage, as also the area around the coronation Pillar. it is proposed that parts of these areas be taken up for immediate development. the other existing parks are Roshanara Gardens and the one outside Kashmere Gate. It is proposed to developed parks at the junction of Mall Road and G.T. Road, Magazine Road in Timarpur, north of Kingsway Camp and north of Model Town, and north of Rana Pratap Bagh.

New Delhi Division

The existing parks and open spaces are the Central Vist, the Hexagon near India Gate, Lodi Gardens, Ramlila Grounds, Talkatora Grounds, Vijay Chowk, Feroze Shah Kotla Grounds, area around Safdarjang Tomb, Connaught Place, Gurdwara Park and Lady Hardinge Ground. Also the Zoological gardens and the Buddha Memorial Park have been partially developed. Area in the Diplomatic Enclave, area west of Lodi colony, the Safdarjang Airport area and the River Front (for Olympic Grounds) are some of the proposed parks. Beyond expanding the Zoological gardens and the Buddha Memorial Park and the Olympic grounds, it may not be desirable to develop other areas until the Old City, West Delhi, south Delhi and Shahdara have adequate recreational areas.

Shahdara Division

This has hardly any park. Here the largest park proposed is along the river Yamuna. Parks are proposed also near the proposed Central Business District and district Centres.

South Delhi Division:

Hauz Khas which is partially developed, Siri and area near the industrial zone east and north of Kalkajo, Tughlakabad and the rocky outcrop to its north-west are the proposed parks. Only small portions of these may be developed until the residential areas are more fully developed.

North-West Division

This division is at present mostly under agricultural use. There are, besides, a number of orchards, some of them quite old and not is a good state of preservation. Park areas have been shown in the Plan at several places in this division, one particularly large one has been suggested north of Sarai Rohilla across the canal. It has also been proposed that some of the orchards should be retained and properly developed and maintained. They will also provide quite a coniderable amount o greenery and open space to the area.

The proposed parks are located mainly along the Najafgarh Nala and near District Centres.

(iii) Picnic Spots:

The existing picnic spots in Delhi are inadequate to meet the increasing demand of the population for this facility. The proposed spots are named in the chapter on Recreation in the work studies and some of these should be developed immediately. So, too, some of the hunting, fishing and sailing areas, like Najafgarh Jhil and Okhla, should be developed for these sports.

(iv) Regional Parks:

The most important of these is the Upper Ridge which should be reserved for a regional park, It should not be allowed to be dissipated by small undersirable uses but should be gradually developed as a central public park in Delhi, comparable to Hyde Park in New York. For the 34

present, small portions of it may be developed like the Buddha Memorial Park and the rest may remain in a natural state with the under growth cleared to facilitate hiking.

The other area is near the Qutab Minar which should be enlarged and part of it developed as a Botanical Garden.

The Southern Ridge is also a potential Regional Park and must be properly developed, in the course of years.

The existing use of the Malcha rifle Range on the Southern portion of the Ridge will remain undisturbed.

The total area shown under regional Parks is 8,200 acres.

Some of the other potential regional Parks are outside the Union Territory of Delhi and are indicated in the chapter on Recration in the work studies.

(v) Agricultural Green Belt:

This is mostly a one mile depth inviolable green belt of agricultural land around the 1981 urbanizable limits, which will bekept in intensive agricultural uses by Zoning Regulations, which allow only farm houses and agricultural uses. This will prevent premature urban growth and the overspilling of development during the plan period.

(B) Education:

Standards for pre-primary, basic primary and higher secondary schools for various residential densities are given in the Sub-divison Regulations and locations will be shown in Zonal Development Plans and detailed plans. the sizes for higher secondary schools vary from 5 to 10 acres; for basic primary from 1.5 to 2.5 acres and for pre-primary from 0.2 to 0.75 acres, for residential densities varying from 200 to 50 persons per acre.

There is a huge back-log in all the there stages of schools, which is fully dealt with in the chapter on Education in the work studies. Urgent steps will have to be taken to build schools at an adequate pace so as to be able to meet all the requirements.

University and College Education.

There are at present 26 colleges affiliated to the Delhi University (of which 10 are in and around the University Campus), with over 14,000 students in 1960. All the colleges are overcrowded and are unable to cope with the increasing demand for college education. Moreover, the students have to travel long distances from far-flung colonies.

It is proposed to expand the existing university campus to have a total of 385 acres. A university centre in the south is proposed near the junction of Kitchner Road and Ring Road. This centre will have several colleges.

It is also proposed to have a number of colleges within easy reach of the residential areas each to serve a population of about 1,50,000. Land measuring 15 acres has been proposed for each college, which will suffice for the teaching building, Staff quarters and playgrounds, with land left over for future expansion. It is proposed that only a few of these colleges would have hostel and dormitory facilities, as most of the students served by the colleges would come from the surrounding residential areas. In addition to the existing (1960) 26 colleges, sites for 22 new colleges have been earmarked in the Plan. Out of these, there are 4 existing professional colleges and an Engineering college has been located south of Hauz Khas.

It is further proposed that for every four or five colleges, a University Centre should also be provided. Such a Centre would contain comprehensive library facilities and research laboratories; and in addition serve as a general campus for evening cultural activities for the entire Planning Division. The Plan provides for 6 such centres with as much as 30 to 40 acres each. The total area earmarked in the Plan is about 1,400 acres for colleges and University campus and centres.

TABLE 2.

Distribution of Colleges and University Centres by Planning Division.

Planning	Colleg	ges		University	Campus	& Centras
Division	Existing	Proposed	Total	Existing	Proposed	Total
Old Delhi	2	_	2	-	_	_
Karol Bagh	2	3	5	-	-	-
Civil Lines	12	1	13	1	-	1
New Delhi	9	2	11	-	1	1
Shahdara	-	4	4	-	2	2
South Delhi	1	4	5	-	1	1
West Delhi	-	5	5	-	1	1
North Western	-	3	3	-	1	1
Total	26	22	48	1	6	7

Research Institutions:

Land has been allotted for the expansion of the Jamia Millia educational centr near Okhla and for the Pusa Agriculture Re-search Institute near Patel Nagar. Reservation of land has also been made for institutional use north of Badarpur Road. The All India Institute of Medical Sciences on Mehrauli Road and the Central Road Research Institute on Mathura Road and the National Physical Laboratory near the Pusa Institute are being developed to their optimum capacity.

Other Educational Institutes:

An area of about 600 acres has been earmarked for Educational and Cultrual purposes south-west of the new Engineering.

College. Out of this a suitable amount of land may be allotted for a new University and other educational institutes which subserve the needs of the Urban area and provide for research, higher education and train educational personnel at an advanced level. Total land allocated in the Plan for Research and institutional uses is about 2,900 acres.

(C) Hospitals:

There are at present 7 general hospitals and a number of private hospitals and maternity hospitals. These are inadequate even for the needs of the present population. There are also two T.B. hospitals, one Infectious Diseases Hospital and one Mental Hospital. It is proposed to have 20 additional hospitals of 500 beds to serve 1,25,000 people. The area proposed is about 15 acres each. It is also proposed that in each Planning Division at least one hospital will have about 25 acres, so that it can offer specialised services not available in other hospitals. Land has been reserved in the Plan for the expansion of some of the existing hospitals.

TABLE 3

Planning	General	Hospitals	
Division	Existing	Proposed	Total
Old City	1	Nil	1
Karol Bagh	Nil	1	1
Civil Lines	1	1	2
New Delhi	3	1	4
Shahdara	Nil	6	6
South Delhi	2	2	4
West Delhi	Nill	5	5
North West Delhi	Nil	4	4
TOTAL	7	20	27

It is proposed to locate three more Infectious Diseases Hospitals one each in the south, west and north,

The total area under Hospitals in the Plan is 953 acres.

(D) Other Community Facilities:

Police Stations:

Police Lines and a few large police stations, both existing and proposed, are shown in the Plan. These are distributed all over urban Delhi. Others will be shown in Zonal Development Plans.

Health Centres, Fire Stations, Electricity Sub-stations, Post and Telegraph Offices, Telephone Exchanges, Community Halls, community and neighbourhood shopping centres etc. will have to be shown in Zonal Development Plans and detailed plans. Standards for these are given in the Sub-Division Regulations.

(E) Public Utilities and Services:

In the chapter on Utilities and Services in the work studies, the total quantum of water and power required for the future growth of Delhi and measures for augmenting the present supply have been pointed out. Active steps have to be taken well in advance to secure the sources of water and power which are so essential for the healthy growth of the city. Gas supply to supplement power has also been suggested for consideration.

Water:

Additional land to the extent of about 20 acres has been earmarked for the expansion of the Chandrawal Purfication Plant. Also, 40 acres of additional land has been reserved for the Wazirabad Headworks. The other waterworks is in Okhla which has sufficient land. Water supply to Shahdara will be from tube-wells and only a pumping station will be required. Additional land for pumping stations and reservoirs may be met from residential areas and the extensive park areas of the ridge.

Power:

The existing power house, being too near Rajghat, will continue till such time as the machinery becomes obsolete, so that the Rajghat site will be completely open to the river. A new site has been earmarked for the location of a big thermal plant south of the present site as it will need constant and large supplies of water from the river and also a railway siding for coal. Land for housing the essential staff and for the future expansion of the plant has also been provided at the new site. Shahdara may require a thermal station to meet the increasing demand of power and a site near the river will have to be selected in due course.

Sewerage:

Proposals to discontinue sewage overflows into the Yamuna will have to be executed soon. Adequate land has been reserved for the treatment plants, at Okhla in the south, coronation Pillar in the north, and near Keshopur in the west. A site for a new treatment plant has been reserved in South Shahdara to serve the whole of the proposed urban area acros the Yamuna.

Wireless and radio transmitting stations:

Sites for the essential wireless and radio transmitting stations have been earmarked. It has also been recommended that some of the additional sites required for such stations that have to be in urban Delhi may be located in the park areas of Siri and Anand Parbat. Others must be located in the Rural Zone, as they take up a lot of valuable urban land.

Cremation and burial grounds:

The existing Nigambodh Ghat has to be redeveloped with more bathing ghats and parks. Two and three storeyed houses should be built for the dwelling of those connected with the cremation rites and bathing ghats

should be properly developed. Shops should be provided for the stacking of fire-wood etc. near the ghats. The jamuna Bazaar squatters should be relocated in the area to be developed across the bund on the G.T. Road to Shahdara and elsewhere according to Plan.

A Site near the Yamuna bridge has been recommended for an electric crematorium which is so essential for a big city like Delhi. Thirteen other sites for cremation grounds have been earmarked in the plan so that they are within two or three mile radius of the residential areas. These should be properly developed with trees all around the cremation ground in order not to spoil the amenity of the surrounding areas. The existing cremation grounds like the one on Panchkuin Road which is in the midst of the urban area should be speedily relocated.

The Muslim burial grounds at Kotla are almost full. Two new sites have been proposed. One between the National By-pass and the railway line from Mathura, south of the proposed railway bridge and the other across the Yamuna.

A Christian bruial ground and a Parsi Cemetery already exist in the city.

Dumping grounds and sanitary fills:

The main dumping grounds for night soil are at Badli beyond the urbanzable limits. In the chapter on Unilities in the work studies it has been strongly recommended that presently cut up and low lying land may be reclaimed by hygienically conducted sanitary earth fills of garbage. This will not only reduce the mileage for trucks carrying garbage long distances away from urban areas, but in the long run, will make available valuable lands (which are now water-logged) for essential urban purposes like parks etc.

(F) Social and Cultural Institutes:

Delhi has been sometimes described as a city without much social and cultural life. While this may be partly true of New Delhi and the new colonies, which had to grow up under stress when much thought was

not given to providing these facilities compared to providing shelter. But the Old City of Delhi has a rich tradition of social and cultural life, which too may die a slow death if the necessary impetus is not forthcoming. Recognising this, it has been strongly recommended that multipurpose community centres be provided so that a framework may be built up within which the whole fabric of social activities can be inter-woven in such a way that the anonymity of city life does not stifle the cultural life of the citizens. This is fully discussed in the chapter on "Education, Health and Recreation" in the work studies.

The plan has also provided land reservations for charitable, social and educational institutions for the handicapped and underprivileged. These are in the south-west near Tehar Jail and in the north-west near Azadpur. As already stated, a 600 acre land reservation has been made in the south for educational, social and cultural institutions.

Another major centre to meet the long standing aspiration for a richer cultural life, is the site stretching on either side of the Central Vista starting from Janpath and ending at the National Stadium and the Purana Qila Beyond. This will be the new heart of the metropolis with the four major national building; viz. the National Archives, the National Theatre, the National Library and the National Museum. Vigyan Bhavan, an assembly and conference hall, is already runctioning on Maulana Azad Road. New social and cultural buildings of national importance like conference and assembly halls, art galleries, convention halls, public auditoria, theatres and state guest houses should be built by Government in this area.

Another cultural, social and institutional centre proposed is near Sapru House

38

Master Plaln for Delhi :-1-9-62 Source - DDA Another cultural, social and institutional centre proposed is near Sapru House as shown in the Plan. A large area is earmarked for the purpose where the Tagore Memorial Theatre has already come up.

A third cultural area proposed will be the new cultural area proposed will be the new Civic Centre, planned around the proposed Municipal Corporation buildings opposite Ram Lila Grounds. This Centre, it is hoped, will bring about the social and cultural integration of Old Delhi and New Delhi by providing common facilities and new centres of interest.

Yet a fourth cultural centre is proposed in about 45 acres of land in the Siri area in the south. This will have an integrated plan for the social and cultural activities of the various states that constitute the Indian Union. The idea is to give a fillip to such activities in the National Capital so that the people of different States can enrich themselves through the medium of song, drams, dance and other fine arts. This, it is hoped, will help is the emotional and cultural integration of the Indian people.

To sum up, the urbanizable area upto 1981 covers about 1,10,500 acres . The detailed distribution of land uses in the Plan is given in the chapter on "Land Use Survey and analysis" in the work studies.

10. NEED OF REVIEW AND REVISION:

It will be seen that land allocations for various uses emerge from an assessment of the needs of the estimated population in 1981 in various directions-housing, employment, educations, health, recreation, transport, community facilities and public utilities. While a reasonably long-range plan is necessary in order to give a proper perspective, it has to be within the realm of possibility. The outlines of growth during a period of two decades or so can be drawn with a fair amount of accuracy; the

passage of time cannot cause any overwhelming aberrations if constant review enables timely re-assement and modification. On the other hand, these proposals are not intended to provide arigid delineation of the pattern of growth until 1981. The year 1981 is no annus mirabilis in the history of Delhi. That year gives only a working range and no more. The city and the region will continue to grow after that-grow not marely in the narrow sense of population but in the range and variety of its activities. Many things are bound to happen during this period. Such is the dynamic quality of an urban concentration and Delhi, more than many cities, displays a vitality that gives it a character of its own. Not only, therefore, will the repidly changing pattern of growth, investigation and research must go on all along the line so that the chances of haitus being created are avoided.

The periodical revisions of the plan in the intervening period should anticipate and fulfil, on the basis of a rational scientific study, the needs of the community for the period after 1981. The process of planning is as continuous as the growth of towns; it is not a "fitful fever".

One thing is certain, whether plans are made or not, and that is that many new demands shall be made by the growing city in the years to come. The strengthening of the economic base of the country through the determined efforts of the national five year plans and the numerous social welfare activities undertaken by Government will produce an impact on the physical aspects of living and these will have to be catered for. If plans are prepared in anticipation of such situations, many frictions can be avoided, growth regulated along pre-determined lines and over-heads caused by belated action avoided. Indeed, if the imperatives had been realized earlier, the enormous back-logs and formidable problems which face the city today would not have existed in their present form. The labour involved in making the initial comprehensive plan is undoubtedly great but it facilitates the whole process of development thereafter. That is a rich enough reward but one cannot rest on one's laurels.

11. Proposed right of way in the Old City.

TABLE 4: List indicating Proposed Rights of Way of Roads in the Old City.

SI. Name of Road From No.		То	Approximate length in feet	R W in ft. recommended		Remarks

4. Roshnara R	Road	Clock Tower Subzimandi	Pul Bangash	5,400 Rft.	100	
				(1.1 miles)		

^{1.} As regards other roads in the Old City not included in this statement, it is recommended that in the built up area the existing road width should remain except where there is scope for widening.

^{2.} It is also recommended that the construction of colonnades and projections on all roads be prohibited.

12. STAGING OF DEVELOPMENT

Section 7(2) (a) of the Delhi Development Act of 1957, enjoins that the Authority shall not only prepare the Master Plan, but also indicate the stages by which any such development shall be carried out.

It will be appreciated that any attempt at "staging" of the development programme can possibly be done only after duly cosidering and assessing various factors among which the most important ones are the financial and administrative resources of the plan implementing authorities. Obviously, it is not quite possible to assess such and many other imponderable factors over a long period, which extends upto 1981, so as to relate precisely the physical targets with the resources that may be available in future from time to time.

The two broad stages worked out in the accompanying statement put together in the first or the second stage, as the case may be, items of

contemporaneous development indicating an orderd sequence in developmental activity, i.e., the work in the second stage to be tackled. In putting the various items in the first or the second stage, as good an assessment as possible has been made of the needs of the community and the priority that each need deserves. For instance, it will be unrealistic to expect full recreational facilities to be available immediately and therefore, the bulk of the programme under this item finds a place only in the second stage. On the other hand, certain programmes like augmentation of water and power supply figure more prominently in the first stage itself. This is so because by its very nature the bulk provision of services has to be some-what ahead of the needs. As regards the provision of community facilities, internal distribution system, roads, re-housing and re-development, these are parts of the programme of residential and industrial development and will follow the standards laid down in the Plan. As the development programme goes on getting implemented, the staging itself will have to be subjected to review and revision.

TABLE 5: Staging of Developing for Delhi Master Plan

SI .No.	Description	Ar	ea in acres		
		I Stage	II Stage	Total	Remarks
1. Acquis	sition of Land & Development:				
(a)	Residential	 17,000	13,000	30,000	As regards provision of major roads,
(b)	Commercial	 1,160	740	1,900	roads, community facilities,

((b)	Sewerage	 26,040 acres	11,160 acres	37,200 acres	Provision of Trunk Sewers only to cover the
					acreages given.
©	Sewage Disposal	 90 M.G.D.	52 M.G.D.	142 M.G.D.	
(d)	Electricity	 2,74,800 Kw.	1,83,200 Kw.	4,58,000 Kw.	

(R. G. Gupta) www.rgplan.org

[†] This does not include land covered by "Institutional Use", University and College, Hospitals, Cultural Centres and Major Road.

^{††}The extract area which will be under commercial use in the heavily built up areas like the Old City, Subzimandi, Karol Bagh, etc. will be known when detailed redevelopment plans are made for these areas. ††This includes the Ridge which has an area of about 8,000 acres and also the River Front on either side the Yamuna from Wazirabad to Okhla.

CHAPTER II

ZONING AND SUB-DIVISION REGULATIONS

A. ZONING REGULATIONS

1. NATURE OF REGULATIONS

In order to promote public health, safety and the general moral and social welfare of the community, it is necessary to apply reasonable limitations on the use of land and buildings. This is to ensure that the most appropriate, economical and healthy development of the city takes place in accordance with the land use plan and its continued maintenance over the years. For this purpose the city has been divided into a number of "use zones" suchas Residential, Commercial, Industrial, Recreational etc. Each use zones has its special regulations because a single set of regulations cannot be applied to the entire city, as the different use zone vary in their character and function. In this respect, zoning regulations differ from building codes or sanitary codes which in general apply uniformly to all land or buildings of like use and character wherever they may be located in the community. Zoning regulations are not to be used for nuisance control nor can they be used to accomplish any kind to human segregation like excluding certain communities, or income groups from certain areas.

Zoning protects residential areas from the harmful invasions of commercial and industrial uses while it also promotes business and industrial uses while it also promotes business and industry by the very nature of the planned and orderly development that it ensures. By requiring the spacing of building it provides adequate light, air, protection from fire etc. It prevents over-crowding in buildings and land and thus facilitates the provision and continued adequacy of water, sewerage, transportation, schools, parks and other facilities.

It should also be understood that zoning is not ordinarily a restroactive measure-that is, it does not prohibit uses of lands and buildings that were lawfully established prior to the coming into effect of the zoning regulations, If these uses are contrary to the regulations in a particular use zone, and would not be allowed as new uses, they are designated as "nonconforming uses" The provision under this head will gradually eliminate non-conforming uses without inflicting unreasonable hardships upon the property owner.

Thus zoning regulations and their administration are a major tool in carrying out the land use part of the Master Plan of which it is integral part.

2. ESTABLISHMENT OF "USE ZONES"

For the purposes of these Regulations, the Union Territory of Delhi has been divided into 24 use zones designated as follows:

1. R-25					Residential
2. R-50					Residential
3. R-60					Residential
4. R-75					Residential
5. R-100					Residential
6. R-125					Residential
7. R-150					Residential
8. R-200					Residential
9. R-250					Residential
10. A-1					Agricultural Green Belt

11. A-2	•				Rural.
12. C-1					Retail shopping.
13. C-2					General Business and
					Commercial (Central and
					Sub-Central business
					districts, District Central).
14. C-3					Wholesale.
15. M-1					Flatted factory.
16. M-2					Work-cum-Industrial
					Centre.
17. M-3					Special industrial.
18. M-4					Light industry and service
					industry
19. M-5					Extensive manufacturing.
20. M-6					Extractive industry, mining, brick
					kilns, stone quarrying etc.
21. W					Warehousing, storage and depots.
22. G					Government and semi-
					government offices
23. P					Recreation
24. F					Public and semi-public facilities.

The land use plan shows the various use zones./In the case of District Centres where no separate areas have been marked for retail shopping, work centre or flatted factory and government office but are indicated in the text of the Land Use Plan, such demarcations will be shown in detailed plan. The land use plan does not show local shopping, local parks schools etc. Hence, in built up areas, the local muncipal authorities may allow such uses, based on quick surveys and on an ad hoc basis, until zonal development plans are prepared. The latter, when prepared, will incorporate the land use proposals prepared by the local authorities. In new areas development shall take place only on the basis of the zonal development plans.

3. NON-CONFORMING USES:

The provision regarding these will come into effect with respect to industrial non-conforming uses and such other uses specifically mentioned below. For the rest of the non-conforming uses the provisions will come into effect only after the preparation of the zonal development plans since only these will determine the siting of local facilities like shops etc. mentioned above. All existing places of worship, temples, gurudwaras, mosques, churches, Jain temples, Parsi fire-temples, etc., and burial ground shall not be considered as non-conforming uses.

DISCONTINUANCE OF NON-CONFORMING USES

A, Industrial Non - Conforming Uses:

Such industrial uses that do not conform to the land use shown in the Master Plan, will have to be shifted in gradual stages to industrial areas earmarked in the Plan. In allocating new industrial sites, the demands of the non-conforming uses will have to be given priority by the authorities and if possible other inducements may have to be given priority by the authorities and if possible other inducements may have to be given for expediting the shifting. This can be in the shape of providing extra land needed for expansion by the industry at the new site. allowing the present owners to develop land from which they are shifting in accordance with the land use shown in the Plan, providing a loan etc. It should also be noted that the shifting of industry according to plan will be possible only if suitable land for the purpose is available.

While it is agreed that the non-conforming industries should be given suitable time to shift from their site, it is necessary to have uniform policy on which to lay down a time schedule for their shifting. It is

recognised that this process must be largely governed by the fact that there should be the minimum amount of dislocation of production and the industries and workers should not be put to undue hardship.

Time-Schedule.

- (1) Noxious industries must be the first to go from their present location. A three year penod may be stipulated within which they have to be shifted with additional time if the capital value exceeds one lakh rupees.
- (2) Industries which are not noxious but are causing nuisance should be given up to four year for shifting.

However, additional time limit, as per table, upto a maximum of 10 years may be given to nuisance industries on a sliding scale on the following criteria:

- (a) The capital value of land, structure and machinery allowing for depreciation; more time is given to industry with higher capital value.
- (b) The registered employment of industry. More time given to industries employing more workers.
- (c) The production floor space per worker. More time if the industry has more floor space per worker which is computed by dividing the total production floor space in square feet by the total registered industrial employment.
- (3) Non-nuisance industries will get more time on each of the counts upto a maximum of 20 years.
- (4) A non-conforming use tax will be levied if the industry wants to stay after the moratorium period has lapsed and it is considered by the

Competent Authority that such permission should be given. In such cases, the extention, should not exceed ten years.

Time-Schedule for Non-conforming uses.

Industrial Uses

Condition for Moratorium	Noxious Industries	Nuisance Industries	Nonnuisance Industries
	No. of years	No. of years	No. of years.
1	2	3	4
Industries with No. of registered employees 1 to 19, with production floor space per worker 50 sq. ft. and below and capital value less than one			
lakh	3	4	6
No. of registered employees between 20 to 99 (additional years)		1	2
No of registered employees 100 and above (additional years)		1	2
Production floor space per worker between 51 to 100 sq. ft. (additional years)		1	2
Production floor space per worker between 100 sq. ft. (additional years)		1	2
Capital value between one and five lakhs (additional years)	1	1	2
Capital value above five lakhs (additional years)	1	1	4
Maximum No. of years	5	10	20

Note: 1. Time is given on each count listed in the table and is cumulative in the order given in Table.

Noxious and hazardous industry is that "which is or may be dangerous to life or injurious to health or
property" * by fumes, effluent, or smoke or by producing or storing inflammable materials.

- 3. Nuisance industry is that "which causes or is likely to cause injury, danger, annoyance or offence to the sense of sight, smell or hearing or disturbance to rest or sleep"*
- 4. Capital value is cost of land, structure and machinery allowing for depreciation on the date of sanctioned Master Plan.
- 5. The employment noted in table is for industry using power, For industry not using power the employment is to be taken as double.

B. Residential Non-Conforming-Uses.

Time Schedule

Land Use	No. of years	Remarks				
Residential use in Industrial	10	May be converted to industrial use provided layout plan and structure are approved.				
Residential use in commercial areas	10	May be converted to commercial use if layout plan and structure are approved. Residential use can continue on first and higher floors.				
Residential use in public recreational areas.	10	Except in the case of existing villages. areas.				

C. Commercial Non-Conforming-Uses.

Time Schedule

Land Use	No. of years	Remarks
Commercial use in Industrial area.	10	May be converted to industrial use provided layout plan and structure are approved.
Commercial use in residential area	10	Local commercial areas will have to be shown in zonal plans.
Commercial use in public and semi-public use areas including recreational areas.	10	"

IMPROVEMENTS AND ALTERATIONS PERMISSIBLE IN NON-CONFORMING USES.

If an undertaking is given by such-conforming uses that no compensation will be claimed, then improvements to build-ings. or machinery as stated below may be allowed:

- Repairs, replacement, modernisation or reform in any manner to improve productivity, efficiency and economy of the existing power plant and workshops and other auxiliary departments connected with the carrying on of the activities of the existing equipment.
- 2. Any re-organisation, alteration, or repairs of buildings that house such plant and equipment.
- Alteration, recorganisation, extensions and addition to the existing office buildings, residential houses, amenities, gates, tanks, platforms, wells, roads, drains and other structures in order to maintain and improve the efficiency, productivity and economy of the existing manufacturing activities.
- 4. Repairs, alteration, or rebuilding of godowns on an industrial plot stocking raw materials, machinery parts and spares, finished products, building materials etc.

Non-conforming non-industrial uses will not be allowed to make additions to buildings in any case.

In the case of industrial non-conforming use, additions either to building or machinery in extension of existing work-space should not be allowed.

The setting up of new machinery for new line of manufacture on existing site should not be permitted. But the use of existing machinery and building with requisite alterations, if necessary, for a different line of

^{*}As defined in 2(33) of Chapter I of the Delhi Municipal Corporation Act, 1957.

of manufacture may be permitted, provided it is not noxious.

The period of moratorium will be reckoned from the date of legalisation of the Master Plan and not from the date of the new use.

RESUMING AFTER DISCONTINUANCE OF A NONCONFORMING USE.

If a non-conforming use is discontinued for more than one year, any further use of the buildings and premises shall be in conformity with the Master Plan.

REBUILDING AFTER DAMAGE OR DESTRUCTION OF A NON-CONFORMING USE.

Any non-conforming building or structure which is damaged to an extent exceeding fifty per cent of its reproduction value, exclusive of foundations, by fire, floods, explosion, earth-quake, war, riot or an act of God, may not be restored, reconstructed and used for any other than a purpose permitted in the Master Plan for the area in which the building or structure is located.

TEMPORARY PERMITS

Competent Authority may allow for temporary use with a time limit, a use other than the use stipulated in the Master Plan, like tents for workers to live while constructing an industrial estate or where an area is undeveloped and the property owner wishes to continue agriculture or in undeveloped areas to make temporary use of the land in some other way than shown in the Master Plan with definite time limit and on a specific permit.

4. PROVISIONS REGARDING USES IN "USE ZONES"

Residential.

1 to 3. Use zones-R25, R50 and R60.

48

Master Plaln for Delhi :-1-9-62 Source - DDA

Uses permitted.

Residences, hostels and boarding houses with density limitations; nurseries, kindergartens and schools; clinics, social and cultural institutions with adequate parking facilities; public utilities and buildings except service and storage yards; non-commercial farms, agricultural gardens, nurseries and green houses; any neighborhood recreational uses including clubs and other semi-public recreational uses; accessory uses clearly incidental to residential use (except retail shops and service uses) which will not create a nuisance or hazard.

Uses permissible if allowed by competent authority after special appeal.

Temples, mosques, churches and other places of worship; professional office or home occupations when situated in the same dwelling as the one occupied by the professional man or woman or when located in local shopping centre; commercial offices, services uses and retail shops of a neighborhood character when located in local shopping centres or in concentrated locations or as shown in the zonal plan when prepared; hotels, motels, hospitals and sanatoria not treating contagious diseases or mental patients, constitute nuisance to the residential area; colleges and research other materials for sale provided there is no nuisance created and no part of the building is located less than 50 feet from any plot line; municipal, state and central Government Offices; raising of poultry or cattle for non-commercial uses provided that no bird or animal is housed closed than 50 feet of a dwelling or a property line; removal of gravel, clay, sand or stone for development of site which will not result in the stagnation of water or cause other nuisance; bus depots, railway passenger and freight stations; petrol filling stations on roads of 100 feet right of way and above; service and storage yard, taxi and scooter stands.

vUses prohibited:

All uses not specifically permitted herein.

Residential.

4 to 6. Use zones R75, R100 and R125.

Uses permitted.

All uses permitted in R25 to R60 use zones.

Uses permissible if allowed by competent authority after special appeal.

All uses permissible in R25 to R60 use zones.

Uses prohibited.

All uses not specifically permitted herein.

Residential.

7 and 8. Use zones-R150 and R200.

Uses permitted.

All uses permitted in R75 to R125 use zones.

Uses permissible if allowed by competent authority after special appeal.

All uses permissible in R75 to R125 use zones.

Uses prohibited.

All uses not specifically perzmitted herein.

Residential.

9. Use zone-R 250.

Use permitted:

All uses permitted in R200 use zone.

Uses permissible if allowed by comptent authority after special appeal.

All uses permissible in R200 use zone

Uses prohibited.

All uses not specifically permitted herein.

Agricultural Green Belt. 10. Use Zone A. 1.

Uses permitted.

Agriculture; horticulture; dairy and poultry farming, milk chilling centres, farm houses and their accessary buildings and uses within the plot area limitation of minimum one acre plot; uses specifically shown or stated in the land use plan, like urban villages. Brick kilns and removal of clay upto 8 ft. depth beyond a distance of half a mile from the urbanizable limits of 1981.

Uses permissible if allowed by competent authority after special appeal.

Places of worship etc. schools; libraries, and educational and cultural building; parks and other public and semi-public recreational use not conducted for profit; storage, processing and sale of farm products on the property where produced; the servicing and repair of farm machinery and the sale of agricultural supplies; public utility and buildings.

Uses prohibited.

 $All\,uses\,not\,specifically\,permitted\,herein.$

Rural.

11. Use Zone A.2.

Uses permitted.

All uses permitted in Agricultural Green Belt use zone.

49

Uses permissible if allowed by competent authority after special appeal.

Retail shops and service uses to be located in shopping centres; milk chilling stations and pasteurisation plants; cottage industry and such light industry which use agricultural and rural produce and not causing nuisance; rural colleges, boarding houses and hostels; scientific and industrial research laboratories, not to be operated for the production of goods or other materials for sale except as may be produced by a small pilot plant provided there is no nuisance caused and no part of the structure is placed closer than 100 feet from any dwelling or an adjoining premises on from any property line or road; excavation of clay, gravel, top soil and other earths and materials upto 8 feet depth; stone quarring; bus, or railway passenger and freight stations; landing fields for planes and their necessary appurtenances; utilities and buildings; area needed for Defence purposes, wireless transmitting and weather stations.

Uses prohibited.

Uses not specifically permitted herein.

Retail shopping.

12. Use zone C. 1.

Uses permitted:

Retail shops; business and professional offices; service uses like barbers and tailors; laundry and dry cleaner's shops etc. restaurants and entertainment places; residences, social and welfare institutions provided they are located in first and higher floors; clinics; meat, fish and fruit markets; roofed storage for legitimate retail business; public and semipublic recreational uses; public utilities and buildings. Parking area requirements for all uses must be approved.

50

Master Plaln for Delhi :-1-9-62 Source - DDA

Uses permissible if allowed by competent authority after special appeal.

Social and welfare institutions, petrol filling stations, coal, wood or timber yards, service garages; light manufacturing with-out nuisance or hazard and employing not more than 4 persons with or without power provided the goods manufactured are sold on the premises in retail; taxi and scooter stand, bus terminal Parking area requirement for all uses must be approved.

Uses prohibited.

All uses not specifically permitted herein.

General Business and commercial, District Centre, Sub-district centre.

13. Use Zone -C. 2.

Uses permitted

All uses permitted in C.1 use zone; also hostels and boarding houses; colleges, schools, research institutions; service garages, warehousing and covered storage, local and central government offices. Parking area requirements for all uses must be approved.

Uses permissible if allowed by competent authority after special appeal.

All uses allowed with special appeal in C.1 zone. In addition, newspaper and printing presses. The following may also be allowed in specific areas under detailed plans or zonal plans of the shopping centre: light manufacturing and service industries without nuisance or hazard and not employing more than 10 persons with or without power, junk yards. Parking area requirements for all uses must be provided.

$Uses {\it prohibited}.$

All uses not specifically permitted herein.

Wholesale:

14. Use Zone C. 3.

Use permitted:

Wholesale and retail shops, storage for wholesale uses except when specifically prohibited, business offices; restaurants and residences provided they are located in first and higher floors; public utilities and buildings, parking, loading and unloading requirements must be approved for all uses.

Uses permissible if allowed by competent authority after special appeal:

Truck terminal and parking; schools, clinics, social and cultural insitutions; recreational uses, storage and markets dealing with meat and fist. Parking, loading and unloading area requirements must be provided for all uses.

Uses prohibited:

Storage of petroleum and other inflammable materials; storage of any material causing dust and colour; Junk yards. All uses not specifically permitted herein.

*Flatted Factory: 15. Use Zone M. 1.

Uses permitted.

Industries conforming to performance standards as given in illustrative list, which would not cause excessive, injurious or obnoxious

 $* Illustrative\ list of\ permissible\ industries\ with\ conditions\ to\ be\ fulfilled\ is\ given\ in\ Schedule\ of\ Industries\ for\ each\ of\ the\ use\ zones.$

noise, vibration, smoke, gas fumes, odour, dust, effluent or other objectionable conditions and employing not more than 20 workers with power or 40 without power, covered storage for industry. Public utilities and buildings; parking, loading and unloading requirements must be approved for all uses.

Uses permissible if allowed by competent authority after special appeal:

Bus and truck terminals, railway passenger and freight terminals; petrol filling stations, taxi and scooter stands, junk yards. Dwellings for watch and ward staff, canteen and recreation facilities for the employees.

Uses prohibited:

General residences; retail and commercial business unless incidental to and on the same site with an industry. All uses not specifically permitted herein.

Work-cum-industrial centres.

16. Use Zone M. 2.

Uses permitted:

Same as in M. 1 Use Zone.

Uses permissible if allowed by competent authority after special appeal.

Same as in M. 1 use zone except that F.A.R. and coverage etc. are different as given later on.

Uses prohibited:

All uses not specifically permitted herein.

Special Industry. 17. Use Zone M. 3.

Uses permissible if allowed by competent authority after special appeal:

Only such industries as given in the illustrative list that do not create nuisance of any type will be allowed. Canteen, recreation and residences to employees provided the density is not more than 25 persons per acre on the site.

User prohibited:

All uses not specifically permitted herein.

Light Industries and Service Industries:

18. Use Zone d M. 4.

Use permitted:

All industries permitted in M. 1, M. 2 and M. 3 use zones and other given in the list of industries and employing not more than 50 workers with power and 100 without power, service industries; warehousing and storage; public utilities and buildings and agricultural use in existing agricultural land until the area is required for development. Parking, loading and unloading area requirements must be approved for all uses.

Uses permissible if allowed by competent authority after special appeal.

All uses allowed with special appeal in M. 1 zone. In addition such light and service industries named in schedule which in the opinion of the competent authority will constitute light industry by performance standards even though it employs more than 50 people; junk yards; petrol

filling stations; farm houses in existing agricultural land provided *Uses prohibited:*

Some as in M. 1 use zone.

Extensive Manufacturing Use Zone:

Uses permitted:

All uses permitted in M. 4 use zone.

Uses permissible if allowed by competent authority after special appeal:

All uses allowed with special appeal in M. 4 zone. All industries mentioned in schedule subject to standards stipulated on smoke, odour, fumes and noise produced in the working of theindustry.

Uses Prohibited:

Same as in M. 4 use zone.

Extractive Industrial Use Zone:

20. Use Zone M. 6.

Uses permitted:

Removal of grave, earth, sand etc., extraction of minerals, with any conditions imposed by competent authority; agricultural and uses - incidental to agriculture.

Uses permissible if allowed by competent authority after special appeal:

Nil.

Uses prohibited:

All uses not specifically permitted herein.

Warehousing Storage and Depot Use Zone.

21. Use Zone W.

Uses Permitted:

Warehousing storage and depot for non-perishable and non-inflammable commodities and incidental use. Parking, loading and unloading area requirements must be approved for all uses.

Uses permissible if allowed by competent authority after special appeal:

Warehousing of perishable and inflammable commodities. Dwelling for watch and ward staff. Parking, loading and unloading requirements must be provided.

Uses prohibited:

All uses not specifically permitted herein.

Government offices.

22. Use Zonae G.

Uses permitted.

Local, state and central government offices and use for Defence purposes; research institutions; social and cultural institutions, bus and railway passenger terminals, public utility and building, local municipal facilities, uses incidental to government offices and for their use. Parking requirements must be approved.

Uses permissible if allowed by competent authority after special appeal:

Nil

Uses prohibited:

All uses not specifically permitted herein.

Master Plaln for Delhi :-1-9-62 Source - DDA

Recreational.

23. Use Zone P.

Uses permitted:

All public and semi-public recreational uses including parks, playgrounds, park-ways and boulevards; special recreation areas and special educational and recreational areas; bus and railway passenger terminals and car parking area. Parking area requirements must be approved in all cases.

Uses permissible if allowed by competent authority after special appeal:

Outdoor theatres and drive-in-cinemas, restaurants and selling of etables; public utility and municipal facilities; uses clearly incidental to recreational use which will not create nuisance or hazard. Dwelling for watch and ward staff. Parking area requirements must be privided.

Uses prohibited:

Uses not specially permitted herein.

Public and Semi-public Facilities.

24. Use Zone F.

Use permitted

Local and zonal municipal offices; educational and research institutions, social and cultural institutions; monuments and religious institutions; local municipal and community facilities public utilities and buildings; radio transmitter and wireless stations; cremations grounds and cemeteries. Parking area requirements must be approved for all uses.

Uses permissible if allowed by competent authority after special appeal. Residences and other uses incidental to main use and in no way causing any nuisance or hazard.

Uses prohibited:

All uses not specifically permitted herein.

5. PROVISION REGARDING REQUIREMENTS IN USE **ZONES** DENSITY, COVERAGE, FLOOR AREA RATIO.

SETBACK AND OTHER REQUIREMENTS OF USE ZONES.

I. Residential Use Zone:

General. - For purpose of calculatin density (which is indicated by a suffix like R 50 in the text or as 50 in the Land use Plan for a density of 50 persons per acre) in the residential zones, one dwelling unit will have 4.5 persons.

The density shown in the Land Use Plan for a particular area shall be followed in considering layout plans for the area, provided that the Zonal Development Plans are finalised, approve individual layouts, so as to achieve the overall density prescribed for the area. However, a variation either way upto 15 per cent of the gross densities (shown in the Land Use Plan) may be allowed. The community facilities should be planned on the basis of the actual gross density achieved or that prescribed for the Residential Planning Area, whichever is higher, applying the interpolation method for calculating the various areas, applying the interpolations method for calculating the various areas. In calculating gross residential density shown in the Land Use Plan, all land meant for community facilities (local shopping, neighborhood parks, local open spaces, playgrounds and tot-lots; high schools, primary and nursery schools and other community facilities such as those listed in table 5, page 68 of the Sub-division Regulations, Chapter II), and residential streets upto 80 feet right-of-way should be included. The actual determination of the community facilities (included. The actual determination of the

Development Plans) will depend upon the size of the given layout in acres, and the overall population it is to contain.

community facilities (including community centres to be shown in Zonal

In cases where the given area is sbounded by roads of 80 feet and less only one-halight-of-way of the peripheral roads should be taken into density calculations.

- (1) Major roads of 100 feet and more which are shown in the Land use Plans:
- (2) Open spaces including land under agriculature, semipublic recreation, regional and district parks, large playgrounds, green-linkages and water courses ad shown in the Land Use Plan:
- (3) All the non-residential areas (commercial areas, e.g., business districts, district and sub-district centres, warehouses, wholesale markets, offices, industrial areas, public and semi-public facilities, e.g., colleges, research and cultural institutions, hospitals, public utilities and installations) as shown in the Land Use Plan;
- (4) Transport terminals and installations, such as, railway stations, marshalling yards, forwarding and booking agencies, local and inter-state bus and truck terminals and their depots, airport and the extensive parking areas as shown in the Land Use Plan; and
- (5) All historical building and monuments; burial and cremation grounds and existing places of worship.

Irrespective of the actual number of servants' quarters, for purposes of the density calculations in considenting layout plans, the number of servants' quarters in various sizes of plots will be reconed as under:-

- (a) Plots upto 300 square yards: Nil
- (b) Plots above 300 square yards and One servant's quarter perunits

^{*} Foot-Note: All tall/multistoreyed buildings for commercial development over 13-72 metres (45 feet) in height, shall have stand by generators for electricity within the buildings." (* Refer Para I (6) of Notification No. K-1214(9)/72-UDI dated 24-12-1976.

^{*}Refer Para (I) of Notification No. K-12014/6/75-UD dated 11-12-1975.

(c) above 600 square yards and not exceeding 1,200 square yards

Two servants' quarters per dwelling unit,

(d) Plots above 1,200 square yards: Three servants' quarterr per dwelling unit

Good planning practice for designs of residential area should include.

- (i) Light and air in the buildings;
- (ii) Protection against noise, dust and local hazards;
- (iii) Open space for various family needs;
- (iv) Easy circulation and access, safety from accidents;
- (v) As far as possible regular shape of plots; and
- (vi) A logical arrangement of residential plots by sizes and shapes

The translation of these requirements into actual planning practice would vary with design relations and density patterns.

Individual plots:

(Row houses, detached and semi-detached houses).

(a) *Minimum plot size.* - The minimum size of an individual residential plot for a two-storey, two family dwelling, should be 125 square yards.

Notes:

- (1) Eash servant's quarter shall comprise one habitable room of area not more than 120 square feet floor area, exclusive of cooking verandah, bath room and lavatory.
- (2) The number of persons per servant's quarter mentioned in the above table will be reckoned as 4.5.
- (3) The number of dwelling units on a plot will be reckoned the same as the number of floors permissible plus the number of servants' quartersas mentiond above.

These conditions will not apply 'o 'group housing'.

In the case of low cost housing for low income-groups and slum rehousing the minimum plot size could be 80 square yards but not less.

(b) Plot coverage. - The plot coverage shall be as follows:-

Covera	ige on	each	floor

(I)	Upto 300 square yards	60%
(ii)	Above 300 square yards and not exceeding 600 square yards	50%
(iii)	Above 600 square yards and not exceeding 1,200 square yards	40%
(iv)	Above 1,200 square yards	331/2%

Provided that, in the areas which, prior to the establishement of the Municipal Corporation of Delhi, were included within the jurisdiction of the Delhi Municipal committee, the permissible plot coverage for plots not exceeding 200 square yards shall be as under:-

- (I) Not Exceeding 100 square yards 75% on each floor\.
- (2) Above 100 square yards and not exceeding 200 square yards 66 2/3% on each floor.

Notes:- (1) The area to be covered need in no case be less than the permissible covered area for the largest size plot in the lower category. For example, the area to be covered in a plot of 1,230 square yards will be 40% of 1,200 square yards i.e., 480 square yards and not 1/3rd of 1,230 square yards, which is only 410 square yards.

The permissible plot coverage for plots exceeding 200 square yards may be increased by one-tenth in the case of houses constructed on sites, provided that the enclosed area on the ground floor shall not exceed 25% of the permissible covered area on the first floor.

^{*}Refer Para (II), (III) of Notification No. K-12014/6/75-UD dated 11-12-1975.

^{*}Refer Para (I) of Notification No. F-3(186)/70-MP dated 11-11-1972. Rafer Notification No. J-13037/122-75-UDI dated 27-1-1976

(c) *Floors.* - In individual residential plots, normally only two storeyed buildings may be allowed plus an optional provision of barsati floor at the top. *In individual plots exceeding 200 square yards, a two-storeyed building raised on stilts may be permitted, provided the enclosed area on the ground floor does not exceed 25% of the permissible covered area on the first floor. In individual plots of 300 square yards and above, which front on roads with a right-of-way of 80 feet and above, full three-storeyed construction with a barsati on top may be allowed [except that in the already built-up areas (list given below). to prevent the density from rising, construction shall be limited to two storeys with a barsati]. The ground and first floor coverages will be the same as for any other plot and the second floor coverage shall not exceed that the first floor.

List of built-up residential areas.

- 1. Darya Ganj.
- 2. Jama Masjid.
- 3. Chitli Qabar.
- 4. Bazar Sita Ram.
- 5. Ajmere Gate.
- 6. Chandni Chowk.
- 7. Fatehpuri.
- 8. Lajpat Rai Market.
- 9. Kashmere Gate and Mori Gate.
- 10.Jamuna Bazar.
- 11. Roop Nagar.
- 12. Kamla Nagar.
- 13. Jawahar Nagar.
- 14. Shakti Nagar.
- 15. Prem Nagar.
- 16. Malka Ganj.
- 17. Subzimandi.
- *Refer Para (II), (III) of Notification No. K-12014/6/75-UD dated 11-12-1975.

- 18. Pratap Nagar.
- 19. Kishan Ganj.
- 20. Sarai Rohilla.
- 21. Bara Hindu Rao.
- 22. Sadar Karim.
- 23. Nabi Karim.
- 24. Qadam Sharif.
- 25. Ram Nagar
- 26. Pahar Ganj.
- 27. Model Basti
- 28. Manak Pura.
- 29. Karolbagh (Area bounded by New Rohtak Road on the North, Anand Parbat on the West, Pusa Road on the South and Faiz Road on the East).
- 30. Rajendra Nagar.
- 31. New Rajendra Nagar.
- 32. East Patel Nagar.
- 33. West Patel Nagar.
- 34. South Patel Nagar.
- 35. Gandhi Nagar.
- 36. Krishan Nagar.
- 37. Geeta Colony.
- 38. Shahdara.
- 39. Rohtas Nagar
- 40. Balbir Nagar.
- 41. Rana Pratap Bagh.
- 42. Model Town.

- 43. Timarpur.
- 44. Shivaji Park.
- 45. Moti Nagar.
- 46. Mansarover Bagh.
- 47. Rajouri Gardens.
- 48. Ramesh Nagar.
- 49. Vijay Nagar.
- 50. Kingsway Camp.
- 51. Punjabi Bagh.
- 52. Multan Nagar.
- 53. Kirti Nagar.
- 54. Tilak Nagar.
- 55. Indrapuri.
- 56. Defence Colony.
- 57. kailash and Extension.
- 58. Nizamuddin.
- 59. Golf Links.
- 60. Sundar Nagar.
- 61. Malviya Nagar.
- 62. Hauz Khas Enclave and Extension.
- 63. Lajpat Nagar.
- 64. Jangpura.
- 65. Jorbagh.
- 66. Diplomatic Enclave
- 67. Kalkaji.
- 68. Green Park.
- 69. Shahdara Town.
- 70. Dilshad Gardens.

- 71. Also, colonies sanctioned by the Municipal Corporation of Delhi in the past are included in the above list since they have been sanctioned on the basis of having two dwelling units per plot and the maximum height permitted.
- 72. All the regularised unauthorised colonies should have covered area on the terms and conditions on which they have been regularised, such as, one or two storey structures, one or two families per plot.
- 73. Certain areas of Civil Lines and New Delhi which are recommended for re-densification should be on the basis of zonal development plans for the density proposed in the Master Plan and number of storeys should not be according to the width of the road on which they front.

Where a barasti is permitted, not more than 25 per cent of the covered area on the ground floor or the floor immediately below the barsati or 500 square feet, whichever is less, should be allowed toble covered including the area covered by a staircase leading to the barsati. The barsati may be enclosed.

- (d) *Frontage of plots.* Each individual plot should provide a minimum frontage of 18 feet on the access road. The ratio of depth to frontage should normally range between 3.0 to 2.0 is to 1.0.
- (e) *Set back lines.* The following set back lines are prescribed depending upon the depth of plot for individual plots.

(f) Front set back:

Depth of plots.	Minimum set back required from plot line.				
(a) Upto 60 feet			10 feet.		
(b) Above 60 feet and not exceeding 90 feet .			15 feet.		
(c) Above 90 feet and not exceeding 120 feet .			20 feet.		
(d) Above 120 feet and not exceeding 150 feet.			25 feet.		
(e) Above 150 feet and not exceeding 200 feet .			30 feet.		
(f) Above 200 feet			40 feet.		

(ii) *Rear set back line*. - Besides the front set back line, set back should also be provide dat the rear of the plots according to municipal bylaw subject to height restrictions to allow sufficient light and air circulation.

(iii) *side set back line.* - Side set backs of at least 10 feet from plot line on each side should be left on detached plots.

In semi-detached plots side set back on one side should be at least 10'-0" from the plot line to the building line.

for row housing, corner plots should be suitably set back from the road right of way, according to traffic requirements.

(f) Service Lanes.- The minimum width of the service land shall be 15 feet but it may be reduced to 10 feet in the case of low cost housing schemes sponsored by Government, semi-Government or other public bodies. It is not necessary to have these in the case of detached, and semi-detached housing. If provided, it should have a minimum of 15 feet right of way.

In the case of row and terraced houses, service lanes may be provided. it should have a minimum right of way of 15 feet. In case of length of the lane is more than 500 feet, the minimum right of way should be 20 feet.

Where garages are to be provided, in order to allow for easy turn of motor vehicles, the grages should be set back 15 feet from the centre line of the service lane.

Group Housing:

Group hosing development (two and multi storey apartments or low cost housing schemes) which will not be sub-divided into the customary streets and plots, will be governed by good design standards to ensure open spaces and community facilities. The intensity of use and the net density in these are intended to be higher that stipulated in the Plan, provided the average gross residential density of the area under development of which the group housing is a part, is in accordance with the density requirements of the Plan. Also, no limits on imposed in areas near monuments, airport etc. Access to dwellings could be provided by walkways and pedestrian paths and their widths would also be governed by design requirements. Adequate provision has to be made for parking and servicing and the walkways should open on a residential street of at least 45 feet or cul-de-sac or loop street of at least 30 feet.

In case of group housing having more than tow storeys, steps must be taken to ensure water in the higher floors. For this purpose booster pumps and overhead tanks must be installed. Lifts and suitable stair-cases should be provided for more than 4 storey high buildings. Also open balconied for open air sleeping or air conditioning must be providing. In order to encourage higher storey development which will provide more that 4 storey high buildings. Also open balconied for open air sleeping or air conditioning must be provided. In order to encourage higher storey development which will provided more open spaces by having lesser coverage, a higher floor area ratio is allowed*. The minimum plot size for this sort of development is one acre. Set back and the arrangement of blocks, garages etc. will have to be approved in each case so that a healthy development is ensured. The following coverage and floor area ratio for various densities are proposed (low cost group)

^{*}Refer Para (v) of Notification No. K-12014/6/75-UD dated 11-12-1975.

housing schemes sponsored by Government, semi-Government and other public bodies are not covered by this): -

Gross resider (Persons p		•	M	axin	num coverage %	Maximum F.A.R.*
25					25	75
50					25	75
60					25	75
75					30	125
100					331/3	150
125					331/3	150
150					35	150
200					35	175
250					35	175

^{*} F.A.R. or floor area ratio = $\frac{\text{Floor area x } 100}{\text{plot area}}$

Floor area is defined as plinth area on all floors unless specifically excluded.

Notes: (1) The coverage will be calculated on the basis of the whole area reserved for group housing after deducting:-

- (I) the area of collection streets 80 feet wide and feeder streets 60 feet wide around and whiting the group housing area. (Residential streets, loop streets, cul-de-sac, service lances will not be deducted.
- (ii) the area for schools and other community facilities within the group housing area; and
- (iii) the area for neighbourhood parks within the group housing area as shown in the Zonal Development Plan (local open spaces, playgrounds and tot-lots will

- not be deducted).
- (2) The above basis will apply even in the case of group housing covering an entire neighborhood, the whole of which will be treated as one scheme.
- (3) In density calculation for group housing, each servant's quarter will be reckoned as one family.
- (4) In density of a particular neighborhood in which the group housing area is located will be as shown in the Zonal Development Plan and the corresponding figures in the above table will be operative.*
- (5) The areas of barsati and mumti to the extent permissible for houses on individual plots will not be reckoned in the F.A.R.

II. "Agricultural Green Belt" and "Rural" Use Zones:

In order to preserve these zones in agricultural use certain restrictions on the size of the dwelling units should be imposed. They are as follows:-

Size of farm	Maximum coverage of dwelling unit	Maximum beight of of dwelling unit		
(1) 1 to 3 acres	500 sq. ft.	Single storey maximum height 20 ft.		
(2) Above 3 acres	1,500 sq. ft.	Do.		

- **N.B.** (1) Set back for dwelling house should be 50 feet from any boundary line of the property.
 - (2) Where the property abut on urban road, the dwelling house building should be set-back from the centre line of that road by 200 ft. Where the property abuts a villageroad, the building set-back from the centre line of that road should be 100 feet
 - (3) No dwelling unit should be built within two furlongs of the right of way of nay National highway.
 - (4) In the case of special farms, for example, horse-breeding farms covering a large area, Government may allow a larger coverage as may be considered necessary for farm houses to be built on these farms

^{*}Refer Para (A) of Notification No. K-12014/675- UD dated 11-12-1975.

^{*}Refer Para (iv) of Notification No. K-1204/6/75-UD dated 11-12-1975.

^{**}Refer to Para I(5) of Notification No. K-12014(9)/72-UDI dated 24-12-1976.

III. Government Offices:

(a) *The Central Secretariat Complex.* - In order to achieve architectural composition and intensive use, the following provisions are stipulated.

Maximum ground floor coverage including 5% for covered parking

Another 5% may be allowed for covered garages for car and cycle parking. This area for parking on the ground floor will not be taken into consideration for calculating F.A.R. but the office space above it in first and upper will be counted. The total ground coverage including covered parking will not exceed 30%

Semi-basement will allowed for parking, servicing and storage and will not be taken in for F.A.R. calculation. It shall not exceed the ground floor coverage. Upto 50 per cent of the open area may be utilized for open parking and roads and the rest may be landscaped.

(b) All other locations including those in District Centres:

	*F.A.R.										150
Maximum groun	d floor cov	erage	includ	ling 5	% for	cover	ed par	king			20%
Extra covered par	rking .										5%
Semi-basement and open parking as above.											

*IV. Commercial and Retail:

(a) Connaught Place Extension, Minto Raod and Ranjit Singh Road. - The size of plot will narturally depend on the layout of the commercial area but any further sub-division of plots in the Connaught Place and its proposed extension area is not desirable.

60

Master Plaln for Delhi :-1-9-62 Source - DDA

F.A.R				400
Maximum ground floor coverage .				50%
Covered garages for cars & cycles .				5%
First floor coverage				50%
Coverage for second floor and above				35%

Semi -basement, covering not more than the ground floor coverage, will be allowed for parking, servicing and storage and will not be taken into F.a.r. calculations. Upto 50% of the open area may be utilised for open parking and roads and the rest may be landscaped.

Minimum set back.

			For plots fronting 150 feet wide road.	For plots fronting 100 feet wide road
				and less
Front			50 feet	40 feet
Rear			20 feet	20 feet
Sides			15 feet	15 feet

Service lane, if provided, should have a minimum right of way of 30 feet. In case there is a service lane on the side or rear, then the set back for ground and first floor is opti8onal but should not be less than 20 feet for second floor and above.

(b) F.A.R., coverages etc. for already built-up Commercial areas in the Walled City like Chandni Chowk, etc. (List given below): - In such cases, coverages permissible would be as applicable in the existing building bye-laws of the Municipal Corporation of Delhi, e.g., 80 per cent on the ground floor and 70 per cent on the first floor and so on, with 150 F.A.R. for a two-storey construction, 200 F.A.R. for a three-storey construction, 250 F.A.R. for a four-storey construction and so on,

TILUICUIT	uiii s	civu					
			For plots	For plots 1/4 acre	For plot		
			below 1/4	to acre.	above 1 acre		
			acre.				
Front			15 feet	25 feet	50 feet		
Rear			15 feet	15 feet	25 feet		
Sides			Optional	15 feet	15 feet		

Basement allowed for parking, servicing and storage should not exceed ground floor coverage. Not counted for F.A.R. calculations.

Special consideration for F.A.R. coverage, set backs, parking etc. will be specified for special trades like grains, oil, timber and other building materials.

VII. Industries and Manufacturing:

(a) Flatted Factory (in central areas).

Minimum plot area...One acreMaximum No. of floors...6Maximum coverage......F.A.R..........

62

Master Plaln for Delhi :-1-9-62 Source - DDA The minimum number of floors allowed is two. A basement, not exceeding ground floor coverage, is allowed for storage and servicing only and will not be taken into account in floor area ratio calculations.

Front					50 feet
Rear					50 feet
Sides					20 feet

(b) Industrial-cum-Work Centre

(In District Centres and in outlying areas)

Minimum plot area .			•	two acres
Maximum No. of floors				10
Maximum coverage .				33-1/3%
Floor area ratio				120

The minimum number of floors allowed is tow. A basement, not exceeding ground floor coverage, is allowed for storage and servicing only and will not be taken into account in floor area ratio calculations.

Minimum set backs as for flatted factory above.

(c) Special Industrial.

Minimum plot area...two acresMaximum coverage......Maximum height......60 feetFloor area ratio.........

Minimum set back.

Front					100 feet
Rear					50 feet.
Sides					20 feet.

(R. G. Gupta) www.rgplan.org

(d) Light Industries.

(May be relaxed in special cases upto 7 acres).

The following sliding scale of coverages and floor area ratios is prescribed. A basement will be allowed as in the case of a flatted factory.

	Plot area in acres		Maximum plot coverage	F.A.R.
(1)	400 square in acres		50%	60
(2)	Above 1.00 acre to 3.00 acres		45%	60
(3)	Above 3.00 acres to 7.00 acres		40%	50

Minimum set backs

	iuiit s	0	For plots below 0.25 acre.	For plots 0.25 acre and above upto 1 acre.	For plots above one acre.
Front Rear Sides			15 feet 15 feet Optional	20 feet 15 feet 15 feet on one side and 10 feet on the other.	50 feet. 50 feet. 20 feet.

(e) Service Industries:

Same regulations as for light industries.

(f) Extensive Industries.

The following sliding scale of coverage and floor area ratios is prescribed.

	Plot area in acres		Maximum F.A.F Plot coverage			
(1)	0.25 to 1.00 .			50%	50	
(2)	Above 1.00 to 3.00			45%	45	
(3)	Above 3.00 to 7.00			40%	40	
(4)	Above 7.00 .			30%	30	

A basement will be allowed as in the case of a flatted factory.

Minimum set backs:

			For plot size upto one one acre	For plot size above one acre
Front			20 feet	50 feet
Rear			15 feet	50 feet
Sides	٠	٠	15 feet on one side and 10 feet on the other.	20 feet

VIII. Industrial Uses*:

	For plot size upto one one acre	For plot size above one acre
Maximum coverage including covered parking	33-1/3%	25%

^{*} F.A.R. will be determined on the merits of eachindividual case depending upon the location and the nature of use.*

^{*}Refer para I of Notification No. K-12014(9)/72-UDI dated 24-12-1976

B. SUB-DIVISION REGULATIONS

1. NATURE OF REGULATIONS:

The purpose of these regulation is to guide the development of the new areas in accordance with the Land Use Plan. As long as this is done along sound planning principles with adequate space standards, the future of the city is assured. This will obviate the necessity of costly corrective measures which would be necessary if sub-standard growth is allowed to take place. While the requirements regarding water supply, sewerage, grading and surfacing of streets, street lighting etc. will be governed by municipal bye-laws, the sub-dividion regulations here will be confined to standards for street widths and community facilities which are laid down as a sliding scale according to the density.

2. DEVELOPMENT ZONES:

For planning purposes Delhi has been divided into eight Planing Division. These are based on the physical features, historical growth, character of development, intensity of land use and the circulation pattern. The purpose in making these division is to have move or less self-contained units for purposes of living, employment and recreation. The Division boundaries overlap municipal boundaries.

These Division are too large an area for which to prepare development plans. Portions of it may not be developed for the next 10 to 15 years. Hence to obtain workable units, the planning division have been further sub-divided into 136 development zones as shown in the accompanying map. Change in land use, existing physical features, railway line and major arteries act as boundaries for the zones. Municipal boundaries, election and census wards have also been taken into

consideration in drawing up these boundaries though they have not been a decisive factor in their delimitation. The "Development Zones" are not to be confused with "Use Zones" referred to earlier.

Plan	ning Divisions	No.	No. of Development zones							
A	Old City .									28
В	City Extension									7
C	Civil Lines									20
D	New Delhi .									21
E	Shahdara .									16
F	South Delhi									19
G	West Delhi .									17

3. ZONAL DEVELOPMENT PLANS:

After the Master Plan is sanctioned, all new developments shall take place according to Zonal Development Plans which shall show the following features in broad outlines:

- (a) Approximate boundaries of Residential Planning Areas or neighborhoods along with the gross residential density of each neighborhood.
- (b) Major internal roads and trunk services.
- (c) Community Centre and Residential Planning Area Centre.
- (d) Approximate locations of High Schools and Primary Schools.
- (e) Neighbourhood Parks.

*Refer para I of Notification No. F-3(246)/66-M.P. dated 8-3-1968

Master Plaln for Delhi :-1-9-62 Source - DDA This is to insure that the further development is a healthy one, with provision made for community facilities and services. Only by providing these will the community function and grow up in a manner that will help avoid future slums social imbalances.

4. COMMUNITY STRUCTURE:

The pattern of self-contained planning divisions has been conceived from the bottom upwards. The lowest tier in the urban complex will be the "housing cluster" containing 750 to 1000 population. These clusters roughly correspond to the traditional "Mohallas" or "Kuchas" in the Old City and, in fact, is found in its rudimentary form in almost all of the Indiancities and towns. It will hhave as its nucleus a nursery school with a tot lot. These housing cluters or "Mohallas" grouped together around a primary school and convenience stores with a small park will form a "residential unit" containing a population of between 3500 to 5000 people.

However, for purposes of a wider range of community activities, the "residential planning area" of 12,000 to 15,000 population (containing roughly 3000 families) is envisaged, which will have for its focal point a high school and a community hall with adequate neighbourhood shopping for the day to day needs. For the provision of additional facilities such as a health centre, library, cinema, better shopping andrecreation centres, three residential planning areas have been grouped to form what is called a community with a "Community Centre"

Several of these communities have been grouped to form a District with a "District Centre". This is a composite retail shopping centre with commercial and service uses. In some cases they will have a small area for Government Offices and an industrial work centre to provide employment. This will serve a population ranging from 150,000 to 250,000.

URBAN DELHI

Eight Planning Divisions (each 300,000 to 750,000 population).

3 Central Business Districts and 15 District Centres,

(each District Centre serves 150,000 to 250,000 population.)

Community Centre for 40,000 to 50,000 population.

Residential Planning Areas (each 12,000 to 15,000)

Residential Units (each 3,500 to 5,000 population)

Housing Clusters (each 750 to 1,000 population).

The District Centres have been shown in the Land Use Plan. In the Zonal Development Plans, the community centres will have to be shown, as also the residential planning area centre. Also, high schools residential planning area centres. Also, high schools, residential planning area parks and primary schools have to be shown. The other facilities listed in the standards will have to be shown in detailed layout plans.

5. STANDARDS FOR 15,000 POPULATION:

The basis on which the standards have been arrived at is fully discussed in the chapters on "Education, Recreation etc." and "Housing and Neighbourhood" in the work studies. Here only the standards are given. Standards for the Old City are given separately.

A variation upto 5 per cent. either way of the unit standards (plot sizes for schools, health centres, etc.) of community facilities will be allowed.

Pre-primary schools:

Sites will have to be reserved for 10 pre-primary schools varying from 0.2 to 0.75 acre each, according to density varying from 0.2 to 0.75 acre each, according to density varying from 200 to 50 persons per acre. Optimum size of schools is 75 students.

65

Master Plaln for Delhi :-1-9-62 Source - DDA (R. G. Gupta) www.rgplan.org

Basic primary schools:

There will be 4 schools for the age group 6 to 14, the optimum size being about 600 students. The size will vary from 1.5 to 2.5 acres for densities varying from 200 to 50 persons per acre. Total covered area is about 15,000 sq. ft.

Higher Secondary schools:

This will have overlapping age-groups with primary schools viz. 11 to 14. So the students attending this will be in the age group 11 to 17, the optimum size being about 1,000 students. There will be one school of size varying from 5 to 10 acres for densities varying from 200 to 50 p.p.a. Total covered area is about 35,000 sq. ft.

Table 1: Standards for size of schools (except Old City)

Gross Residential density	U	er Secondary ool for 1,000 Pupils	Basic Prima for 600	-	Pre-primary School for for 75 pupils		
Persons per acre	Aces	Storeys	Acres	Storeys	Acres	Storeys	
*25	12.00	1 to 2	4.0	1	1.0	1	
50	10.00	1 to 2	2.5	1	0.75	1	
60	10.00	1 to 2	2.5	1 to 2	0.75	1	
75	8.00	2 to 3	2.5	1 to 2	0.50	1	
100	7.00	2 to 3	2.0	1 to 2	0.50	1	
125	6.00	3 to 4	2.0	2 to 3	0.25	1	
150	6.00	3 to 4	2.0	2 to 3	0.25	1	
200	5.00	4	1.5	3	0.20	1	

Parks and open spaces:

District Parks have been shown in the Land Use Plan. In addition,

66

Master Plaln for Delhi :-1-9-62 Source - DDA local parks and playgrounds have to be shown in zonal and detailed plans. The standards are on a sliding scale and vary with density.

Table 2: Standards for parks and playgrounds for 15,000 population (except in Old City)

Gross re	esidenti	al der	sity	Parks	Playgrounds	Tot-lots	Total open space	
Persons	s per acr	e		acres	acres	acres	acres	
25				19.50	9.00	1.50	30.00	
50				16.50	9.00	1.50	27.00	
60				14.50	9.00	1.50	25.00	
75				14.50	7.00	1.25	23.00	
100				14.25	6.00	1.25	21.50	
125				10.00	4.00	1.00	15.00	
150				10.00	4.00	1.00	15.00	
200				9.00	2.50	0.75	12.25	

NOTE: - Area under neighbourhood parks will be shown in Zonal Development Plans, whereas local parks, playgrounds and tot-lots will be shown in the detailed layout plans.

Shopping:

"District Centres" have been shown in the Land Use Plan and will have 200 to 350 shops for 1.5 laksh to 2.5 lakhs population. A few "Community Centres" which serve 40,000 to 50,000 population have also been shown. Others will have to be shown in Zonal Development Plans. These will have 80 to 100 shops. The next level is local shopping at the "Residential Planning area centre" of about 15 to 20 shops to cater for 12,000 to 15,000 population. Then there would be 4 to 6 shops called "convenience shopping" for 3,500 to 5,000 population.

Table No. 3 gives the various shopping centres.

^{*}There are no new areas under a density of 25 p.p.a. and the standards given above pertain to existing areas, which may, at a later stage, be redeveloped.

Table 5: Standards for other Community Facilities.

Description	Standard	Remarks
1. Post & Telegraph Office with delivery and booking	6,000 sq. ft. floor space and 4 staff quarters for 100,000 population.	One to be located in one out of every two community centres.
1B. Telephone Exchange, units of 10,000 lines	Half acre.	To be located in community centres or in specific location
2. Electric sub-station	A plot 40' x 40' with storage space.	In shopping centres.
3.Health Centre. Out patients + 15 beds + staff quarters.	One acre for 22,000 population.	May be located in District or Community Centres or in Residential Planning Area centres.
4. Police stations with staff quarters	1.5 to 2.5 acres for 75,000 to 100,000 population. size of plot depends on density and number of storeys.	To be located in District Centres or in one out of tow community centres.
5. Cinemas	One No. for 50,000 population, size varying from 0.50 to 0.75 acres for 500 capacity essential parking facilities, For larger capitity more area is required	To be located in District and Community Centres.
6. Fire Station with staff quarters	1.5 to 2.5 acres within 3 mile distance.	to be located in District or Community Centres.
7. Religious Building	Half an acre for 15,000 population.	In Residential Planning Area centres.
8. Community Hall and Library	For 15,000 population.	In Residential Planning Area centres.
9. Petrol pumps, service industry and service garages.	With suitable parking areas.	In District and Community Centre.

68

Master Plaln for Delhi :-1-9-62 Source - DDA

Streets.

The amount of land required for streets will depend upon the type of housing development proposed in the detailed lay-out plans. To guide these along desirable lines the percentage of dwelling units or community service personnel, detached and semi-detached plots, row housing and multi-family apartment hosing, various densities have been given in Table

9. The percentage of land in streets can be reduced considerably by having larger areas in group housing and multi-family apartments rather than in individual plots. Hence, two sets of percentages have been given in Table No. 8, for streets and for area available for residential use. The more area is used for streets, the less is available for residential use. The following standards for streets are laid down in Table 6.

Table 6: Streets in Residential Areas.

				30 ft rt of way	Maximum length 500 ft. sufficient turning radius.
				•	Maximum length 1500 ft.
				20 ft. rt. of way	Maximum length 1000 ft.
				15 ft. rt. of way	Upto 500 ft. length.
				45 ft. rt. of way	
				60 ft. rt. of way	
				80 ft. rt. or way	
	· · · · · · · · · · · · · · · · · · ·	 	 		

Notes: - The provision regarding width of cul-de-sac, loop streets and residential streets willnot apply to low cost housing schemes sponsored by Government, semi-Government and other public bodies.

Special Space Standards.

In view of the extreme difficulty in finding enough land for community facilities space standards are relaxed for the Old City. Table No. 7 gives the space standards. Schools etc. may be started by the Municipal

Corporation on an *ad-hoc* basis until zonal development plans are prepared for these areas. Also construction of school buildings may be started on such area as is immediately available and the area increased subsequently to the standard laid down, as and when it become practicable.

Table 7 : Special Space Standards for the Old City.

(Walled city, Pahar Ganj, Motia Khan, Qadam Sharif, Sadar Bazar, Subzi Mandi, Patel Nagar and Karolbagh Area.)

Descrip	otion			Standard for 1st stage	Ultimate size	REMARKS			
Higher Secondar	ry Scho	ools.	٠	0.5 acre	1.5 acres	This standard for a school of 1,000 students to serve 15,000 population. For 500 students, the minimum first stage area could be 0.25 acre. The covered area could be 50% if the entire ground floor was available as playground; otherwise the built up area should not exce 33 1/3%.			
						The school may be used as a community centre also.			
Primary School			·	0.25 acre	0.75 acre	This standard is for a school of 600 students to serve 3,750 population. For 300 students the minimum first stage area could be 0.125 acre. Percentage covered area to be same as for Higher Secondary covered area to be same as for Higher Secondary Schools. it may also have a nursery school attached.			
Open space				0.25 acre per 1,000 population.	0.30 acre per 1,000 popul- ation	The open spaces should, as far as possible, be provided near school. Minimum plot area of an open space should be 200 sq. yds.			
Health Centre	•			300 sq. yds. per 22,000 population.	300 sq. yds.	100 sq. yds. of built up area with 3 storeys. Total covered area 300 sq. yds.			
Police Station	•		٠	1.5 acres per 758,000 population	1.5 acres				
Fire Station			٠	1.5 acres per 1,00,000 population.	1.5 acres				

NOTE: It must be stated that this table is a guide only but the competent Authority concerned may relax to the extent necessary according to circumstances.

NOTE: - (1) Where areas have been earmarked for low income group housing or for the "Jhuggi and Jhonpari" Scheme, they should be intergrated with the neighbourhood and the community facilities provided should take them into them into account.

⁽²⁾ The above proposals are indicative only and not mandatory.

APPENDIX 1

POLICY NOTE ON INDUSTRIES

This note presents the general back-ground and some factors which have a significant bearing on formulating a policy on the provision and location of industries in Delhi Region.

1. Existing Situation.

According to 1951 Census approximately one-sixth of the economically active population of Delhi was engaged in manufacturing as a principal occupation. Since that time manufacturing employment in medium and large scale industries has increased by about 40 per cent and n the basis of the National Sample Survey of the small-scale industries in 1954, it may tentatively be concluded that there has been a similar increase in small scale and handicraft employment in medium and large scale industries has increased by about 40 percent and on the basis of the National Sample Survey of the small-scale industries in 1954, it may tentatively be concluded that there has been a similar increase in small scale and handicraft employment.

Due to an abnormal influx of population immediately after the partition of the country, and subsequent increase in Central Government activities, there is a considerable number (estimated to be nearly on lakh) of people engaged in building construction. The latest reports from the Bureau of Economics and Statistics, Delhi State, show that there are in all 783 factories: of these only 6 factories employ more than 1,000 workers and there are only 67 firms which employ more than 100 workers.

Compared with other metropolitan centres, Delhi's organized

industry is relatively small. The major sources of employment are government, trade and services, and to a considerable extent manufacturing employment is in trades which serve the local population. There is, however, a large unorganized employment in small industries and handicrafts. The organized industrial sector which serves a market larger than Delhi has also been growing steadily in recent years.

There is every likelihood that considerable further growth may be expected in the governmental, professional and service industries sector in Delhi. As a national capital, the city is certain to attract more cultural and professional activities, and as the major commercial centre in North-West India, Delhi is activities will bring relatively high income people to Delhi and this, in turn, will stimulate retail trade and a multitude of personal services.

It is, however, desirable to prevent too rapid a growth of Delhi since this would increasingly tax public utilities, water supply and sewage system, electric power supply, and other community facilities such as school, parks, playgrounds which are already in short supply.

During the next two decades, however, the increase in population is bound to generate the need for certain essential services, additional consumer goods, and industries required to maintain a big metropolitan centre like Delhi. Considering the relatively low proportion of 17.3 per cent* people engaged in occupations related to industries at present, a certain amount of industrialization is, however, desirable.

*A study of 77 largest Indian cities reveals that a city tends to show predominantly industrial character when more than 30% of its working population becomes engaged in industrial production.

At present there is considerable unemployment, and with the easing up of the unusual building activity in the next ten or fifteen years, it is likely that unemployment may further increase unless other avenues of employment for the building workers are opened.

Delhi is now the third largest urban centre in India, and since it is the National Capital, and a centre for many specialized business, cultural and educational activities, the level of average income in Delhi is probably somewhat higher than in most other India cities. This consequently means that there is a relatively greater demand for a variety of consumer goods in Delhi. Since, in many consumer goods industries, the cost of shipping of finished products is considerably higher than the cost of shipping the raw mterials, it may be economical to establish certain industries, the products of which are mainly consumed in Delhi.

On the basis of these considerations it may be said that a certain degree of industrialzation would be desirable both economically and socially. Even if the percentage of people engaged in industrial centre, but it can be said that 25 per cent of working population in industries properly planned and located would not spoil the pleasantness and degnity of a National Capital. Quite aside from any increase n the percentage of industrial workers, it may be expected that the manufactureing employment in Delhi will increase very substantially as a result of the increase in population.

It should further be noted that in the past only a small portion of the industrial working force has been employed in large scale industry. Probably not more than 20 per cent of all persons in livelihood class V are in relatively large plants, the rest being accommodated in small and even minute enterprises. Policies with respect to the provision of industrial land may, therefore, be based on the expectation that small and medium sized industries will grow, and that in time—the bulk of manufacturing employment will be shifted out of handicraft and very small shops into the organised sector of manufacturing. In this case there need not be any growth of very large manufacturing plants employing over 500 employees in the immediate urban areas.

II. Considerations for Future industrialization:

Having decided that a certain amount of industries would be feasible in Delhi, the second question is to examine the considerations which should govern the policy of industrial establishment and location. Following are some of the major points.

- 1(a) Existing industries should not be discouraged or expelled; attempts should be made for their better and more efficient operation operation.
- (b) In case of objectionable industries or those located in residential or congested areas, special attempt should be made to induce them to move out from congested areas into specified industrial areas.
- 2. In allowing new industries, preference should be given to industries which are essential for either feeding, servicing or maintaining Delhi's population.
- 3. The relatively high level of income in Delhi would make in economical that certain types of consumer goods that are mainly consumed in Delhi may be produced in or ground the city.

- 4. Industries associated with administrative, educational and cultural activities of Delhi may also be encouraged to a point (for example printing and publishing firms).
- 5. A good proportion of Delhi's industrial population possesses some highly developed skills, and in some cases, they have already established small scale plants which require highly skilled workers in such fields as metal working machinery, building, jewellery, wood-work, printing etc. Some of these plants also provide training for apprentices, and there seems to be a growing tradition of skilled occupations. There is every reason to preserve this, and expand this valuable resource of the country skills which are available in Delhi and produce commodities of high unit value.
- 6. Delhi is known for some of its traditional acts and crafts; many of them now unfortunately are still being done on cottage and domestic scale in miserable conditions. There should be no objection to their increase for they provide an additional income to the families. Such industries should be encouraged on cooperative lines.
- 7. Especially since Partition Delhi has become a centre of industrial development based largely on industries employing under 500 people and on very vigorous individual initiative. This growing industry makes a strong contribution to national economic development. In allocating space for industries, preference should be given to those firms which are now inadequately housed in congested locations and which need room for adequate growth. Provision should also be made for rehousing very small industries presently in mixed land uses in the old City.
- 8. Present plans for water supply and electricity supply by the Delhi Municipal Corporation indicate a probable continued shortage of these two basic service. It follows, therefore, that unless the water and power situation improves, industries using large amounts of power and water should be discouraged from locations in Delhi.

- 9. In general, Delhi is not suitable location for heavy industries and for large self-contained industries employing thousands of people. it is also undesirable to locate within the city industries creating problems of waste disposal, smoke fumes, water pollution, etc.
- 10. The location in Delhi of new industries employing more than 500 workers should be carefully considered and it may be advisable to limit them to the Ring Towns and the National Capital Region. The availability of industrial land in Delhi being limited, industries requiring large areas should also be excluded.
- 11. It is desirable that industries should provide adequate housing to its employees and the related community facilities.

III. Creation of Employment Opportunities Around Delhi

At present Delhi is the largest population centre in North-West India, and therefore, is a powerful magnet for attracting people from various parts of the country and particularly from the adjoining States. There is a natural tendency of migration from rural areas and mostly it is unskilled labour. Some studies done by the Delhi School of Economics and others show that migration to Delhi School of Economics and other show that migration to Delhi is relatively greater from Rajasthan and Southern Punjab than from West U.P. or Northern Punjab. A feasible way to discourage excessive migration to Delhi is to establish employment opportunities around Delhi in the Ring Towns especially in the directions where most of the people come from.

IV. The following are illustrative lists of industries that may be allowed in the various zones of urban Delhi. It also has lists of large scale and obnozious industries that need to be kept out of urban Delhi. It may be pointed out that conditions indicated in each case are for general guidance.

Schedule of Industries

'Use Zone' in MASTER PLAN	Location	Type of Industries	Condition to be fulfilled
1	2	3	4
I, "Flatted" Factories and "Work-cum-industrial centnres"	In the areas shown in the Master Plan in the urban core and District Centres as listed in the chapter "Land Use Plan" and other specific sites mentioned therein.	 Bread and bakeries. Confectionary, candies and sweets. Biscuit making. Ice, ice-cream and creamery. Cold storage (small scale). Aerated water and fruit beverages. "Atta chakkies" with power. Tailoring and garment making. Handlooms. Hats, caps, turbans including embrioderies. Hosiery including knitted garments. Gold and silver thread, Kalabattu, zari work Shope lace. 	Only small scale industries are allowed employing not more than 20 workers with power of 10 H.P. or 40 workers without power. Some of the industries like foundation in repair workshops and metal works should be allowed only ground floors so as to avoid nuisance to other industries in the same building.
		 Toy making (earthen, paper, wooden, plastic, metal and tin). Cotton and silk cordages, twine thread and threadball making Velvet embroidered shoes. Webbing (narrow fabrics) embroidery, lace lace manufacturing. Ivory carving. Artwares, and silk screen printing and batik work. Jewellery, gold ornaments and silverwares. Wood and stone carving. Electroplating, minaplating, engraving. Photographs, painting (including signboard painting). Mirrors and photo frames. 	Each industry to be permitted is subject to its performance characteristics namely: 1. noise 2. vibration. 3. smoke 4. dust. 5. odour. 6. effluent. 7. general nuisance.

1 2 3 4

- 25. Umbrella assembly.
- 26. Bamboo and cane products.
- 27. Bamboo and cane products.
- 28. Cardboard box and paper products including paper mache.
- 29. Stationery items including educational and school drawing instruments.
- 30. Furniture making (wooden and steel).
- 31. Cotton and silk printing.
- 32. Printing, book binding, embossing, photogramme etc.
- 33. Small domestic appliances and gadgets (room heaters, coolers, hot-plates, irons, lamps etc.)
- 34. Zip Fastners.
- 35. Musical instruments.
- 36. Optical lense grinding, watch & pen repairing.
- 37. Rubber stamps.
- 38. Manufacturing of trunks and metal boxes, suit-cases and small containers.
- 39. Steel wire products.
- 40. Sheet metals works.
- 41. Metal polishing.
- 42. Laboratory porcelain & dental porcelain wares
- 43. Radio assembly and parts (small scale).
- 44. Florescent light fittings including neon signs.
- 45. Electric lamps, shades fixtures etc.
- 46. Automobile, scooter and cycle service and repair workshop.
- 47. Laundry and dry cleaners.
- 48. General jobbing and machine shops.
- 49. Iron foundries (only when related to other industries.)

		 16. Saw mills and wood work. 17. Automobile parts and castings. 18. Umbrella ribe. 19. Small machines and machine tools. 20. collapsible gates, railings and grills. 21. Expanded metal 22. Venner and plywood. 23. Automobile leaf springs. 24. G. I. Malleable pipe fittings. 	
V. Extensive Industry	North of Rohtak Road.	 Ancillary industries of the Slaughter House. Footwear. Leather upholstery. Other leather goods. Edible oils and fats (Medium Scale). Cattle feed. Flour mills. Toiler Soap. Agricultural appliances and implements (medium scale). 	All industries allowed in the above areas may be allowed here.
Extensive Industry	Okhla Industrial Area (south of small scale industries).	1. Acids and chemicals (small scale). 2. Steel re-rolling mills (small scale). 3. Textile mills (medium scale. 4. Disinfectants and insecticides (small scale). 5. Rubber and rubber goods (small scale). 6. Dyeing, beaching, finishing and processing cloth (including mercerising, calendering, glazing etc.) 7. Printing inks. 8. Ceramics and potteries.	All industries allowed in other areas may be allowed here.
<u></u>		9. Concrete and potteries. 10. Plastic industries. 11. Glass factories (small scale). 12. Iron foundries (medium). 13. Electric motors, transformers, generators.	Some of the industries listed here are noxious but may be allowed as long as they are not on a large scale and have performance standards to keep nuisance to a minimum.

1	2	3	4
		 14. Enamel ware. 15. Steel joining 16. Builder's hardware. 17. Cycles, scooter parts and accessories. 18. Paints and varnishes. 19. Iron pipes (small size). 20. Hume pipes (small size). 21. Centrifugal pumps and small turbines. 22. Tarpaulin and tent cloth. 23. Galvanised buckets. 24. Fuel gases including by-products. 	
Extensive Industry	South Shahdara.	All the above industries.	To enable relocation of existing noxious industries in this area restrictions are relaxed.
Extensive Industry	Mehpalpur Road as shown in Plan.	 Processing of clay and other earths. Pottery and ceramics. 	Industries using largely local materials will be allowed.
VI. Mining and Extractive Industry	Mining area is show in the Plan.	Mining of chalk, clay and other earths including processing.	No manufacture will be allowed. Mining is subject to any restrictions stipulated in other Acts.
Lime and Brick kilns	Beyond half a mile of the 1981 urbanizable limits.	Excavation of pit sand, lime & clay and lime and brick kilns.	The excavation shall not exceed 8 ft.
Stone quarries and crushing	Beyond one mile of the 1981 urbanizable limits.	Stone quarries and crushing.	Subject to any restrictions under any other Act.

Nature of Industry	Location	Type of Industries	Conditions to be fulfilled
Heavy and Largee Scale Industries		 Agricultural implements (large scale). Structural Steel Febrication (large scale). Diesel Engines. Electric wires and cables (large scale). Refractories. Borax. Optical glass. Sugar. Vegetable (hydrogenated) oils (large scale). Cement Glass (sheet). Cotton textiles (large scale). Woollen textiles (large scale). Blast furnaces steel works, and rolling and re-rolling mills. Bicycles (large scale. Sewing machine (large scale). Hume pipes. Automobiles and coach building. Locomotives and wagon manufacturing. Aircraft Building. General Industrial machinery (such as hydraulic equipment, drilling equipment, boilers, etc.). Special industrial machinery. Under frames and chassis. Sluice gates and gearings. 	These should not be allowed to be located in urban Delhi. Some of these in-dustries may be located in the Ring Towns and others in the towns of the National Capital Region.

1	2	3	4
		26. Lifts	
		27. Steel pipes and tubes.	
		28. Wire ropes.	
		29. Steel clains.	
		30. Electrical Steel sheets and stampings.	
		31.Steam Engines.	
		32. Power Driven pumps and pumping	
		equipment.	
		33. Tractors & Agricultural machinery	
		(power driven).	
		34. Industrial trucks, trailers, stakers, etc.	
		35. Earth moving machinery.	
		36. Air and gas compressor	
		37. Conveyors & conveying equipment.	
		38. Motor-cycles and scooters.	
		39. Heavy Iron and Steel forgins.	
		40. Foundries (heavy).	
		41. Other primary metal industries e.g. cold	
		rolled sheets, alloy steel etc.	
		42. Telephone equipment.	
		43. Water turbines.	

Prohibited Industries in Urban Delhi.

Nature of Industry	Location	Type of Industries	Conditions to be fulfilled
Obnoxious and Hazardots industries		 Bone meal, bone grist and bone powder. Leather tanning. Glue and gelatine. Animal fats. Carbon black, bone black and lamp black. Dye-stuffs and dye intermediates. Reclamation of rubber. Manufacture of industrial synthetic rubber. Manufacture of industrial rubber goods. Distilleries and breweries. Power and industrial alcohol. Acids and fertilisers. Alkaline Chemicals. Industrial gases. Bye-products of petroleum (extensive) Wood seasoning and curing. Paper, pulp and paper board (including straw boards). Manufacture of newsprint. Printing ink. Manufacture of explosives and ammunition. Disinfectants and insecticides (large scale). 	These industries on large scale associated with desirable feature such as stench, smoke, unpleasant injurious fumes, effluents and other hazards to the health and safety of the people residing in the neighbourhood. Hence, they should be kept out of Delhi Urban Area.

APPENDIX II

SUMMARY OF RECOMMENDATIONS

- **1. Union Territory of Delhi. -** The population of the Union Territory of Delhi which registered substantial growth in the last three decades is expected to be about 55 lakhs in 1981 if left to itself. It will, however, not be desirable to provide for such a big urban concentration. It is proposed to deflect some of the population into the Ring Town so that the population in Delhi can be kept to a manageable limit, which would be in the neighbourhood of 46 lakhs for urban Delhi and about 50 laksh for the Union Territory of Delhi.
- **2. The Delhi Metropolitan Area. -** The population of the Delhi Metropolitan Area, comprising the Union Territory of Delhi and the Ring Towns of Ghaziabad, Faridabad, Ballabgarh, Gurgaon, Bahadurgarh and Loni and certain rural areas, which was somewhat less than 21 lakhs in 1951, is expected to be close to 60 lakhs in 1981, of which 7,71,000 would be in the Ring Towns mentioned above, and 71,000 would be in Narela which is in the Union Territory of Delhi.
- **3. The National Capital Region. -** The population in the area designated as the National Capital Region, comprising the Union Territory of Delhi and the 8 adjoining Tehsils and 3 additional Tehsils of Meerut, Hapur and Bullandshahr, was 54 lakhs in 1951. It is expected to increase by more than 2.3 times and will, in 1981, contain a population of about 125 lakhs.
- **4. Ring Towns.** In order to plan for the balanced and integrated development of the Delhi Metropolitan Area and to control the growth of urban Delhi, it has been suggested that a number of towns located within a

ring of about 25 miles from Delhi should be developed to their optimum capacity by 1981. The population estimates for these towns (Narela, Ghaziabad, Faridabad, Ballabgarh, Gurgaon, Bahadurgarh and Loni) have been worked out on the basis of alloting a portion of Delhi's projected working force in manufacturing and Union Government employment to these towns. It may be possible to deflect roughly about 115,000 workers in manufacturing and 50,000 Union Government employees, which will provide an attractive economic base for the development of self-contained communities in these town-ships; in this way it may be possible to divert at least 4 lakh people from coming into the Delhi Urban Area. Under the general frame-work of development of various land uses suggested in the plan, the Government of U.P. and Punjab, in which the Ring Towns are located, will have to prepare Master Plans for each of these towns. Detailed proposals have been made in the Plan for the town of Narela which is in the territory of Delhi.

Proposed Land Use: Urban Delhi:

- **5.** *Urbanisable Limits.* **-** The topography of Delhi and other natural features limit the expansion of Delhi which can grow only towards the northwest and Shahdara, and to a limited extent towards the south. The proposed urbanisable limit of 1981 provides about 1,10,500 acres of land as against the present (1958-59) urbanised area of 42,700 acres.
- 6. The distribution of the total land available has been made keeping in view the future population and the activities for which space has to be provided. The functional relationship.

between the various land uses has been maintained and residential land requirements have ben related to work areas, shopping recreation, circulation etc.

7. The entire urbanisbale area by 1981 has, for planning purposes, been divided into eight planning divisions. Each planning division has been so selected that it reflects its own character, physical, social and cultural, as well as the pattern of land use. Each division is intended to be self-contained with a number of district centres and major work centres, community facilities and an adequate system of circulation. The proposed District Centres will have a college, a general hospital and district park in its vicinity.

The eight Planning Division are sub-divided into 136 Development Zones in order to have workable areas for purposes of detailed planning.

8. Rational and healthy development. - The presure of population and consequent haphazard and sub-standard development in Delhi is to be relieved by strengthening the economic base of the Ring Towns by planning industrial development and location of government offices there. Within Delhi the densities in the Old City are as high as 1,000 per acre while in other areas, namely in some parts of New Delhi, it is as low as 15 to the acre. A more rational distribution of densities is proposed through a gradual thinning of the former and by increasing the density through redevelopment of areas in New Delhi, viz., Mata Sundari Road, York Place and Gole Market. Density patterns are to be functionally related to the work centres, recreation areas and community facilities. In order to ensure healthy development, Zoning and Sub-division Regulations have been set down. These embody space standards for community facilities and services, and provisions regarding land use: density, coverage, floor area ratio, setback and other requirements. Such

of these regulations as are mandatory should be strictly enforced in regard to each kind of development and all proposals in the plan are subject to shose stipulations.

9. Government Offices.- The future of Delhi is envisaged as a major government centre but the increase in the proportion of government employment centre but the increase in the proportion of government employment in the total employment is considered undesirable. The total acreage under government offices is to be 900 acres by 1981. The Central Secretariat Complex is to be developed to its maximum capacity of about 200 acres to accommodate about 80 thousand employees. Multi-storey office blocks in place of temporary barracks are proposed.

In addition to the present government work centres functioning 9in Parliament Street, Inddraprastha Estate; Old Secretariat, Delhi Administration Offices, Supreme Court, N.D.M.C., Offices, railway Office and Corporation Offices, which will be developed to their optimum capacity the following major location are proposed in the plan, namely, Lodi Road, west of Medical Enclave near Safdarjang Hospital, North Shahdara, some of the District Centres, notably in the 1,100 Acre Project and near kalkaji.

- 10. Industry & Manufacturing.- A total area of about 5,800 acres is recommended for industrial use by 1981. Of this 3,600 acres will be for extensive manufacturing and are distributed at the following locations, namely, south of Okhla near the Marshalling Yard, Najafgarh Road area, between the railway line to Rewari and new Industrial road, between Rohtak road and the railway to Rohtak and north of railway line to Rohtak, between G.T. (Karnal) Road and railway line, Shahdara between new railway line and new Highway to Ghaziabad.
- 11. A total area of about 1,600 acres is proposed for light and service industries which would be generally small nuisance industries that can

Devel operate near built-up areas with rigid enforcement of factory regulations. Development of small scale industries, of the type of the one at Okhla, should be encouraged in these areas. The major locations of these are at Lawrence Road, areas south of Ring Road and G. T. Road in the north-west, in Shahdara between G.T. Road and railway line, in Sarai Rohilla, on Mathura Road, areas to the west of Pusa Institute and near Anand Parbat.

- 12. An area of about 100 acres has been earmarked, near the proposed institutional areas in the south, for such special industries which will assemble precison in instruments without causing any nuisance whatsoever. Research and training facilities should be encouraged in this area.
- 13. Industrial-*cum*-Work Centres are proposed at District Centres and at a few out living areas. The total acreage is about 170 acres. These will be intensively developed, with three to four storey building, for locating small industries. Intensive use in "flatted factories" has been suggested within the core of the urban area, in such localities as Motia Khan, Jhandewalan, Thompson Road, Ajmere Gate, Roshanara Road, Sarai Rohilla, Birla Mills, D.C.M. area, Mori Gate, G.B. Road, and Shankar Market area. The total acreage is about 190 acres.
- 14. An area of about 350 acres has been earmarked for mining in the Mehpalpur area which is rich in pottery clay. Also a site of about 100 acres is recommended near the above mentioned site for pottery factories utilising this local raw material.
- 15. Lime and brick kilns and the romoval of clay should be located beyond half a mile of the urbanisable limits of 1981.

The stone quarrying and crushing area, however, should be located bey one mile of the urbanizable limits.

16. Storage of building materials like iron, steel, timber, cement

has been allocated about 400 acres of land in the major industrial areas.

- 17. *Commercial.* Major commercial areas account for about 1,500 acrdes, excluding local shopping areas which are not shown in the plan but will be shown in detailed plans.
- **18.** Chandni Chowk Khari Baoli- Sadar Bazar will continue to be the Central Business District of Delhi. The existing hosiery and general markets north of Sadar Bazar and the existing wholesale market in dry fruits in Phatak habash Khan, are to be retained but improved through proper planning and enlargement. It is recommended to redevelop the wholesale fruit and vegetable market in Subzimandi and in addition two more new sites, one near the Daya Basti Railway Station and the other near Okhla Railway Station, have been earmarked for this purpose. The existing wholesale grain market in Naya Bazar and G.B. Road are to continue but storage of food-grains is to be shifted to the warehousing areas shown in the plan. A new area for wholesaling of grain has been shown in the Teliwara area which is to be redeveloped after the relocation of the timber storage in the warehousing area. A wholesale cloth market will have to be redeveloped after the relocation of the timber storage in the warehousing area. A wholesale cloth market will have to be redeveloped near the existing Krishna Market and Katra Neel. off Church Mission Road. The Connaught south to have to be redeveloped near the existing krishna Market and katra Neel. off Church Mission Road. The Connaught Place shopping centre is to be enlarged towards the east and south to have a total area of about 200 acres for general business and commerce and for retail trade as a Central Business District. In order to decentralise commercial activity, 15 District Centres and 13 Sub-District Centres have been proposed in the plan in addition to some small retail centres also shown in the plan.
- **19.** Warehousing & Mineral sidings.- A total of about 750 acres has been earmarked in the plan for warehousing and depots. The timber trade now being carried on in the Old City should be relocated in West Delhi

88

adjacent to the Railway Line to Rewari. The grain storage will also be in this area. There additional sites have been shown for oil storage, one on Rohtak Road, the second near the Palam Railway Station and the third in Shahdara. About 300 acres of land has been earmarked for the mineral sidings of the Railways near the Tughlakabad Marshalling Yard in the south, near Azadpur in the North and on the Rewari Railway Line in the West. One large railway siding has been proposed in U.P. contiguous to Shahdra to serve the whole of the urban area to the east of the Yamuna.

20. **Residential.** - There will be about 47,400 acres of residential land in Delhi to house the 1981 population of about 46 lakhs at an average residential density of 97 persons per acre. Large scale clearance and reconstruction is ruled out as an immediate possibility in the Old city because of the lack of resources and the low capacity of the people to pay rent. But the minimum community facilities and services and reasonable means of communication will have to be provided in this area. This will improve the locality and gradually help reduce congestion so as to serve a density of about 250 persons per acre. It is proposed to develop the Mata Sundari area at the density of 200 persons per acre and the Gole Market area at the density of 150 persons per acre. Other very low density areas in New Delhi like York Place and in Civil Lines will have to be judiciously planned to take more population without destroying the pleasant character of the areas. In the development areas the densities having been proposed near employment centres and lower densities on the periphery of the urban area.

21. A housing programme in a big way will have to be launched to meet the growing demand as well as some of the large back log. The present Busti dwellers will be provided for in developing areas where they will be integrated with the neighbourhood community. To counteract against squatting in Bustis, it is proposed to earmark reasonable areas in 89

several zoness for the low income group people who migrate to Delhi from rural areas throughout the year. In view of their poverty, they should be permitted to construct very cheap houses on a proper layout with all the necessary reservations of site. The municipal services, which will naturally be the minimum, will have to be provided by public agencies.

22. Land acquisition by Government on a large scale has been recommended. The ownership of land by Government makes planning and the implementation of the plan easier and is imperative if slum clearance, redevelopment, subsidised housing and provision of community facilities according to accepted standards have to be undertaken, as, indeed they must be, in Delhi, in a determined way.

Community facilities & services

23. *Recreation.*- A system of linked open spaces and district parks has been worked out for the entire urban area of Delhi related to the proposed pattern of residential densities. Centain natural features like river front and the ridge will have to be developed in the course of years. Land under district parks will be about 18,000 acres. In addition there would be on an average 1.6 acres of local parks and playgrounds which are not shown in the plan. An area of about 8,200 acres is recommended for regional parks and reservations which need not be intensively developed at present but should be preserved as green areas.

24. In order to preserve land under intensive agriculture and to prevent the overspilling of premature urban growth, an inviolable green belt of agricultural land around the urbanisable limit of 1981 has been recommended in the plan.

25. *Education.* - A university centre in the south is proposed near the junction of Kitchner Road and Ring Road. Twentytwo sites of about 15 each,

suitably distributed in developing areas, have been proposed for colleges to serve a population of 1.5 lakhs. It is further proposed that for every 4 or 5 colleges a university centre should also be provided, for which 30 to 40 acres have been reserved. The total area earmarked in the plan for education is 1,400 acres.

26. Research & Educational Institutes. - Land has been reserved for the expansion of Pusa Agricultural Research Institute and the expansion of Pusa Agricultural Research Institute and the Jamia Millia. Also a large area for an engineering college has been reserved. An area of about 600 acres has been earmarked in the south for educational and cultural purposes south-west of this college. Similarly another reservation of land of about 120 acres has been made north of Badarpur Road. The total land allocated in the plan for research and institutional use is about 2,900 acres.

27. A standard of one pre-primary school for 1,500 population and one primary school for a population of 3,750 and one higher secondary school for 15,000 has been recommended. The size of school sites varies for different densities.

28. Land has been reserved for 20 additional hospitals of about 15 acres each with 500 beds to serve 1,25,000 people. It is also proposed that in each planning division at least one hospital will have about 25 acres instead of 15 acres, so that it can offer specialised services not available in other hospitals.

29. Police Stations, health centres, fire stations, electric substations, post and telegraph offices, telephone exchanges community halls, community and neighbourhood shopping centres etc., for which standards have been prescribed in the Master Plan, will have to be shown in zonal plans and detailed plans. Recognising the importance of social and cultural activities, multipurpose community centres have been recommended to provide a frame-work within which the whole fabric of

social activities may be inter-woven in the neighbourhoods so that the impersonal character of city life does not stifle the cultural life of the citizens. In additions, it is proposed that new social and cultural buildings of national importance like conference and assembly halls, art galleries, convention halls, public auditoria, theatres and state guest houses, should be built by Government in the area stretching on either side of the Central Vista starting from Janpath. Other land reservations for cultural purposes have been made near Sapru House and near the proposed Municipal Corporation buildings opposite Ramlila Grounds. Yet another cultural centre is proposed in the Siri area where the State Governments may build cultural buildings in order to give a fillip to the song, dance, drama and other fine arts of the various States, which will help in the emotional and cultural integration of the India people.

30. *Public utilities and services.* - Active steps will have to be taken well-in-advance to secure the sources of water and power which are essential for the continuing growth of the Metropolis. Ways and means have been suggested for securing this and land reservations have been made for the expansion of the existing water works and for a new power house. Proposals to discontinue sewage overflows into the Yamuna have been recommended and adequate land has been reserved for treatment plants in different parts of the city.

31. Fifteen cremation grounds have been earmarked in the plan so that they are within a three mile radius of the residential areas. Sites for Muslim burial grounds have also been reserved.

32. It is recommended that presently cut up and low-lying land may be reclaimed by hygienically conducted sanitary earth fills of garbage.

Traffic & Transport.

33. *International Civil Airport.* - The International Civil Airport should be continued at Palam with suitable run-ways and terminal facilities.

for increased jet traffic uanless Government decides to set up a separate airport. A site at Pasaunda in U.P. is recommended as the best alternative site. It is also recommended that the Safdarjang Airport which is in the midst of heavily built up areas should ultimately be removed to join up with the ultimate International Civil Airport for Delhi. The Flying Club which is functioning on this site these days should also be shifted at that time.

- 34. Railway Transport Recommendations. (I) It is recommended to shift the marshalling yards from New Delhi to Tughlakabad on the Agra line and connect these yards by a new bridge over the Yamuna River to the main line at Sahibabad. (ii) The metre gauge should be extended to New Delhi railway station which should be expanded and provided with engine turn round and stabling facilities. (iii) The Railways should provide more frequent and speedy regional services and encourage a system of bus feeder routes in co-ordination with road services. New railway stations have been proposed at suitable places and it has been recommended that the existing railway stations should be expanded with more platform and passenger facilities, and adequate provision for parking. in order to reduce the interstate traffic load, the expansion of smaller railway stations both for passengers and goods is recommended. (iv) Future electrification of the Delhi Terminal Area as far as Ghaziabad, Meerut, Faridabad and Sonepat should be anticipated. Until such time the problem of more passenger platform at Delhi Main could be alleviated by the use of more double-ended diesel rail-cars to cut down platform occupancy time.
- **35.** Regional High-Way Network Proposals. (i) Peripheral all weather communication should be provided by converting the existing boat-bridge into concrete structures at Baghpat (between Sonepat and Meerut) and Jewar (between Palwal and Khurja) to relieve pressure on the existing Yamuna Bridge. (ii) Additional links will be available with the completion of the proposed road bridges across the Yamuna near Humayun's Tomb and the Barrage-cum-Road at Wazirabad.

- (iii) In order to construct by-pass roads to satellite towns the right-of-ways should be reserved now.
- **36.** Urban Road & Highway Development Proposals. (i) To foster the movement of fast and unobstructed traffic around the congested core of the city, the Inner Ring Road has been recommended with a right-of-way of 150'. Complete grade separation is recommended where the Inner Ring Road Crosses the main arterials. Access to Inner Ring Road is restricted to a minimum of a quarter or half a mile distance.
- (ii) The construction of an east-west connection between Queen Mary's Road and the National By-pass with 200' right-of-way is recommended to provided better access to the Tis Hazari Courts.
- (iii) A new road from Circular Road following the alignment of Ranjit Singh Road, School Lane, and Keeling Road upto Parliament Street is recommended to augment limited access between Old and New Delhi. One more link connects Mathura Road to College Road and Ferozeshah Road.
- (iv) Rohtak Road should be diverted along the southern banks of the Western Yamuna Canal, and north of the existing alignment to join the proposed Inner Ring Road.
- (v) The proposed road over Wazirabad Barrage with a cantilever, adequate in width for pedestrian movement and cycle tracks, should be extended to the east to meet G. T. Road near Sahibabad and towards the west to meet G. T. Road near Badli.
- (vi) Another road across the Yamuna near Humayun's Tomb will connect Delhi to Ghaziabad across the River Hindon.
- (vi) Many of the existing important roads requiring widening of the right-of-way have been shown in the plan.
- (vii) Many of the existing important roads requiring widening of the right-of-way have been shown in the plan.
- (viii) A system of streets in the Old City with minimum widening has been recommended and a detailed list and a map have been provided.

- **37.** Arterial Cycle Tracks. In addition to the improvement of the existing road marginal cycle tracks, arterial cycle tracks entirely separate from the carriage way have been recommended to avoid bottlenecks. These proceed from the Central Secretariat towards the south-east, southwest, north and westerly directions.
- **38.** Elimination of traffic bottlenecks.- (i) Grade separations are recommended at railway road level crossings on important roads such as Rohtak Road, Patel Road, Link Road between New and Old Rohtak Roads, Patel Road, Link Road between New and Old Rohtak Roads and the Approach Road to the Okhla Industrial Estate. Queen Victoria Road to the Okhla Industrial Estate. Queen Victoria Road joining the National Bye-pass and Mehrauli Road crossing the railway also require grade separation.
- (ii) At every major intersection at grade, channelisation of traffic and traffic lights to replace inadequate roundabouts is recommended.
- **39.** Road-Transport Terminals.- Suitable sites for bus passenger direminals and parking have been recommended south of Idgah, north of Central Road Research Institute, near Shahdara Railway Station and outside Kashmere Gate. An idle vehicle parking site between the National Bye-pass and the Western Bund of the Yamuna River has also been recommended.
- **40.** *Goods Parcel Terminal & Parking.* Suitable sites for truck terminals in the Motia Khan area and in Shahdara are recommended. Suitable sites for idle parking and servicing of trucks are recommended near Azadpur Police Station, near Nangal Power Station and near Okhla Industrial Estate.
- **41.** *D.T.U. Bus Terminal.* Two terminals, one near connaught Place Extension and the over near Minto Bridge area are recommended for passenger buses. Off street loading stations and bus accumulation areas are recommended near important places like the Central

- Secretariat, Delhi Main Station, etc., and in District Centres and Central Business Districts.
- **42.** *Future Mass Transit.* The traffic problems of urban Delhi require a traffic department to deal with all matters in a comprehensive manner and toeffect proper liaison between the traffic department and the police who will be in charge of enforcement of traffic regulations.
- **43.** *Department of Traffic.* The traffic problems of urban Delhi require a traffic department to deal with all matters in a comprehensive manner and to effect proper liaison between the traffic department and the police who will be in charge of enforcement of traffic regulations.
- **44.** Staggering of work hours.- An important measure recommended for improvement in peak hour traffic traffic in Delhi is staggering of work hours so as to distribute peak hour traffic load over a longer period.
- **45.** *Urban Renewal & Redevelopment.-* (I)The major recommendation in this respect limits itself to giving only a sense of direction, It is conceived as a comprehensive activity to counteract functional obsolescence of the urban structures and of parts and elements of it.
- (ii) As a result of socio-economic studies the built up areas should be indetified as "conservation", "rehabilitation" and "redevelopment" areas. This can be the basis of a system of priorities for action based upon scientific analysis rather than on ad hoc municipal action.
- (iii) In order to relocate Busti dwellers, area have been recommended so that they are an integral part of a neighbourhood. Also, in order to counteract against squatting in Bustis, as mentioned earlier, areas will be earmarked in newly developing colonies where sub-standard development will be permitted and cheap housing or huts will be encouraged for which purpose building bye-laws have been recommended to be relaxed. In addition, certain areas requiring redevelopment near the congested parts of the Old City like the Mata Sundari area are partly reserved for the relocation of slum dwellers.

- (iv) It is recommended that a systematic weeding out of obnoxious industries and village-like trades should be undertaken. In the zoning regulation a time schedule for the removal of "non-conforming uses" stipulates the gradual elimination of these uses.
- (v) Space standards for schools, open areas, etc. have been considerably lowered in order that there may be minimum dislocation of people and that existing available spaces may be made use of for such purposes. It si recommended to adopt a comprehensive system of building, health and other codes which prescribe adequate minimum standard of health, sanitation and safety. These have to be enforced with citizen participation to the fullest possible extent.
- (vi) Further basic amenities like water, latrines and electricity, lacking in many of the areas, should be provided immediately on short

-term basis even if the area qualifies for redevelopment.

46. *Rural Delhi.* - Proposals have been made in the work studies in detail for rural areas for the provision of schools, roads, district shopping and other basic needs of the rural population. A number of "urban villages" for the relocation of milch cattle and dairymen now operating in the urban area, and other village-like trades and industries have been recommended.

The report is only preliminary in nature and attempts only broadly to formulate proposals for the provision of services and utilities in the rural areas. It will be necessary later to make comprehensive master plans for the villages also, indicating various kinds of land uses suggesting improvement of village *abadis* and with a view to strengthening the economic base of the rural areas.

GLOSSARY

Abadi Atta Chakkie	Settlement, habitation, sometimes also used for population An indigeneous floor grinding mill	fManti	A cabin like structure with a covering roof over a staircase and its landing built to enclose only the stairs for the purpose of providing protection from weather but normally not used for human
Bagh	Garden		habitation.
Barsati	Covered space on the terrace used for shelter		
Busti	during rains A cluster of sub-standard and temporary structures made of scrap material like, straw, mud, babmboo, wooden planks, thatched roof etc.	Mandi	A traditional wholesale market with storage and display space generally dealing in one type of commodity, like loha mandi (iron and steel market lakkar mandi (timber market).
Dhubi	Washerman	Marg	Road or street
Duree	A type of indigeneous rug or carpet usually made of cotton fibre-mostly hand-work.	Mandir	Hindu place of worship, a temple
Ghat	River bank used for bathing	Masjid (also Musjid) Mohalla	Mosque, a place of worship for Muslims
Jhuggi-Jhonpari	Hut made of straw, mud and bamboo	монина	A traditional housing cluster generally in the
Kalai	Nickel-plating of utensils		order built up part of a city.
Katra	A cluster of tenements built around a courtyard, with common sanitary arrangements	Nagar Pul	Town or locality in a town Bridge
Khoka	A wooden stall of temporary nature used either	Qila	Fort
	for habitation or small shops.	Rashtrapati	President of India
		Sarai	Quadrangular inn (often used as a prefix or
Kotwali	City Police Headquarters		suffix to a place or locality).
Kucha	A narrow alley with shops or tenements on	Subzimandi	Wholesale fruit and vegetable market
	either side.	Tehsil	An administrative sub-division within a district
		Udyog	Industry or craft
Mali	Servant employed to tend a garden or park

Containing

AMENDMENTS

TO

THE MASTER PLAN

MINISTRY OF WORKS, HOUSING & URBAN DEVELOPMENT

New Delhi, dated the 18th. February, 1967

NOTIFICATION

WHEREAS the Central Government has proposed to make modifications in the Mater Plan for Delhi as regards the following areas:-

- (1) New Multan Nagar Colony (Rohtak Road);
- (2) Premises No. 2, Maulana Azad Road, New Delhi;
- (3) G.T. Road, Shahdara;
- (4) Uttam Nagar Colony (Najafgarh);
- (5) Hari Nagar Ashram (Mathura Road);
- (6) Loni Road (Shahdara); and
- (7) Ashok Road, New Delhi;

the proposed modifications having been pulbished as notice (No. S.O.R.2613, dated the 25th. August, 1966, at pages 2521-2522 of the Gazette of India, Part II-Section 3-Sub-section (ii), dated the 3rd. September, 1966) as required by sub-section(3) of section 11A of the Delhi Development Act, 1957 (61 of 1957) inviting objections and suggestions;

AND WHEREAS the Central Government has considered the objections and suggestion only in regard to areas mentioned in items (1, (2), (5) and (7), that is, New Multan Nagar Colony (Rohtak Road),

Premises No. 2, Maulana Azad Road, New Delhi, Hari Nagar Ashram (Mathura Road), Loni Road (Shahdara) and Ashok Road, New Delhi;

AND WHEREAS the Central Government has not considered the objections and suggestions in regard to areas mentioned in items (3) and (4), that is, G.T. Road, Shahdara and Uttam Nagar Colony (Najafgarh) and has, until such consideration, deferred its Decision with respect to those areas;

NOW, THEREFORE, the Central Government, in exercise of the powers conferred by sub-section (2) of section 11A of the said Act hereby makes the following modifications in the said Master Plan for Delhi in the areas mentioned in items (1), (2), (5), (6) and (7), that is, New Multan Nagar Colony (Rohtak Road), Premises No. 2, Maulana Azad Road, New Delhi, Hari Nagar Ashram (Mathura Road), Loni Road (Shahdara) and Ashok Road, New Delhi, namely:-

(1) New Multan Nagar Colony (Rohtak Road)

Land use of so many plots of the layout plan of the New

Development (Provisional) Authority, designated as "recreational" in the Master Plan, to be changed into "residential"

(2) Premises No. 2, Maulana Azad Road, New Delhi

Land use of about 3 acres of land forming part of the area of the plot at 2, Maulana Azad Road, to be changed from "Social and cultural" to "offices".

(3) Hari Nagar Ashram (Mathura Road)

Land use of the triangular area bounded by Mathura Road, Ring Road and the railway line to Mathura, popularly described as "Hari Nagar Ashram", to be changed from "flatted factories" to "residential".

(4) Loni Road (Shahdara)

(a) Land use of Jyoti Nagar Colony on Loni Road, the layout plan of which has been approved by the Municipal Corporation of Delhi, to be changed from "Hospitals and Government offices" to "residential".

Multan Nagar Colony, approved by the erstwhile Delhi (b) The land use of the area neasr the Shahdara Saharanpur Light Railway Line to be changed from "residential" to "Government offices" and the land use of the land lying to the west of the green belt and surrounded on thewest, south and east be green belt from "residential" to "hospitals".

(5) Ashok Road, New Delhi

- (a) Land use of the plot at 20, Ashok Road to be changed from "residential" to "Government offices".
- (b) Land use of the plot adjacent to 20, Ashok Road (9 Rafi Marg) to be changed from "residential" to "parking".

R. C. MEHRA,

Under Secretary to the government of India. (Case No. 21017(37)/66-UD

DELHI DEVELOPMENT AUTHORITY

New Delhi, dated the 13th. April, 1967

NOTIFICATION

WHEREAS the Delhi Development Authority has proposed to make the following modifications in the Master Plan for Delhi:-

(1) To the list of "already built up commercial areas", occurring on page 61 of the Master Plan, the following entry shall be added, namely"20-Jhandewala Scheme-Block E"

- (2) On page 60 of the Master Plan, under item (b) of the heading "III Government offices" for the words and figures "F.A.R.......150", the following shall be substituted, namely -
 - "(I) F.A.R. for plots other than for those described in item (*ii*) hereunder......150
 - (ii) F.A.R. for plots fronting on and to the north of Indraprastha Marg and lying between the Abdul Nabi Mosque and A.G.C.R. Building......300",

the proposed modifications having been published as notice No. S.O.3072, dated the 15th. October 1966 at page 2901 of the Gazette of India, Part II-Section 3-Sub-section (*ii*) as required by sub-section (3) of

the Delhi Development Act 1957 (61 of 1957) inviting objections and suggestions;

AND WHEREAS the Delhi Development Authority has considered the objections and suggestions in regard to the modification mentioned at (1) above, no objection'suggestion having been received to the modification at (2);

NOW, THEREFORE, the Delhi Development Authority, in exercise of the powers conferred by sub-section (1) of section 11A of the said Act hereby makes the above modifications in the said Master Plan for Delhi.

B.C. SARKAR,

Additional Secretary, Delhi Development Authority

DELHI VIKAS BHAVAN, INDRAPRASTHA ESTATE, NEW DELHI-1

MINISTRY OF WORKS HOUSING & SUPPLY

(Department of Works & Housing) New Delhi, dated the 14th. June, 1967

NOTIFICATION

WHEREAS the Central Government has proposed to make item (2) and has until such consideration, deferred its decision with respect modifications in the Master Plan for Delhi as regards the following areas:-

- (1) Land at the junction of Lodhi Road and Kitchlew Marg;
- (2) Land near Roshanara Garden;

the proposed modifications having been published as notice No. S.O.3073, dated the 15th. October 1966 at page 2901 of the Gazette of :-India, Part II-Section 3-Sub-section (ii) dated the 15th October, 1966) as required by sub-section (3) of section 11A of the Delhi Development Act, 1957 (61 of 1957) inviting objections and suggestions;

AND WHEREAS the Central Government has not received any objection and suggestion in regard to the area mentioned at item (1), and has not considered the objections and suggestions received in regard to

to this item:

NOW, THEREFORE, the Central Government, in exercise of the powers conferred by sub-section (2) of section 11A of the said Act, hereby makes the following modification in the said Master Plan for Delhi, namely

Land use of a 2.44 acre plot at the juction of Lodi Road and Kitchlew Marg, near Oberoi Interncontin ental Hotel, be changed from "recreational" to "Institutionanal".

SHITALPRASAD

Under Secretary to the Govt. of India

(Case No. 21017(29)/66-UD)

GOVERNMENT OF INDIA

MINISTRY OF WORKS, HOUSING & SUPPLY

(Department of Works & Housing)

New Delhi, Dated the 1st. August, 1967

NOTIFICATION

WHEREAS the Central Government had proposed to make modifications in the Master Plan for Delhi as regards the areas mentioned in the Schedule hereto annexed, the proposed modifications having been published as notice (No. S.O.2613 dated the 25th. August, 1966) as required by sub-section (3) of section 11A of the Delhi Development Act, 1957 (61 of s 1957) inviting objections and suggestions;

AND WHEREAS the Central Government, after considering the objections and suggestions only with regard to the areas mentioned in Item (1), (2), (5), (6) and (7) of the aforesaid Schedule, made certain modifications in the Master Plan for Delhi in the aforesaid areas by the notification of the Government of India in the late Ministry of Works, Housing and Urban Development No. 21017(37)/66-UD dated the 18th. February, 1967;

AND WHEREAS the Central Government, at the time of issue of the aforesaid notification dated the 18th February 1967, had not considered the objections and suggestions with regard to the areas mentioned in items (3) and (4) of the aforesaid schedule and had, until such considered, deferred its decision with respect to those areas;

AND WHEREAS the Central Government has now considered the objections and suggestions with regard to the areas mentioned in the aforesaid Items (3) and (4), that is to say, G. T. Road, Shahdara and Uttam Nagar Colony (Najafgarh).

NOW, THEREFORE, in the exercise of the powers conferred by subsection (2) of section 11A of the said Act and in continuation of the aforesaid notification dated the 18th. February, 1967, the Central Government hereby makes the following modifications in the Master Plan for Delhi in the areas mentioned in the aforesaid Items (3) and (4), that is to say, G.T. Road, Shahdara and Uttam Nagar Colony (Najafgarh), namely:

(1) G. T. Road, Shahdara

Land use of a 1.5 acre land on G.T. Road to Ghaziabad to its

south to be changed from "recreational" to "educational", and

(2) Uttam Nagar Colony (Najafgarh)

Land use of 23.4 acres of land of Uttam Nagar Colony, the lay out plan of which has been regularised by the Municipal Corporation of Delhi, to be changed from "agricultural green belt" to "residential" (subject to preservation of the 61 meters right-of-way of Najafgarh Road).

The Schedule

- (1) New Multan Nagar Colony (Rohtak Road).
- (2) Presmises No. 2, Maulana Azad Road, New Delhi.
- (3) G.T. Road, Shahdara.
- 4) Uttam Nagar Colony (Najafgarh).
- (5) Hari Nagar Ashram (Mathura Road).
- (6) Loni Road (Shahdara).
- (7) Ashok Road, New Delhi.

SHITAL PRASAD

Under Secretary to the Govt. of India (Case No. 21017(37/66-UD)

DELHI DEVELOPMENT AUTHORITY

New Delhi, dated th 8th. March, 1968

NOTIFICATION

WHEREAS the Delhi Development Authority has proposed to make the following modifications in the Master Plan for Delhi:-

(1) For existing paragraph 2 "Development Zones" occurring on page 64 of the Master Plan, the following shall be substituted, namely:-

"For planning purposes Delhi has been divided into nine Planning Division, including the one for rural Delhi. These are based on physical features, historical growth, character of development, intensity of land use and the circulation pattern. The purpose in making these divisions is to have more or less self contained units for purposed of living, employment and recreation. The division boundaries overlap municipal boundaries.

These division are too large an area for which to prepare development plans. Portions of it may not be developed for the next 10 to 15 years. Hence to obtain workable units, the planning divisions have been further sub-divided into (a) development zones for the urban area, as shown in the accompanying map; map (b) three rural zones (Narela Town Zone; Najafgarh Town Zone & Rural Delhi Zone). Change in the land use,

existing physical features, railway lines and major arteries act as boundaries for the zones. Municipal boundaries, election and census wards have also been taken into consideration in drawing up these boundaries though they have not been a decisive factor in their delimitation. The "Development Zones" are not to be confused with "Use Zones" referred to earlier.

Plar	nning Divisions	No. of Development Zones
A	Old City	28
В	City Extension	7
C	Civil Lines	20
D	New Delhi	21
E	Shahdara	16
F	South Delhi	19
G	West Delhi	17
Н	West Yamuna Canal	
	of North West Delhi	8
I	Outer Delhi Planning	
	Division	

Planning Divisions		No. of Development Zones
(a)	Narela Town Zone;	
(b)	Najafgarh Town	
	Zone; and	
(c)	Rural Delhi Zone	3
	Total	139

(2) All references in the text of the Master Plan to 136 development zones shall be construed as references to 139 development zones."

AND WHEREAS the Delhi Development Authority is of the opinion that the said modifications do not effect important alterations in the character of the Master Plan and do not relate to the extent of land uses or the standards of population density.

AND WHEREAS in pursuance of sub-section (3) of section 11-A of the Delhi Development Act, 1957 (No. 61 of 1957), a notice inviting objections and suggestions in respect of the said proposed modification

was published in the Gazette of India bearing No. S.O. No. 2853, dated the 19th. August, 1957.

AND WHEREAS the Delhi Development Authority has considered objection/suggestion to be modifications mentioned above.

NOW, THEREFORE, the Delhi Development Authority in exercise of the powers conferred by sub-section (1) of section 11-A of the said Act, hereby makes the above modification in the said Master Plan for Delhi.

B.C. SARKAR,

Additional Secretary.

Delhi Development Authority

DELHI VIKAS BHAVAN, INDRAPRASTHA ESTATE, NEW DELHI-1

GOVERNMENT OF INDIA MINISTRY OF HEALTH, FAMILY PLANNING AND URBAN DEVELOPMENT

(Department of Health and U.D.) No. 21017(9)/67-UD. New Delhi, dated the 10th. June, 1968

NOTIFICATION

WHEREAS the Central Government had proposed to make a modification in the Master Plan for Delhi as regards the land on Rohtak Road, Measuring about 100 acres and bounded by the Railway line on the north, outer Ring Road on the east, Rohtak Road on the south and extending on the west along Rohtak Road from the edge of the outer Ring road up to a length of 3,964 ft. (average) and the proposed modification has been published as notice No. F.3(85)/67-MP dated the 6th April, 1968, as required by Sub-Section (3) of section 11A of the Delhi Development Act, 1957 (61 of 1957) for inviting objections and suggestions:

AND WHEREAS the Central Government, after considering the objections and suggestions received, has decided to make the said modification in the Master Plan for Delhi.

NOW, THEREFORE, in exercise of the powers conferred by subsection (2) of section 11-A of the said Act, the Central Government hereby makes, with effect from the date of publication of this notification, the following modification in the master plan for Delhi, in respect of the said land, namely;

The land use in respect of the said land be changed from "extensive industries" to "light industries".

K.M.L. GUPTA, Under Secretary to the Government of India (Case No. 21017(9)/67-UD)

GOVERNMENT OF INDIA MINISTRY OF HEALTH AND FAMILY PLANNING AND WORKS, HOUSING AND URBAN DEVELOPMENT

(Deptt. of Works, Housing & Urban Development) New Delhi, dated the 11th./13th. May, 1970

NOTIFICATION

WHEREAS the Central Government had proposed to make a modification in the Master Plan for Delhi as regards the areas mentioned in the Schedule hereto annexed, the proposed modifications having been published as notice (No. F.3 (175)/69-MP., dated the 27th September, 1969), as required by subsection (3) of section 11-A of the Delhi Development Act, 1957 (61 of 1957) inviting objections and suggestions;

AND WHEREAS the Central Government, after considering the objections and suggestions with regard to the area mentioned in the aforesaid Schedule, have decided to modify the Master Plan for Delhi;

NOW, THEREFORE, the Central Government in exercise of the powers conferred by sub-section (2) of section 11-A of the said Act, hereby makes the following modifications in the said Master Plan for Delhi, namely:-

(1) Land use in respect of 13.36 hectares of land located between the railway line to Karnal and G.T. Road, near Azadpur, with land use

"railway purpose-5.38, hectares", "extensive manufacturing-5.26 hectares" and "warehousing, storage depots and mineral sidings-2.7

hectares" to be changed to "whole-sale market for fruit and vegetables"; and

(2) Land use in respect of 15.54 hectares of land on Inner Ring Road (686 metres approx. towards the east from the intersection of Mehrauli Road and Inner Ring Road (Lodhi Road) and bounded by the 45.75 metres right-of-way Inner Ring Road on the north; 24.40 metres right-of-way zonal road on the east; 24.40 metres right-of-way zonal road on the south and 18.30 meters right-of-way zonal road on the west) to be changed from "Government Offices" to "Institutional".

THE SCHEDULE

- (1) Approximately 33 acres of land (13.36 hectares) lying between the railway line to Karnal and G. T. Road.
- (2) Approximately 15.54 hectares of land on Inner Ring Road Lodhi Road) towards the east from the intersection of Meharauli Road (Lodhi Road).

L. M. SUKHWANI Under Secretary to the Govt. of India. (Case No. 11-3(2)/69-UD).

GOVERNMENT OF INDIA MINISTRY OF HEALTH AND FAMILY PLANNING AND WORKS, HOUSING AND URBAN DEVELOPMENT

(Department of Works, Housing & U.D.)

New Delhi, dated the 10th August, 1970

NOTIFICATION

WHEREAS the Central Government has proposed to make modifications in the Master Plan for Delhi as regards the following areas:-

- (1) Land at the junction of Lodhi Road and Kitchlew Marg;
- (2) Land near Roshnara Garden;

the proposed modifications have been published as notice (No. S.O.3073, dated the 15th. October, 1966, at page 2901 of the Gazette of India, Part II-Section 3-Sub-Section (ii) dated the 15th October, 1966) as required by sub-section (3) of section 11-A of the Delhi Development Act, 1957 (61 of 1957) inviting objections and suggestions:

AND WHEREAS the Central Government has already approved the change in land use in respect of item (1) VIDE notification No. 21017(29)/66-UD dated the 14th. June. 1967;

AND WHEREAS the Central Government at the time of issue of the aforesaid notification dated the 14th June, 1967, had not considered the objections and suggestions with regard to item (2) and had, until such consideration, deferred its decision with respect to that area:

AND WHEREAS the Central Government has now considered the objections and suggestions with regard to the area mentioned in item (2), that is to say, land near Roshnara Garden:

NOW, THEREFORE, in exercise of the powers conferred by subsection (2) of section 11-A of the said Act and in continuation of the aforesaid notification dated the 14th June, 1967, the Central Government hereby makes the following modification in the said Master Plan for Delhi, namely:-

Land situated near Roshnara Garden, Sabzimandi, Delhi which is, according to the Master Plan for Delhi earmarked for 'retail business and

recreational' may be changed to 'institutional' for locating a Government School.

L. M. SUKHWANI, Under Secretary to the Government of India. (Case No. 21017(27)/66-UD)

GOVERNMENT OF INDIA MINISTRY OF HEALTH AND FAMILY PLANNING AND WORKS, HOUSING AND URBAN DEVELOPMENT

(Deptt. of Works, Housing & Urban Development)

New Delhi, dated the 29th Dec., 1970

NOTIFICATION

WHEREAS certain modification which the Central Govt. proposed to make in the Master Plan for Delhi as regards the areas mentioned in the Schedule hereto annexed, in accordance with the provisions of section 44 of the Delhi Development Act, 1957 (61 of 1957) read with rules 6 made thereunder, as required by sub-section (3) of Section 11-A of the said Act inviting objections and suggestions:

AND WHEREAS the Central Govt. after considering the objections and suggestions with regard to the areas mentioned in the aforesaid Schedule, have decided to modify the Master Plan for Delhi.

NOW, THEREFORE, the Central Govt., in exercise of the powers conferred by sub-section (2) of section 11-A of the said Act, hereby makes the following modification in the said Master Plan for Delhi, namely:-

(1) Due to the change in the alignment of the 100ft. Master Plan Road, connecting Patel Road and Ring Road further north-west, 32 acres

of land contiguous to the Kirti Mineral Siding and Warehousing Scheme has been made available. The land is located south-east of the above mentioned road and starts from its junction with Ring Road. The land use of this 32 acres to be changed from "recreational (green)" to "industrial (warehousing) and Mineral Siding".

- (2) Land use of approximately 10 acres of land in the approved portion of the layout plan of Mansarover Garden earmarked as "recreational (green)" in the Master Plan to be changed to "residential". The area is located north-west of the 100 ft. wide road, connecting Patel Road Ring Road, starting from its junction with Ring Road and extending along with the above mentioned 100ft, road.
- (3) Approximately 10 acres of land in the approved portion of the layout plan of Kirti Nagar residential scheme, mainly comprising blocks J and K,

which is earmarked as "industrial" in the Master Plan to be changed to "residential"

THE SCHEDULE

AND WHEREAS no objections or suggestions having been received with regard to the areas mentioned in the aforesaid Schedule:

NOW, THEREFORE, in exercise of the powers conferred by subsection (2) of section 11-A of the said Act, the Central Government, hereby makes the following modification in the said Master Plan for Delhi and in the Zonal Development Plan, Namely:-

"Land use of an area measuring about 6.87 hectares (about 17 acres), occupied by the Delhi College of Engineering Technical Higher

Secondary School and Women's Polytechnic, bounded by Natioanl Highway 91.44 ms. wide (300' R/W) in the east parlty, and existing lane separating residential area in the North, Master Plan Roads 30.48 ms. (100ft.) and 45.72 meters (150 R/W) in the South-East and south-West and by an existing road in the North-West, earmarked in the Master Plan for Delhi and in the Zonal Development Plan for institutional use be changed form 'institutional' to 'Commercial'".

THE SCHEDULE

Approximately 6.87 hectares (about 17 acres) of land in Kashmere Gate.

L. M. SUKHWANI.
Under Secretary to the Govt. of India
(Case No. 10-2(5)/69-UD).

New Delhi, dated the 5th Sept., 1972

NOTIFICATION

WHEREAS certain modification which the Central Government proposed to make in the Master Plan for Delhi as regards the areas mentioned in the Schedule hereto annexed were published as notice (No. F.3(245)/58-MP dated the 25th. September, 1971) in accordance with the provision of section 44 of the Delhi Development Act, 1957 (61 of 1957) inviting objections and suggestions; as required by sub-section (3) of section 11-A of the said Act.

AND WHEREAS the Central Government, after considering the objections and suggestions with regard to the area mentioned in the aforesaid Schedule, has decided to modify the Master Plan for Delhi;

NOW, THEREFORE, in exercise of the powers conferred by subsection (2) of section 11-A of the said Act, the Central Government, hereby makes the following modification in the said Master Plan for Delhi, namely:-

"An area measuring 11.7 hects., about 29 acres earmarked as "Recreational" (District Park, Play grounds and open

spaces) in the Master Plan of Delhi, surrounded by Industrial Area in the North National Highway No. 2 in the East, Master Plan "Green" in the South and the railway land in the West, located near Badarpur village falling in Zone F.19, be changed to "industrial use".

THE SCHEDULE

11.7 hectares of land surrounded by Industrial area in the North, National Highway No. 2 in the East Master Plan 'green' in the South and railway land in the West, located near Badarpur Village.

L M. SUKHWANI,

Under Secretary to the Govt. of India

(Case No. 10-2(3)/69-UD).

DELHI DEVELOPMENT AUTHORITY No. F.3(186)70-M.P. New Delhi, dated the 11th Nov., 1972

NOTIFICATION

WHEREAS the Delhi Development Authority has proposed to make following modifications in the Master Plan for Delhi:-

MODIFICATION

In paragraph 5, entitled "Provisions regarding requirements in Use Zones" occurring in section A (Zoning Regulations) of Chapter II of the text of the Master Plan dealing with the Zoning and Sub-Division Regulation-

(1) At page 55, against item "(b) plot coverage under the heading "Residential Use Zone", notes (1) and (2) shall be substituted by the following namely:-

Note: The area to be covered need in no cae be less than the permissible covered area for the largest size plot in the lover category. For example, the area to be covered in a plot of 1028.44 sq. meter (1230 sq. yds.) will be 40 per cent of 1003.36 sq. meter (1,200sq. yds.) i.e. 401.34 sq. meter (480 sq. yds.) and not 1/3rd. of 1028.44 sq. metre (1,230 sq. yds.) which is only 342.81 sq. metre (410 sq. yds.)"

(2) At page 56 against the heading "© Floors" for the sentence "In individual plots, exceeding 167.23 sq. metres (200 sq. yds) a two-storeyed building raised on stills may be permitted, provided the enclosed area on the ground floor does not exceed 25 per cent of the permissible covered area on the first floor," the following sentence shall be substituted, namely:-

"In individual plots exceeding 167.23 sq. metres (200 sq. yds.) a building raised on stills may be permitted provided the stilts floor shall be treated as one of the main floors of the building."

The proposed modifications having been published as notice No. S.O.5121, dated the 13th. November, 1971 at page 6026 of the Gazette of India, Part II Section 3-Sub-section (ii) as required by sub-section (3) of section 11-A of the Delhi Development Act, 1957 (61 of 1957) inviting objections and suggestions.

AND WHEREAS the Delhi Development Authority has considered the objections and suggestions in regard to the modification mentioned above.

NOW, THEREFORE, the Delhi Development Authority, in exercise of the powers conferred by sub-section (1) of section 11-A of the

said Act hereby makes the above modifications in the said Master Plan for Delhi.

Road in the south-west is to be changed from "Commercial (Wholesale fruit and vegetable market)" to "Public and semi-public facilities".

THE SCHEDULE

(a) An area measuring about 4.05 hectares (10 acres), bounded by bounded by northern Ridge Road in the east, regional park in the north, Malkaganj residential area in the north-west and G.T. Road in the southwest.

MRS. PRATIBHA KARAN, Under Secretary to the Government of India

No. 12016/(1)/76-(Part II), New Delhi, dated the 22nd. Dec., 1976

NOTIFICATION

WHEREAS the Central Government proposes to make certain modification to the gross residential densities indicated in the Land Use Plan for Urban Delhi of the Master Plan for Delhi, for different zone under various planning divisions, under Section 11-A of the Delhi Development Act, 1957 and published in the manner as prescribed under rule 6 of the Delhi Development (Master Plan & Zonal Development Plan) Rules, 1959 VIDE Notice No. F.3(154)/67-M.P., dated the 13th. October, 1975, for inviting objections and suggestions within a period of 30 days from the date of notice as required by sub-section (3) of Section 11-A of the said Act;

AND WHEREAS, the Central Government, after considering the objections and suggestions with regard to the said modification in the schedule, have decided to modify the Master Plan for Delhi;

NOW, THEREFORE, in exercise of the powers conferred by subsection (2) of section aa-A of the said Act, the Central Government hereby

makes the following modification to the Master Plan for Delhi with effect from the date of publication of this Notification in the Gazette of India, namely;

MODIFICATIONS:

I. (I) On page 22, right-hand column, paragraph 3 on "6 Residential Areas" shall be substituted by the following paragraph:-

"6 Residential Areas.- The main objectives of the plan are to obtain a balanced city structure for healthy living and to relate residential areas to the centres of employment in government offices, industrial and commercial areas so that the journey to work and back is kept to the minimum. With this in view, a more rational pattern of residential densities is proposed. Densities have been lowered in some central areas where they were too high so as to provide better living environment. As the city extends to wards its outer limits, the densities proposed have

been provided on a graded scale to effectuate a polynodal / polycentric form envisaged in the Land Use Plan".

(ii) On page 24, left-hand column, paragraph 3 shall be substituted by the following paragraph:-

"Between the Inner Ring Road and the Ring Road, the existing densities are about 75 to 100 persons per acre and should be so maintained. South of the Ring Road up to Badarpur Road, the same pattern of 75 to 100 persons per acre is recommended. Near Kalkaji, however, higher densities of 100 to 150 persons per acre have been proposed since it is nearest to the Okhla Industrial Area. It is proposed to keep the 25 persons per acre density west of Mathura Road in Friends Colony, whereas for the areas on east of Mathura Road, a density of 50 persons per acre is proposed. No residential development should take place south of Okhla Sewage Farm since it is undesirable to have a residential area there".

(iii) On page 24, right-hand column in para 2, the lines from line 21, shall be substituted as follows:-

"All other areas north of Mall Road and the east of G.T. Road area

proposed to be developed at 100 persons per acre up to the National Higway Bye-pass. The northern portion of this is subject to water logging and should be developed only after adequate drainage arrangements have been carried out".

(iv) On page 24, right-hand column, paragraph 3 shall be substituted by the following paragraph:-

"In the north-west, at present almost the entire area is rural in character with some good orchards. It is proposed to have intensive development for area that are nearest to the city as they are not more than 4 miles from the densely populated old Delhi and should help in relieving some of the congestion there. The densities proposed are 150 to 100 persons on both sides of the Ring Road and up to the outer periphery of the proposed urbanisable limits and along the railway lines to Rohtak and Ambala, so that the masimum number of people will travel minimum distance to get to work. Many of the large existing orchards have been retained as District Parks and may be preserved and maintained, as orchards by public agencies or leased to cooperatives and individuals. Also in making detailed layout plans care should be takne to include as much as possible of the existing orchards for local parks. Since it takes

many years to landscape a park with trees, it is essential to make the best use of these trees".

(v) On page 25. left hand column, paragraph 3 shall be substituted by the following paragraph -

"The density is between 100 to 150 persons per acre west of Delhi Jaipur Railway line and near the industrial areas. The same density range from 100 to 150 persons per acre has been proposed along the Najafgarh Road and on the periphery of urban limits with high densities close to the work centres".

(vi) On page 25, left hand column, in paragraph 4, lines 27 and 28 shall be substituted by the line, as follows:-

"Across the Yamuna, Shahdara is proposed to be developed as a complete city of about one-million population".

(vii) On page 25, right hand column, paragraph 2 shall be substituted by the following paragraph:-

"High densities of 125 to 150 persons are proposed in South Shahdara in proximity to proposed industrial and commercial areas. In other areas densities ranging from 125 to 75 persons per acre are proposed towards the U.P. Border, and up to northern Highway Bye-pass, Higher

densities are proposed in this area establish relationship with the work centres and housing low-income groups.

(viii) On page 26 of the Master Plan for Delhi, for the table indicating the population and residential areas for each Division by appearing above the heading "7-Development Zone", the following Table shall be substituted:-

H. R. GOEL, Under Secretary to the Government of India.

No. 12014(9)/76-UDI. New Delhi, the 24th December, 1976

NOTIFICATION

WHEREAS certain modifications which the Central Government proposes to make to the zoning regulations, applicable to the Master Plan for Delhi and the Zoning Regulations of Zonal Development Plan for enlarged Zone D-1 (Connaught Place and its extension), under Section 11-A of the Delhi Development Act, 1957, mentioned in the manner as prescribed under rule 6 of the Delhi Development Authority (Master Plan and Zonal Development Plan) Rules, 1959 VIDE notices No. F.3(256)/72-M.P. dated 9th. December 1975 [S.O. 698(E) and S.O. 699(E) Gazette of India Extraordinary Part-II Section 3, Sub-Section (ii) for inviting objections and suggestions within a period of 30 days from the date of notices as required by sub-section (3) of Section 11-A of the said Act.

AND WHEREAS the Central Government, after considering the objections and suggestions with regard to the said zoning regulations, have decided to modify the Master Plan and the Zonal Development Plan for Delhi.

NOW, THEREFORE, in exercise of the powers conferred by Sub-

Section (2) of Section 11-A of the said Act, the Central Government hereby makes the following modifications to the Master Plan (Zoning Reglations) and the Zonal Development Plan for enlarged Zone D-1 (Cannaught Place and its extension) for Delhi, with effect from the date of publication of this notification in the Gazette of India, namely:-

MODIFICATIONS:

- I. MODIFICATIONS IN THE MASTER PLAN (ZONING REGULATIONS):
- (1) In paragraph IV 'Commercial and Retail', sub-para (a) 'Cannaught Place Extension, Minto Road, Ranjit Singh Road', occuring on page on page 60 of the Master Plan for Delhi for the words-
- . "(ii) Maximum permissible coverage of 50 per cent on the ground and first floor and 35 per per cent on the upper floors has been reduced to 25 per cent and 30 per cent respectively for Connaught Place and its Extension (Notification No. K-12014/9/72-UDI dated 27th. April

1974-S.O. 270(E) Gazette of India Part II, Section 3, Sub-Section (ii)," - the following words shall be substituted namely:-

- "(ii) Maximum floor coverage for all the floors shall be 25 per cent except in the case of hotels where for ground and first floors, an additional coverage of 5 per cent will be permissible"
- (2) On page 61 of the master Plan for Delhi, above the heading "V. Wholesaling", the following notes shall be inserted, namely-

"NOTES:

- (1) For commercial development, including offices, in all areas of Delhi, the maximum ground coverage shall be 25 per cent for all floors except that the case of hotels and additional coverage of 5 per cent will be permissible on ground and first floors only.
- (2) Parking standards for various types of commercial activities shall be as below:-

Тур	e of activity	Total equivalent car space			
(a)	Trade	1.14 car spaces per 92.9 sq. mts. (1000 sq. ft.) of built up space within the curtilage of the building/basement, and an			

Type of activity	Total equivalent car space
	additional 1.14 car spaces per 92.9 sq. mts. (1000 sq. ft.) of built up space within the plot outside the building, subject to the condition that 50 per cent of the open space around the building should in any case be left for greenary/landscaping."
(b) Offices, Cinemas & Hotels (5-Star)	1.14 car spaces per 92.9 sq. mts. (1000 sq. ft.) of built up space within the curtilage of the building /basement, and an additional parking, where required, limited to the extent of 1.14 car spaces per 92.9 sq. mts. (1000 sq. ft.) of the built up space, subject to the condition that 50 per cent of the open space around the building should in any case be left for greenary/landscaping."

- (3) On pages 60 and 61 of the Master Plan for Delhi, under the heading "IV. Commercial and Retail", the maximum coverages on the ground floor shown against-
 - (i) sub-paragraph (c) against District Centres up to 25 acres.

- (ii) sub-paragraph (d) against Community Centres and Retail Centrres, and
- (iii) sub-paragraph (e) against Neighbourhood Shopping Centres.

shall be limited by the coverage as indicated in Note (I) on page 61 of the Master Plan as amended under item (2) above.

- (4) On page 63 of the Master Plan for Delhi, the foot-note, under heading "VIII; Institutional Use", shall be read as below:
- "F.A.R. will be determined on the merit of each individual case depending upon the location and the nature of use. However, this will be further subject to a height restriction of 24.4 metres (80 feet) where lifts and other necessary services are provided and 13.72 metres (45 feet) if such services are not adequately provided."
- (5) On page 59 of the Master Plan for Delhi, below the table prescribing Gross Residential Density, maximum coverage and maximum F.A.R., after Note (5) the following Note shall be inserted namely:-

"5A For all areas in Delhi for residential development on group housing hasis, the F.A.R. will be further subject to the restrictions of various heights, as below:-

- (I)a maximum of 36.58 metres (120 feet) respect of Government point block building where overhead water reservoirs (tanks) as well as lifts and other services are to be provided in the buildings;
- (ii) a maximum of 24.4 metres (80 feet) where lifts and other necessary services are provided, and
- (iii) a maximum of 13.72 metres (45 feet) if such services are not adequately provided.
- (6) At the bottom of the left hand column of page 54 of the Master Plan for Delhi under the heading "5 Provision regarding requirements in use zones, density, coverage, Floor Area Ratio, Setback and other requirements of use zones", the following foot-note shall be added:-

"Foot-note: All tall/multistoreyed buildings for commercial development over 13.72 metres (45 feet) in height, shall have standby generators for electricity within the building."

II. Modifications in the Zonal Development plan (Englarged Zone D-1-Connaught Place and its extension) in cluding Development Control:-

(I) Height Restrictions: On pages 8 and 9 in the text of the Zonal Development Plan (enlarged Zone D-1 Connaught Place and its Extension-Metropolitan City Centre of Delhi) for the existing paragraph 7-8 the following paragraph shall be substituted namely:-

"7.8 For the Metropolitan City Centre of Delhi, there is no height restriction for commercial/office buildings, However, the height shall be governed by the F.A.R. applicable and the architectural control, prescribed by the Delhi Urban Art Commission."

(2) Parking Standards: On page 11 in the text of the Zonal Development Plan (Enlarged Zone D-1- Connaught Place and its Extension-Metropolitan City Centre of Delhi). the table stipulating the parking standards, for various type of activities, shall be omitted and the parking standards mentioned in note (2) on page 61 of the Master Plan for Delhi Modification No I(2) above) shall apply.

K. BISWAS Director.

No. 13014(4)/71-UDI. New Delhi, dated the 31st. Jan., 1977

NOTIFICATION

WHEREAS certain modifications which the Central Government proposes to make in the Master Plan for Delhi regarding the areas mentioned hereunder were published with notice No. F.20(7)/76-M.P., dated the 16th.
